

Welcome to Microblading and Microshading

Hopefully the following information will help you make a decision if this service is for you! If you have any further questions, you can always call the salon! We want you to be as excited and ready for this service as we are to service you!

- When making the decision to have Microblading/Microshading, take a look at your lifestyle, your environment, and the different routines you have in your life. After care is a vitally important step to your brows being as fabulous as they can be!
- If you are an avid gym goer, yoga lover, or swimmer, these will be important to refrain from during your healing process. Things like overly sweating in the forehead/brow area, or being in excessive water during the healing process will greatly affect your healing. You could be at risk of rejecting the pigment.
- If you are a regular customer to a tanning salon, and tan on a daily/regular basis, you will need to refrain from tanning for approximately 30 days during the duration of the healing process. Also know that if you resume tanning after you are healed, you may need to have touch ups done sooner than the recommended time frame. Be sure to mention to Jenna during your consultation if this is your routine so she can recommend the proper after care and touch up schedule that will be right for you.
- Living in the beautiful Upstate New York area, we know that many of our clients are “SnowBirds”, those who travel to the South for the winter months. If this is your lifestyle, you probably spend much more time in the sun than our year-round residents. Please mention this to Jenna during your consultation so she can recommend the proper after care and touch up schedule that will be right for you.

After taking all of these points into consideration, and fuller natural looking brows is your desire, and the all-important after care fits into your lifestyle, then we are so happy you have chosen Casa Di Bella as your salon! Please call us to book your appointment today!
