

New Features

The new features and enhancements in this release are described briefly below.

Prescribe Medication window

- RxBenefit Clarity is a service offering made available by CoverMyMeds and RelayHealth Pharmacy Solutions to provide real-time messaging to prescribers regarding patient benefit information delivered prior to completion of the prescription writing process. This information currently is available in the **Real Time Benefits** section on the Prescribe Medication window in Plus.

Alternative Medications (when available) have been added to the **Real Time Benefits** section on the Prescribe Medication window. The information displayed for each alternative medication includes drug name, quantity, and patient cost. Click a medication link to display the Drug Substitution window, where you can view and select to send the alternative medication to the pharmacy.
