

2009: Lagos, Niger

Tuesday, March 31, round 11 pm

Source: message of the witness to MUFON

Me and my sister have been awoken in the 1th of January of 2009 when we saw a UFO (I'll also notify that one). But then, a few months passed by, when we actually went and try to call them after I saw on You-Tube that you could. I tried for several weeks, but I think, at that time I wasn't quite ready. Then, at night, I guess it was around 11pm, I was in the veranda of my apartment, and saw a bright light, just like a star, but brighter. Nothing special at first till I noticed it was moving rapidly. I immediately called my sister (she was in the living room, on the computer). She didn't hear me. I looked again, it kept moving. Called her again and again and looked again. It passed in the middle of two of the stars in the "tail" of the Ursa Minor. She finally heard me and came, just to see it fade away. It went from South to North. Later that night, we were preparing to go to sleep but my sister was really enthusiastic and kept looking out the window (we share the bedroom). Then, when I was almost asleep, she yelled. Look! I jumped out of bed and

looked where she was pointing. There were three lights. Two red on each side and one white in the middle. It was a few meters above the apartment building in front of ours but I don't know how far. It hovered about 30 seconds there. We were stunned. Amazed. The bright light was a classic, but that was so much clearer. As we saw it in the sky, it had about 4 centimeters; imagine its real size! Then we called our brother so he could see as well and prove that we weren't imagining things. But, when he came, the object started to move, slowly but continuously from West to North-East. It slowly got out of sight. We guess it was because my bother did not want to see it, from what we have learned from the "Law of One", they can only appear to those who wish. I can also tell you that, in those weeks I had been trying to see something I gain some knowledge of how the lights and shapes of common airplanes are and of their paths (from South to North). I started to identify some of the Constellations, so I'm pretty sure that, what I have seen is NOT an airplane. I'm sorry for the typing errors, but it's not my native language. I'll fill in for other sightings as well, as best as I can, because we have seeing more than twenty since those first. I hope to have contributed. Goodbye.

Reliability evaluation:

- middle -

no supporting declaration from other supposed witnesses;

no investigation on air traffic available;

possible confusion or military craft;

possible event not UFO relating
