

A Plan for Creating and Implementing

EARTH

AS IT IS IN

HEAVEN

CALLED

“NEW EARTH REALIZED”

An Idea Gifted From The Mind of God

Preface

For over two millennium there has been an expectation of the potential and reality of the New Earth being realized. This concept has permeated all great religions in one form or another.

At the same time, over the course of years, humankind has brought to bear in certainty what it is not—what doesn't work for the good of all. And as the angst of civilization has marched on, history records numerous shortfalls in spite of many worthy efforts.

In modern times, trillions of dollars have been invested over the years by governments, non-governmental organizations and a multitude of worthy causes—all aiming to make the world a better place; a more compassionate place; a more peaceful place.

Thousands of books have been written, all sating in one way or another, how to improve your life; how to make the world a better place; how to control more those who oppose and suppress. The advice all aimed at providing insights exclaiming in one way or another, "Here, do it this way."

Thousands of tests, cultural programs, shifts in the ways we do things, etc., have been imagined, debated, and committed to exploring. The list is endless for the successes, improvements and downright failures. Nevertheless, the search for the utopian life continues on in hope of finding the perfect model.

So, what makes this solution different? What makes us think that what is given will bring forth a new beginning: a New Earth Realized that solves all of the world's problems, ends hunger, war, and the vast indifferences between the humanities, cultures, and families of man throughout the world?

The difference is simplicity framed in a way that holds perfection as its aim, embracing it not as an end result, but rather as a journey. Herein we discover intention is infinite. 100%! It is a framework of love; a journey anchored in the belief that its all-encompassing nature is all that is needed.

For eons humankind has operated in the framework of seeking life first through the need to survive. We have lived life primarily from the point of view that, to live you need first survive at all costs. In this way, living life has long been rooted in avoiding death—and it is from this foundation that every civilization has been built. And it is this that always is 'the why' tribe fights tribe. The mentality has always been first and foremost about the tribe's survival.

As a result, the three core systems of all societies: the education systems, health and healing systems, and financial/banking systems, have been anchored in and propagate one intention: extend life! Survive! So fear of death became first cause, the subconscious driver, motivation, and motive of life.

It is this fear based ‘mentality’ that needs changing if a New Earth is to be realized for it is this mentality or attitude that has created an animalistic survival, instinctive mindset, that is primarily driven by the ‘fear’ of death. Like a hypnotic spell, it has been passed from one generation to another, always seeking to win even if the result is at the peril of another.

Most do not realize this, much less given any thought to why it is this way. Why? It is simply because fear is seen and perceived as a weakness where acknowledging it makes us even more vulnerable to the enemy. So we deny it and have become masters of its denial. For most it operates completely hidden and deeply suppressed in the subconscious mind. It is the ancient discomfort, the ancient hatred, the feeling of hesitance that comes when even embracing our neighbors.

These fears of survival are born in every family, pursued at every level of education so at minimum, humanity, family, communities... “the tribes,” in all their forms, can feed themselves. This includes learning how best to protect our bodies, to defend ourselves at all costs, which in modern times includes the vast system of healthcare and wellness, all with one intention: survival.

What few have realized is that this mentality, as animalistic as it may be, is the core motivating force of all humankind’s behavior. The very foundation of all civilization has been rooted in ‘fear’ and fear is the root cause to all of humanity’s problems.

The simplicity then is when we remove fear all that is left is love. And it is through love that a new earth will be realized. Fear, by its very nature, polarizes our loving nature. We know what is right but fear stops us—it paralyzes the movement which is natural, in fact super natural: love! Yet it is us that give it its power and it is here where we realize the potential of a New Earth.

“...what we have received and given here is a new framework, a new foundation from which we will enter a new life.”

Thus, what we have received and given here is a new framework, a new foundation from which we will enter a new life. It comes from a new understanding, an emotional intelligence, which teaches us from within. While fear appears to be the opposite of love, what is all-encompassing can have no opposite. Seemingly, this living contradiction is how civilization has unfolded, has molded our humanities as if there are two primal forces at work—two polarized ways of thinking, ways of being, or ways of living life. Who is making this contradiction real? In the answer was found the truth of love’s all-encompassing nature and with it came the key to how we co-create a New Earth reality.

