

## Jiangxi University of TCM (MBBS Prospectus 2011-2012)

Prospectus (2011-2012)

# Message from the International Students

## Admissions Coordinator (Dr. Aqeel Ahmed)

“Thank you for taking an interest in studying Medicine at Jiangxi University. I should like to draw to your attention the distinctive nature of our courses in Medicine which have an emphasis on the medical sciences that underpin medical training.”

Our courses are suited to students with a strong interest in, and aptitude for, biomedical science. Our aim is to produce doctors who have a scientific approach and an ability to relate sympathetically to patients and their families or friends. Whether you choose the four-year course for experimental science graduates, or the standard MBBS course, we aim to provide you with a sound basis for life-long learning by encouraging critical thinking and scientific enquiry. We provide an environment in which bioscience and clinical research are actively pursued at the highest level thus helping students develop their interest in academic Medicine or medical science. We are committed to selecting medical students solely on the basis of their aptitude for Medicine and medical sciences, irrespective of their ethnic or social origin, religion or sex. If you are interested in the medical sciences, care for patients and their families and wish to study Medicine, I hope that you will seriously consider coming to Jiangxi University. I think you would enjoy studying and living in Jiangxi University.

### Who's a good doctor?

1. Communicates well.
2. Empathizes with patients.
3. Exercises sound clinical judgment.

But a doctor should also understand the basic mechanisms of disease, be able to test hypotheses and show curiosity and a capacity for self-directed learning. Our courses reinforce these scientific principles and a Jiangxi University doctor is trained to be a good scientist as well as a good clinician and a clear thinker.

***“People in high life are hardened the wants and distresses of mankind as surgeons are to their bodily pains.” (G. K. Chesterton)***

# Jiangxi University of TCM

## School of Medicine (Brief Introduction)

**Jiangxi University of TCM (JUTCM)** trains physicians, surgeons, dentists, nurses, biomedical researchers, physical therapists, illustrators and many other health care professionals in its institutes of Preventive Medicine, Health Sciences, Dentistry, Graduate Studies, Nursing and Center for Behavioral Neuroscience. **JUTCM** has 7 affiliated and 8 teaching hospitals. **MBBS (Bachelor of Medicine, Bachelor of Surgery)**, **BDS (Bachelor of Dental Surgery)** and various other undergraduate and graduate programs are taught in English. The **JUTCM MBBS** is a six-year undergraduate degree. It is an interdisciplinary course, combining biomedical sciences and clinical skills training. The medical curriculum provides an interdisciplinary program, organized to provide integration of structure and function within the biomedical sciences. It presents a continually expanding level of medical experience, starting in the first semester of the course. In the first year, the basic medical sciences are taught in the context of their relevance to patient care. Later in the course, clinical teaching builds upon and reinforces this strong scientific foundation.

The **MBBS** 6-year programme in Medicine is designed to equip you with a fundamental knowledge and understanding of medicine, and to develop the skills and attitudes you need in order to apply that knowledge in practice. It is essential for doctors to be able to relate well to their patients and demonstrate empathy and respect for them. The programme therefore places considerable emphasis on developing your expertise in a whole range of practical areas, including clinical, communication, observation, teamwork and management skills.

## What courses are on offer?

### M.B.B.S (Bachelor of Medicine and Bachelor of Surgery)

- Duration: 6 years including 1 year of internship

### Who is eligible to apply?

- Those who have 10+2, A-Levels, FSc, HSSC, WAEC or Equivalent qualification.
- These must include Chemistry AND Biology AND/OR Mathematics AND/OR Physics

## While selecting candidates we look for:

### Personal characteristics: suitability to Medicine

- Empathy: ability and willingness to imagine the feelings of others and understand the reasons for the views of others
- Motivation: a reasonably well-informed and strong desire to practice Medicine
- Communication: ability to make knowledge and ideas clear using language appropriate to the audience
- Honesty and integrity
- Ethical awareness
- Other: ability to work with others, capacity for sustained and intense work

### Academic Potential

- **Problem-solving:** critical thinking, analytical approach
- **Intellectual curiosity:** keenness to understand the reason for observations; depth; tendency to look for meaning; enthusiasm and curiosity in science
- **Communication skills:** willingness and ability to express clearly and effectively; ability to listen; compatibility with tutorial format

### Fitness to practice

This is a matter in which health and conduct, and not simply academic standing are relevant. The Medical School accordingly has procedures for removing individuals from the Register of Medical Students on non-academic grounds.

# Fees, funding and expenses

We realize that finance is an important consideration in making decisions about applying to university.

M.B.B.S six year course						
	Tuition	Accommodation	Registration	Miscellaneous	Program Development Fee	Application & Jw202 Fee (Paid to Admission office)
Year 1	2500 US\$	630 US\$	58 US\$	430 US\$	1200 US\$	500 US\$
Year 2	2500 US\$	630 US\$	58 US\$	46 US\$	Nil	Nil
Year 3	2500 US\$	630 US\$	58 US\$	200 US\$	Nil	Nil
Year 4	2500 US\$	630 US\$	58 US\$	46 US\$	Nil	Nil
Year 5	2500 US\$	630 US\$	58 US\$	46 US\$	Nil	Nil
Year 6			116US\$	Nil	Nil	Nil

## Expenses

In addition to above mentioned fees, students need to budget for living expenses including food, books and travel. Candidates are advised to check for up-to-date information posted to the University's web-pages on student finance and guidance for international students. During the clinical stages of the course, students may be expected to pay towards some travel costs incurred when travelling between sites for clinical course attachments.
