

2016: Muranga, Kenya

Tuesday, June 21, unspecified hour in daily light

Source: video notified to NUFORC on Friday, June 24, 2016

Frame from the video

It is a video taken by an amateur camera. It's very popular on the Kenyan media but we are skeptical and we do not have experts in this field. The participants can be heard saying...Ni nini io (swahihi); whats that? Inaenda (Swahili). Its going ((NUFORC Note: Video, taken through a windshield, indicates a disc flying in front of the passenger vehicle, from right to left, and in a rain storm. Possible Photoshop creation, we suspect, but cannot be certain.)

(NUFORC Note: Witness indicates that the date of the sighting is approximate.)

Duration of sighting and video: about 20 seconds.

Reliability evaluation:

- false / prank -
