*Spirals* is the 5th out of 6th book in the tunnels series and it is fantastic. It is a must read if you have ever read the other ones. This series starts with "Tunnels", a novel about Will Burrows and his underground adventures after he finds a secret passage under his house. In the following books, he finds out all about the Colony and the Styx, the inhabitants of this underground world, which eventually leads to the apocalypse of the human race. This second to last book sets place surface or "top soil" as the characters call it. Here the Styx have already invaded and it is up to Will to save the world as we know it!

This book would be a 9.5 out of 10 because of its fantastic details which made the book flowing. It was written so well I couldn't put the book down and I read it until 2 in the morning. It had so much description that it was easy to picture the novel happening in real life. If you ever come across a book from this series pick it up. It is perfect for readers of all ages and would be well worth your time.
