This document provides summary information about any new features and enhancements, resolved issues, and recently identified issues. Please take a few minutes to review the document in its entirety. For more detailed information, refer to the application help files.

**NOTE:** Items and release date are subject to change prior to the release date.

## Enhancement

The following enhancement has been made in this release.

### ScriptWriter

- The SIG field now displays over two lines so you are able to see the entire SIG. (124516)

The screenshot displays the 'Prescribe Medication' interface. The patient information on the left includes 'Addington, Winston Ba...' and '79 y/o M 03/14/1940'. The provider is 'Campos, Elena, MD' and the pharmacy is 'Medi-Blue Rapid Clinic (000) 881'. The medication is 'Zofran 4 mg/5 mL oral solution' with a dose of '4 mg/5 mL oral Solution'. The 'Sig' field is highlighted with a red box and contains the text: 'take 10 milliliters (8 mg) by oral route 1-2 hours before radiation, with additional doses every 8 hours after the first dose for 1-2 days after completion of radiation'. The 'Dispense' is set to 'Rx Only' and the quantity is '1 Milliliter'. The 'Future Effective Date' is empty. The 'Fill Indicator' is 'All Fill Statuses'. The 'Allow Generic Substitution' checkbox is checked. The 'Real Time Benefits' section shows 'Prescriber' and 'Pharmacy' with green checkmarks, and 'Quantity' with a grey circle. The 'Powered By' is 'Relay Health'. The 'Notes to Pharmacy' and 'Internal Comments' fields are empty. The 'Terms of Service' section shows 'PDR BRIEF'. The bottom of the interface has a 'Previous' button, 'Make My Favorite', 'Make Clinic Favorite', 'Save', and 'Send Rx Now (1)' buttons.