These two opposing forces are not something happening on the outside of us but rather within us. Each is like an emotional intelligent operating system that has long been passed from one generation to the next. Most of humanity is not even aware of these forces other than from a day-to-day experience that drives their behavior. Few realize that civilization itself and every system throughout, is founded in the core belief that life is lived ‘just because’ it is. There is little, if any power we personally have, much less any ability to change it on a global scale. So the behaviors of survival continue to dominate so that

whatever it takes to continue the tribe or family, continues to be the daily goal. And in this littleness we live contradictions, happily uncomfortable in our complicities.

Though unspoken in most circles of conversation, these subconscious, primal forces, operate in full swing. If we are operating from fear, having friends is about survival; education is about surviving; healthcare is about survival; global leadership is about survival; banking and finance are about survival; investments are about survival; and last but not least, religion is about survival—if not in this lifetime, then in the eternal hereafter.

Thus, when we step back into a deeper introspection and ask ourselves, “What if there were no fear, what would change?” How would it change and what difference would it make? How would our attitude toward human potential change? What would our daily goal then be?

Simply put, it would change everything. Life as humankind knows it would be transformed into a utopia few imagine. It would become perfection, not defined as an end result, but rather it would become our journey.

Greed would disappear, hate dissipates, and the demands of the past would be stopped in its tracks. The polarized infighting as to who’s right or who’s wrong would come to an end. Why, because *there is nothing* to defend.

This is the very nature of the primal force of love. When we are moving under its motivation, its natural intelligence shows us what is most appropriate in every situation. Change comes with compassion and understanding. Old structures are not thrown down without regard to the people who are just surviving. New ways are created in love so that the transitions from the old (fear) to the new mindset will be gentle and loving and thus never demanding.

We then begin by embracing a new framework—where love is the all-encompassing key, the force, the intelligence, to realizing a practical way to free ourselves from the mandates of complacency found in the mere survival mentality. It is a new framework of principled living that takes us from the old to the new. Unprincipled, we remain stuck in the contradictions where defensive instincts continue the age old dramas; where we remain polarized in the defense of old ‘structures’. And while we must always honor the old so there is never a need to defend, we must be mindful that it is the old structures that contain the tradition and culture that harbor and cause us to defend our old ways of being. And it is these subconscious beliefs that maintain and keep us stuck in our fears. Love knows it is this fact that the new must account for or we simply create more fear. It knows it must be honoring—for honor is simply another expression of love.

Thus, in utter simplicity, the New Earth Realized is all about moving, changing, being and rewriting civilization’s primal motivation foundation from that of ‘fear’ to that of ‘love’. It is about declaring for

“...in utter simplicity, the New Earth Realized is all about moving, changing, being and rewriting civilization’s primal motivation...”

ourselves and the world over a new conscious way of being, claiming our birthright, our inheritance, our divine rights as children of love. It all happens naturally as we remove the foundation of fear in our every core system common to every country's and family's highest wellbeing. And it is this movement from an animalistic mentality of living to a new humanity's state of fearless being where a new earth is realized.

While it is in fact simple, it will not be easy. Humanity has been herded like sheep by the primal forces of fear for as long as history has been recorded. Its mindset is suspicious by its very nature and to some, any change is downright threatening. Yet with the right loving support and gentle understanding, a change to love will win everyone over. The question is not will it happen, but when. Because we know the deeper truth from within already:

Love is what we are and our true intelligence within.

Beneath the blocks of fear is life realized.

Where we see life as love, we see it is all-encompassing.

In the All-Encompassing, We Realize Fear Is Not Real.

Here Love's Meaning Is Realized.

Herein Peace is Found and the Earth Healed.

All that is needed is your support for implementation.

Introduction

A New Earth Realized is a global project that aims to change the very nature of civilization on earth. The projected timetable for it to take root in every country throughout the planet is 10 years, followed by another 10 years of it being globally realized, thus becoming a positive part of every culture throughout the world.

It is a new paradigm framework of purpose for all of humanity that is easily and naturally compatible with cultures and traditions, with few exceptions. Its simplicity lies in the fact that it is simply a change in perception. Once its foundation is laid and demonstrated, the “Ah-Ha” will ring into the conscious awareness of all humanity around the world.

The first five years of the plan is where we address implementation and demonstration. The second five years is the intra-cultural-adoption globally. This second phase is where everyone sees clearly where we are going based in tangible demonstration and documentation and where hope peaks at a planetary level.

