

31 October 2017

Richard was admitted to ICU with Pancreatitis caused by a viral infection. We were there at the moment he was wheeled into the ICU. We began to lay hands on him that day for what would continue everyday for 71 days. The hospital did not expect him to survive the attack, but Richard is the evidence of the victory of Jesus over sickness. Thanks to the doctors, nurses and family members for indulging our faith toward God in Jesus name. I know they are blessed for it. Here is Richard's testimony. To God be all the glory in Jesus name!

"Yes got married 03/03/2017. Had my last operation 12 aug 2016. And all good since then. And since then i can not stop telling everybody about you that asks me about faith or funny things that happened to me. You will always be remembered. There are things that i felt happening in me that i just cant explain to people although i want to tell them. In the end i stopped drinking the pills to assist my body in dissolving the food and and I'm not a diabetic at all. No one can explain it.... I'm living a normal life without a pancreas which is actually impossible. But here i am living my happy life. How are you doing?

... I want to get involved. I want people to experience that overwhelming feeling that you cant explain. Was great speaking to you. I have a question but. How did get to me? How did you end up knowing and to reach out to me at that stage. If its a question that can not be answered i understand my friend. Have a great day. And you and God have been in my thoughts since the first day i met you and i will always believe that God worked through you. Its just something i cant explain, but you my friend made one big change that i felt and will always remember. GOD BLESS YOU AND THE WORK YOU DO....."
