*The area of the case in Mjodvattnet, county of Vasterbotten*

*Mr. Helge Nystrom*

Helge Nystrom, a farmer, was cleaning a ditch on his property when he looked up and saw a cigar shaped object with wings, land 50 meters away. As he watched the object, a small man, about half a meter tall, came towards him, walking along a ditch bank. The man looked like a round football in his outfit. As the humanoid caught sight of Mr. Nystrom, he ran to the “cigar” as fast as he could. The witness then hid behind some willows. A few seconds later there was a sharp explosion, like a blasting discharge, and when the witness looked up both the

object and the little man were gone. There were no traces left at the site.