Every step of the way is planned to be practical, manageable, and without disruption to all the loving efforts already in action. Careers invested in the systems of old must be provided alternatives that are more engaging, loving, and fulfilling in daily family life.

Everyone must be engaged. Collaboration is the expression of love which has a fundamental mandate: Everyone Will Win! No one will lose! No one will be left behind!

Let us expound on this deeper. Fundamental to any true loving expression is that there are not polarities. Polarized mentalities find need to ‘defend’ by their very nature. They defend ‘my turf’, ‘my bank account’, ‘my way of being’ and ‘my right’ to do it my way. When we act from our primal force of loving intelligences within, we know there is nothing to defend, for we know in truth, this primal force of love is all-encompassing. In truth, it is the only thing going on throughout the world—it is the one force we can rest assured will answer our every question.

And it is this same loving force that powers the sun and the *billions of suns* in the Milky Way galaxy; the same intelligence that powers all of the other billion-plus galaxies like the one we now live in. Love truly realized is Intelligence!

Simply put, we cannot polarize love for it is the only thing that is true—we can only ‘imagine’ it has an opposite and then believe in its plausibility. And yet as everyone already knows *within* them is that love is life—it is the force that beats the heart that activated our life through the seed of life that became you and me and continues in the creation of what is most dear to us all: family. Without love all life stops. Through love life becomes limitless!

So the foundation of our New Earth Realized is in certainty, Love. Choosing to make love the only day-to-day experience all humanity feels is the only path to realizing the promise of a New Earth. This is the win we speak of for all...it is an experience that is the birthright of every adult and child that lives. This, in our heart of hearts we know as we close our eyes to sleep each night. It is the only thing that is certain and the only thing that is real. When we embrace love in our every action, we will have opened our eyes to a New Earth Realized.

The Plan

The plan outlined on the following page was written in an executive business plan format. This is done intentionally. As a result, the many details of the plan will come during implementation. [In other words, we are providing 20% of the details, which in essence is similar to the process of building a home. The other 80% is provided as the framework is implemented at a local level].

This framework includes the foundation and indicates where the walls will be erected. The details or inner structure of the home are how the rooms are laid out; where the kitchen is, the bathrooms, paint colors, floor coverings, etc. This is done intentionally because it allows for local cultural adaptation that is sensitive to the needs of individuals.

Thoughts to keep in mind as you read over the plan are: all that is provided here are plans given us by God, thus are reflective of principles involving Love's Perfect Movement. While all that is provided has not been tested on a "grand implementation" scale, each change is modeled after various programs and ideas of success, reflective of common sense and practical understanding of human needs no matter the culture. Global implementation is possible because of them being simple—simply Love in Expression. Thus, what is described is grounded in basics: flexible and adaptable at all local levels. It is more about 'what to do' and not 'how to do' it, which is why our guidance is always reminding us to 'move in a framework without structure'.

Such framework provides for 'cultural' and 'traditional' sensitivities or local structures so that implementation and daily operations truly reflect love's expression on a local level. This methodology ensures rapid adoption in just a few years versus generational change morphing into a new reality over a hundred plus years. This plan provides for 'transformational change' versus 'evolutionary change'. As a transformational model, we intend on changing the hearts of man knowing at the bottom line, the mind always follows the heart.

If you are reading this we are hopeful you are ready to step out with us. You are the difference and we need your help to make this happen. We are hopeful you are willing to invest in the biggest project ever conceived for the greater good of every man, woman and child.

“It is the only thing that is certain and the only thing that is real—when we embrace love in our every action, we will have opened our eyes to a New Earth Realized.”

We are hopeful you are ready to become an Agent of Change—to help us move from concept into action, participation and collaboration. We are hopeful you see just how serious and brilliant this plan we have been given is and as such, can only be the work of love.

May we together embrace the ancient love hidden deep within all of humankind—the love that when expressed, shows us our true humanity.

Executive Summary

The vision of a New Earth Realized is an idea in the Mind of God. Thus we might as well say, it is His idea that we need to reveal for it is nothing more than a reflection of His Perfect Love. It is this Perfect Love that we seek to reveal, to gift to all of humanity—the Kingdom family living by and through the Love of God.

