

1980: Rio Pedras, Puerto Rico

March 3, round midnight

Source: Jorge Martin from Enigma

Sketch of the humanoids

The site of the incident at Buen Consejo Rd

Four witnesses were awakened by noises in their patio where they kept some caged rabbits. Looking out they were stunned to see five strange looking beings inspecting the cages. Two of the beings were five-foot tall and the other 3 were three-foot tall and heavier. The tall thinner ones wore a one-piece brown outfit, had grayish skins with large ears, large eyes and a large

flat nose and large thick lips. Their fingers were large and were connected by a thin membrane; both carried a bright metallic sphere in their right hands. The smaller beings were similar in appearance, except that they had large brilliant medallions hanging from their necks and belts. An independent witness. Mr. Rodriguez, saw the same or five similar beings entering a landed disc shaped craft on a roadway near the village.

(Note: Buen Consejo is the name of the road and not a village)

Reliability evaluation:

- very low -

supporting declaration from other supposed witnesses not available; no investigation; reserves on the source reliability; insufficient details; possible fabrication, prank or hoax
