*Parasite* is a "contagious thriller" that was a huge adventure for me. Mira Grant is an amazing author who knows how to write good science fiction type thriller books. This book was about Sal Mitchell a girl who was in a terrible accident who was in a coma for 5 years until she suddenly woke up. In this future scenario, there is a company called Symbogen, which provides the population with parasites that boost the immune system and cures any disease. The conflict of the story is about parasites that try to take over the host's body causing a sickness that spreads everywhere. It's up to Sal and her friends to stop the epidemic!

This book deserves a 9 out of 10 because of how good it was. It has fast paced action as well as a thrilling side that sent chills down my spine. While reading this book, I couldn't help but read it from start to finish. I can't wait to read the sequel soon and I would definitely recommend *Parasite* for anyone in high school and up. If you see it anywhere pick it up and start reading because it's the best thriller you'll read anytime soon.