The Vision

Dancing in the reality of our hearts is a vision told of long ago. It was a way of being, of living, where every soul of the human race would one day live in perfect harmony, no longer living separate and apart. This is a fulfillment of consciousness written on every heart for it was given to each and all as a birthright. It is an endowment that was passed from generation to generation—sealed and hidden from conscious sight. At the right moment in times where there appears to be great strife, it would be revealed. Perfect Harmony is now given for it to be revealed. God is seen as Love, Real, an Ever Presence, Living Now, and the Power of Love Fully Realized.

The Mission:

Our mission is to show and prove through tangible demonstration the irrefutable evidence of the presence of Love where the Laws of God are always prevailing. We will accomplish this by the willingness and courage to release all fear, allowing the presence of love to be self-evident and fully realized. We allow the work of love to do the work. This is our mission, a New Earth Realized.

The Plan Summarized

Implementing the plans for a New Earth Realized is one of shifting the framework of man's mentality from a fear based survival foundation to that of a foundation built in love. The process of implementation, grounded in love, must be gentle, loving, and understanding of all human needs. Everyone has the right to question. Everyone has the right to participate, to declare their wishes and seek fulfilling these wishes. Honoring each one's path and the lead of their heart is a natural, loving part of the process.

The plan is one that aims to change hearts, knowing the mind will follow the heart. Simple in concept, the plan will demonstrate and show evidence of success. Through these efforts we will prove that change is safe, secure, and in everyone's greatest interest.

The plan begins by educating others of the practical nature of the process of shifting to a new paradigm foundation of fear to love. It teaches what this will look like and provides experiential tangibility so that confidence in its implementation can be real for every community.

This educational process will be done through multiple multi-media outlets including website, videos, print, feature films, and educational meetings held around the world. Additionally, New Earth Realized

will seek to collaborate with people and parties of like-mind who are willing to join the vision and be part of working the mission.

Teaching others about “living in the moment’ is then a critical part of the plan for it is here, through and in the ‘now’ moment, that the new ways, the New Earth, will be Realized. God has already provided the way, the means, the clarity needed. Its implementation only needs our willingness to release our blocks to love’s awareness, which are only those perceptions found in our memories and future imaginings.

Why? Because both the past and future thoughts of man are tainted or programed with man’s limited perceptions of ‘going it alone’ without God. These tainted attitudes or perceptions have created for us the world as we now experience it—a world where dualities’ polarities create the belief that fear is real. Whereas in God’s Mind it is not real and simply a belief in lack and limitation that was passed from a past generations to the next.

The reasoning for this is sometimes little understood. Fear cannot be real in the Mind of God, the Mind of All-Encompassing Love. Yet this all-encompassing love is found only ‘in the moment’ where God’s Love is—and here, in the little gap between memory and future imaginings, there can be no fear for *the love there* is all-encompassing, infinite, omnipresent, omnipotent, everything, always, eternally forevermore! Living in this new, but natural, state-of-mind is how a New World is Realized.

Demonstrating this truth is then the cornerstone of the New Earth Realized educational framework. It consists of simple ways of moving people out of their past into *the now moment*. It demonstrates the power of love moving in every moment—when it is untainted by our past memories and future imaginings, all of which by ego default are choices telling God, “We want to continue to do it our way”.

Implementing the New Framework on Earth:

Given by inner guidance are five systems within humanity that touch, in various ways, every soul. Each one of these greatly influences attitudes and beliefs of every single human being, defining for us all ‘what is normal’. Without question we readily adopted, mutually agreeing to these definitions, assuming “the Love” of Our Creator could be lacking and limited. Each of these ‘systems’ has been the core programmers or ‘communicating influencers’ of all the minds of humankind. Changing these is central to a New Earth being realized.

These belief systems are made up of the following expressions.

- I. **Educational Systems New Earth Definitions:** The purpose of education shifts from ‘survival’ to ‘talent discovery’. Currently, the survival mentality driven by fear is the predominate force in global education. While communication is central to its past, its dominant focus has always been ‘so you could get a job’. The New Earth system of education focuses on everyone seeking and finding their ‘avocation’ or ‘calling in life’. Different from vocation, or a job, avocation is all about helping everyone find what they love doing. This we call talent discovery because in God’s eyes, everyone is talented and an expression of love.

