

2009: Tofo, Mozambique

Wednesday, July 1, between 7 and 9 pm

Source: e-mail sent from the witness to NUFORC
on Thursday, July 16, 2009

UFO in absolutely remote location. I am writing to you from Tofo, Inhambane, Mozambique. We take photographs daily to upload them on our face-book profile. On the 1st of July 2009, sometime between 7-9 pm, we took some photographs for this purpose. Yesterday, whilst searching for a photograph I came across a photograph taken on the 1st of July which appears to have two golden triangular/spherical shapes in it. The second one appears to have a halo surrounding it. For your information, Tofo is a remote location and we have no air traffic at all and no weather station within close proximity. I am perplexed as to what these shapes can be. A second photograph taken on the same day shows two golden blurs. Please allow me to reiterate that it is not possible that this is a damaged lens as other photographs taken on the same day, both before and after these photograph[s] don't reflect such objects. I would really appreciate your urgent and soonest reply. Kind regards and many thanks (name deleted).

Reliability evaluation:
- very low -
no exams on photos available; possible trick;
no reports of other witnesses
