Sketch of the humanoids

The probable site of the event, towards Callao

While driving C.A.V. (Carlos Alberto Valente) saw a sand-colored & very shiny disc-shaped object hovering 6-7 feet off the ground. Three figures emerged from it. They looked like mummies. They had a humanoid profile, but their legs were fused together. The hands looked like fingers in mittens, and they had an opposite thumb. The skin was sand-colored and they had no facial features. There was a transparent area where the eyes should have been.

The incident occurred 6 km from Lima.

Reliability evaluation:

- low -

**one single witness only; insufficient details;
no supporting declaration available; possible military craft,
crash test dummies or advertising rubber dolls from a
balloon; no investigation available; reserves**