For 12 years this has been researched and developed and is now ready for mass implementation. The system addresses the two dimensions or needs in education. The first is reframing the purpose of K-12 primary education. This system will roll out as a program called “*Talent Discovery Education*” (TDE) – providing students and teachers with seven principles of guidance for discovering their natural talents and learning the ways to master them.

The second program will be what’s called JETTI malls (Job Exposure, Talent and Training Institutes). These malls will house from 100-150 trade schools—all supported by businesses who are interested in hiring the students. The idea here is simple and has been tested. Students, both young and old, will have the opportunity to shop for a trade or avocation, take assessments and learn how to discover their inner passions. But the key is the shift from 2-4 year schools to 3-6 month training, highly focused on specific talent development needed throughout the business sectors.

- II. **Health and Healing’s New Earth Definitions:** The New Earth expression of health and healing is happening right now in the mind of God. Here, we define God as the Loving Intelligence Behind All The Forces of Creation. This understanding shifts the focus from that of defending against death to the embracing of eternal Life—the natural birthright of all humankind. This will clearly provide the impetus to seek the truth of Eternal Life Now! Clearly, death will be seen as “optional.” As Love’s Energetic Loving Intelligence presents its quantum leap of consciousness, it will be more than capable of washing away old biology mindsets with Eternal Life Made Real.

For over 30 years now a process has been studied and developed—anchored in the manuscript called “*A Course In Miracles*”. This course teaches and has demonstrated round the world that through love, the healing process of our body is superbly natural. This is the Miracle. And during the last six years, a supplemental Lab Class has been in development and is now available to all who wish to tangibly experience miracles for themselves and share in this amazing truth with others.

The lab class, called Perfection Healing, teaches through experiential healing that miracles, the movement of Love, can be embraced through the release of man’s defenses of the body—all some form of fear. This process along with other free complimentary modalities will provide the means of humankind completely overcoming sickness and disease.

This lab class work is soon to be made available through packaging called, “*God’s Healthcare Plan.*” This plan will be made available for businesses so their employee teams can embrace the movement of love in ways where miracles will become a commonplace experience.

The industry now in full swing supporting health and healing, drug companies and the like, will all be afforded opportunities to become teachers and coaches of this process. Additionally, new

methodologies are expected to be pioneered in love, meaning within 20 years health and healing will be totally revolutionized.

- III. **New Earth Definitions for Finance and Banking:** Humankind now realizes its greatest good is found in extending love. Money is but one expression for making easy its flow. In the New Earth Realized consciousness financial systems are transformed into investments in Love's quantum fields of understanding. This, combined with investment in new green technologies and ultimately free energy, the stage will be set to move completely beyond the 'need of survival'.

Banking and investment, since coming into being, served humankind in many positive ways. However, as the industrial revolution unfolded, fear (or control) became its driving undercurrent of purpose and through our mutual agreement, money became a predominate key to survival in the minds of humanity. It became yet another polarity of fear, supported by clichés such as 'a necessary evil' or 'the root of all evil', something 'we need' to avoid death at 'all costs'.

The truth is money, or currency, was created to serve humankind in the convenience of trade, as a form of making the flow of bartering easily available to everyone. Making 'trade' fluid and flowing for the benefit of all is why it is still felt to be the currency in the global rivers of trade. Thus it is not money that is the problem, but rather the fear that was born into it by a few fearful men—this ultimately made money and wealth all but synonymous with survivability. What made this 'fear based belief' in the industry of banking and finance, cloaked in the form of prosperity, a reality? Fear.

In a New Earth Realized, prosperity is the natural movement of love so this is good, very good. Thus our task is releasing it from being polarized by fear, which fuels the greed in the form of grandiosity and control... unhealthy indeed!

Ultimately in our New Earth Realized, a new 'heaven on earth-like banking system' will emerge as a global credit-union like organization—owned by 'all of the people.' This of course benefits all people and is the natural way of unity. In this framework, the 'control' of money will be owned by no one and run collectively by the people. Profits from loans and services will be paid back to *all the people*; so in essence, monthly stipends will become the means for everyone getting what's needed to accommodate their basic living expenses.

Thus, no one goes without and all basic needs are simply accommodated for as a basic and loving default of everyone's birthright. In many ways, these reforms are now under way and our plan is simply to bring them full circle for the benefit of all.

