

## **1988: Kuwait City, Kuwait**

unspecified date, unspecified hour of nighttime

Source: message of the witness to ufinfo.com

My brother in law was talking to me about something he and his brother and 3 cousins have seen in 1988, I was shocked of what they have described me. They did not think it was a big deal to talk about this, because people here will think they are crazy. While they were gathering in the backyard of their house they noticed a circular disk shaped object flying with a humming sound; they described the sound to be like an air conditioning unit. It was flying about 100 meters directly above their house, with a diameter of 5 houses, which I found out to be 400 meters. It was flying very slowly with lights all around it. They continued watching it till it was very far to see; it did not shoot up or fly away it just kept flying at the same altitude

**Reliability evaluation:**

**- very low -**

**no reports from other alleged witnesses mentioned;**

**no investigation; insufficient information;**

**possible invention**