- IV. **Leadership, Political and Community:** The New Earth Realized brings a New Awareness into the minds of Leaders. This will be anchored in new understanding, a new declaration of consciousness, a new unity of mind where humankind begins to see clearly the need to move past petty fears and animalistic mentality they now hold dear.

As the evidence of implementation is revealed, leaders will come to realize that systems of control are littleness, limiting, and suffocating of the talents and inspirations of Love that move naturally through our children and sociality as a whole. Thus movement will become collaboration versus manipulation and control. All the pack of wolf mentalities, us against them, will begin to fade away into the abyss of nothingness from which they came.

- V. **New Earth Religious/Spiritual Illuminations:** As the focus of finding the natural intelligence of Love becomes a forever inner journey, with talent discovery and new health and healing leading the way, religions of old simply fade for Love is Allowed to have its full sway. The twelve tribes of humankind release their sense of separation, knowing clearly now that it never was. Eternal service to the God Force of Love will have become the focus and all its joy, peace, and happiness will have become the core value and aim all religions serve. Love will quickly become the commonplace and religious working will be service work on behalf of the Living God *in this moment*. Past traditions and cultures that judge will soon simply fade. Eternal life will begin in the moment and life, love, and God, will all be seen as synonymous. Here, separation will have ended. All will begin to see, sense, *and experience*, we are all one.

These five shifts, systems of change, are all it takes to embrace a New Earth Realized. As alluded to in the latter three of these reviewed, the first two, education and health and healing, will be the drivers of transformation as they touch most all of humanity personally. The reasoning for this premise is simple: education and health each involves the daily business or needs of family—transform these to serve the highest good of family and global transformation comes naturally.

These transformed family values and tribal influences will then be taken to the streets, to work, to leadership and ultimately into becoming religious influences. As at our core, we are moms and dads, brothers and sisters, a son, a daughter; it all starts around the kitchen table, with friends and family in the comfort and security of home.

We are now hopeful that you are beginning to see with us the beauty of the vision given, the greater plan and the true potential of our prayers being answered... for in truth we must see together that we are the answer. May we allow it and embrace it collectively, to be fully energized in love and be guided from within, each step of the way.

The Budget As So Guided

As already mentioned, the budget given for accomplishing our mission is five billion dollars, one billion for each of the five systems being transformed. The breakdown given through guidance are degrees or areas of investment in each of the systems targeted for transformation.

The movement of love finances this mission and it is through love, all actions will be taken. Each area of investment fosters the movement needed for globalization of our mission and provides for a gentle and loving transition from the old to the new being realized.

The budgetary framework of implementation breaks down into the following five areas:

Educational, Multi-media Investment: The movement into a New Earth Realized requires our fellow man to mutually agree to change direction and choice in their daily lives. This change, if not understood and consciously embraced, engenders the old fear, which is exactly what we are choosing to move away from. This clarity comes through education of the whole, emphasizing the need for embracing our emotional intelligence found only in love within.

Once humankind understands the dynamic from which it has been operating and clearly knows and connects with the truth already within them, the collaboration needed in adopting the New will be natural. Resistant will naturally melt away for the clarity of the choice for love is made clear.

All this boils down to is providing insight and clarity through a variety of media and bringing forth a collective effort of likeminded leadership the world over. It all starts with a plan that all people can see and understand as practical, loving, and considerate of everyone's needs—providing first for family and then gently extending its influence to their greater communities.

The primary intent at the bottom line is preventing what we might call the buggy-whip syndrome—or the prevention of fear's most sinister weapon, resistance to change: the fear survival. This syndrome is real and the primary challenge of the New Earth Realized plan implementation. Its denial circumvents success and all but ensures failure, as it circumvents the movement of change by the stifling it. It is a syndrome of man's ego, a fear-based mentality, which interprets change as a threat to the family's survival. If not mindfully considered in every step of implementation, and not prevented and minimized from the very beginning, consideration of change will meet its blinding resistance.

The clearer reasoning for why we call man's fear-of-survival mentality the 'buggy-whip syndrome' is easily seen in the buggy-whip industry's story. This story has been forever repeating itself throughout time, any time step-change accrues or innovation happens in the world. It shows us a clear example of how fear of change can easily have such insane resistance, and too help us see how it cleverly has ensured itself being passed from one generation to the next.

Back on October 1, 1908, there was a breakout of this syndrome (the fear of survival) in the buggy-whip industry. It happened directly as a result of Ford Motor rolling out its first Model T horseless carriage off the assembly line. While the world celebrated with intrigue and fascination, the buggy whip manufacturing industry, as small as it was, went into total panic. From the receptionists to the shipping clerks, fear of their family's survival went to a fever pitch. Fear took them into questioning how they would feed their families when buggy whips were no longer needed. How would they pay for their children's education? How would they buy the house they long dreamed of having? In the days and weeks to follow, they realized 'horseless' would not be an overnight challenge to their livelihood; nevertheless, the threat begetting fear they felt was real to them, albeit only mistaken imagination.

So through this simply story, we can now imagine why they clearly fought change and clearly, they fought it from good reason. We can now see why many wonderful innovations and ideas die due to this underlying syndrome or fears of survival—a syndrome most deny even exist.

Is this syndrome alive today? Most certainly and it is well financed. It is shrouded or cloaked as a wolf in sheep's clothing, called lobbying, advocacy, special interest and the primary driver today behind all politics. Most will deny that such a mentality causes major stagnation, but in most all cases, they don't see that at their roots, the *fear of survival* is their primary motivation. It is stifling innovation at every level imaginable, from free energy to the cure for cancers. Moreover, it is this very syndrome that has polarized society, polarized leaders the world over... even the ones who claim to support of a new way of being. It the primary reason war persist, for how will folks 'feed their families' if no one is buying the buggy-whips of defense?

This syndrome alone justifies the need for education and addresses why it is our predominant investment.

Supporting Local Frameworks of Implementation: As articulated throughout this document, New Earth Realized comes through a new framework with love being its singular foundation. Structure comes into formation on a local level in the form of sensitivity to local needs, cultures, and traditions. The five new framework systems in which New Earth Realized will be implemented is through teams of likeminded visionaries at the local level. It is here where vision becomes practical reality, for it is here where the new *is experienced*. Through these experiences of the new the buggy-whip syndrome of fear's resistant is naturalized.

In many cases, much of the local structures may already be in place or beginning to be established. Our connection will simply assist in expanding this, assisting in fertilizing the soils for enhanced outcomes so that the full weight of love's empowerment is realized. To move ahead quickly, game changers and key influences will be brought together to educate, mentor, collaborate with, ultimately providing, guiding, and coaching those willing into the New Earth way of thinking.

This process of investment recognizes and honors the current mass efforts of good being done throughout local communities, from churches and multiple numbers of non-profit agencies. Our aim

now is to shift everyone's foundation by removing the fear and teaching them through New Earth Realized principles.

Regardless of the current conditions, deploying change implementation will take many forms. From providing funds to paint school buses with signage, "Talent Discovery Schooling" to bringing together industry for the implementation of JETTI Training Malls. Implementation is all about bringing forth 'evidence' and substantiation of the New and about building the models to bring forth our new vision and demonstrate that change is real and sustainable. It is the beginning step, the first ten dominos that will create momentum and excitement the world over. It is the demonstration and documentation of love in action, our vision in action, our mission implementation.

Facilities, Administration Investment: This investment provides for the administration and facilitation of project and investment reporting and documentation. It provides for administration of finance and accounting, project management and transparency of communication at every level. Each will be transparent... which means each office and meeting room is easily accessed and observed from the internet. In essence, it will be a high definition reality show of the process where the New Earth Being Realized is orchestrated live and in living color!

The guidance is that we have operating facilities on each of the five continents: Africa, Asia, Europe, North America and South America. Each is to be run or administrated by an elected Board of Directors and guided by a supporting Advisory Board of regional talents who are committed to the fulfillment of the global vision.

Each center will be set up as a training facility; a means of schooling or providing a foundation of teachings for those who are moved to learn the deeper meanings and expressions of love practiced and lived daily. Each will become a center for this new awareness, this all-encompassing way of being.

The vision here is about 'practicality', not grandiosity. It is about living the message and sharing it with others. It is inclusive, not exclusive. It will help others release the fears of old and embrace the love of new. It is real and ensures that the old paradigms are prevented from tainting the New.

The investment will bring about a team of visionaries who have no other agenda but to fulfill and accomplish the mission!

Seeding, Implementation Investment Fund: These investment funds aim to push forward the first of each system's domino train of change. They are the funds for proving the practicality of the vision and create working structures at a local level on each continent as well as global implementation work dealing with what will be needed.

Sharing The Vision: Sharing the principles of this vision with others is the heartbeat and cornerstone of empowering implementation. Love will have its way as we embrace it, extend it and see it moving into the awareness of all.

Love is the one thing we are all mutually agree upon to give more of, and when we do, we make a statement of belief in our fellows until they believe in themselves. This is empowerment, the movement of love.

This belief, and movement thereof, is cornerstone to fulfilling our mission, for it is the talents of love expressed in a meridian of positive ways that is needed—and they are already here, within each of us!

The Promises of Change

The promises of change are fulfilled in the experience of love. Each system that is changing will demonstrate that love was always here and simply hidden from our awareness by various veils of fear. Soon, through our collective efforts hunger will disappear and the need to survive will simply wash away in the tide of love's expressions.

As people seek their passions and their avocations, crime and selfish interests will dry up. Investment in our prisons will be redirected to our schools. Innovation will become the news of focus and the wellspring of entertainment. Talent discovery will be sought beyond voice and dance; it will become the adventure of curiosity across all expressions of life.

There will be full exploration of our birthright where the Creator's Love will be explored in ways never before imagined. Love will soon become a field of formal study as its energetic intelligence is embraced and clearly recognized. Such study will change the face and focus of science forever.

Love's clarity will soon become a natural way of life where once assumption and ambiance caused great doubt. Soon, people the world over will see its wisdom and power, for they will have experienced its greater meaning in their hearts. They will have experienced that love was here all along and that the only things that blocked it from our awareness was our insistence of being in control.

Work weeks will soon only be enough for all to make their mark on the world, providing more time for leisure and family. Nature and all its love of humanity will follow in the footsteps of this great change, for all who see no other choice will soon see respect moving in all living things.

As humanity learns the totality of love's infinite and all-encompassing nature, we will have witnessed the experience of a planet transformed. We will have realized a New Earth birthed in the mind of love as we will see that God is Love and Truth.

Thank you for reading and for being the Love that You Are!

Together, We Are The Answer! TAG, YOUR IT!

On Behalf of the New Earth Realized Implementation Team,

We Are TAG (Two Are Gathered)... Joined As One Mind In God!

Afterword

From Where The Plan Came:

This plan is an idea in the Mind of God. It is His plan, a gift given, an opportunity, a New Choice for humanity. It is a movement of consciousness, the Consciousness of All Encompassing Love.

Through the simple persistent willingness to know it, being curious about its implementation, it was given and received by His son, Christos; yet written on the hearts of all His children in the form of pure inspiration, where the willingness to step into the New of God is embraced and received. Thus, all the more that is needed for implementation directly in and for each country, culture, is already written on the hearts of every fellow human being. We need only follow the desires of our hearts and the mind is certain to follow.

Our sacred journey now comes into completion. Ask, and it is done unto you, for it is already given to anyone willing to be and receive the more that God is Being. The Great Awakening is upon us, the Golden Age is in our hands to embrace, and move into, To Be, in the mastery and certainty of Love.

Budgetary Planning, Funding, Resources for Implementation:

A budgetary plan was given in love and now included under separate cover and available for all to see. Everything that is needed is held in sacred trust by the families in God's found throughout humanity, given to their care in wait of humanity's readiness.

Additional frameworks of guidance are available to those given to bring forth the multitude of tangible technologies; including, but not limited to, new education in all its forms, from grade school to new entertainment media, conscious-awareness training, new health and wellness systems and centers, advanced manufacturing technologies, sustainable housing, and all forms of conscious ideas given to compliments the plan's unfoldment. All this New are of God's ideas, all given to compliment His plan for implementation.

Others will appear as well, to meet the need of the moment; so we need only remain open and receptive to those things, complimentary processes, and systems needed... that will add harmony, in a most gentle and loving way. All will unfold in a way that compliments 'the whole' of the plan's totality. Inner guidance streams continuously to those who are listening, given in those moments where most appropriate, all complimenting the implementation plans of The Father, God Force, The Loving Intelligence of the Universe. All is given without limit, for all is in *The Oneness of It All*.
