Kharkiv is a major cultural, scientific, educational, transport and industrial center of Ukraine,

Kharkiv with 60 scientific institutes, 30 establishments of higher education, 6 museums, 7 theatres and 80 libraries. Which are more compared to other cities of Ukraine

There are hundreds of industrial companies in the city

Climate: Moderate, The seasonal average temperatures are not too cold in winter, not too hot in summer: $-4.6\text{ }^{\circ}\text{C}$ ($23.7\text{ }^{\circ}\text{F}$) in January, and $+21.3\text{ }^{\circ}\text{C}$ ($70.34\text{ }^{\circ}\text{F}$) in July

Transport: Kharkov is one of the largest transportation center in Ukraine, which is connected to numerous cities of the world by air, rail and road traffic. The city has many transportation methods, including: public transport, Metro Train, taxis, railways, and air traffic.

Kharkiv is well planned and well-structured city of the Ukraine, where all latest technology and the facilities are easy accessible to the common people.

Kharkov having more foreigners compare to other cities like Indians, Americans, Africans, Pakistani & gulf countries etc.

Kharkov is free from racial and communal problems
All the major libraries are available in Kharkov.

Due to more number of foreign nationals highly secured and well maintained city of Ukraine

About University

who founded their own clinics abroad. Within the period of their studies the students undergo academic training in main medical specialties. They take part in examinations of patients, giving urgent aid, work at X-ray rooms, clinical and biochemical laboratories. Particular attention is paid to clinical rounds of patients, their management, filling in and arrangement of case histories with their subsequent analysis. Clinical and theoretical training of the students is performed at 56 departments of the University and the best clinics of Kharkiv with use of modern medical diagnostic and therapeutically equipment, computed provision of the academic process, a wide use of audio and video aids.

Historically, Kharkiv National Medical University (KNMU) was the first higher medical educational institution in Ukraine. It was founded as the medical faculty of Kharkiv

- In 1920, the Medical Faculty was united with the Women's Medical Institute, and Kharkiv Medical Academy was organized.
- In 1921, the Academy was renamed as Kharkiv Medical Institute.
- In 1994, the Institute served as a base for establishing Kharkov state Medical University.
- In 2007 Kharkiv state Medical University was renamed as Kharkiv National Medical University

Since 1951 the University has been training specialists for foreign countries of the Eastern Europe, China, Mongolia, and since 1961 students from the countries of Asia, Africa, and Latin America have been studying here.

Now, 1900 foreign citizens study at KNMU at the Medical and Dentistry Faculties, at the clinical postgraduate course. More than 3,600 specialists from 86 states of Europe, Asia, Africa, Latin America, and Middle East have graduated from KNMU since 1951.

Among them 12 Doctors and 90 Candidates of Medical Sciences, about 200 postgraduates. The languages of instruction for foreign students are Russian and English. KNMU has become an important center for international students who need expert teaching in learning.

KHARKIV NATIONAL MEDICAL UNIVERSITY has passed a glorious historical way from a faculty to a higher school, which trains both high-skilled doctors, pedagogical and scientific personnel for medicine. The Kharkiv medical school has been known outside the country.

- 1951 – The University was among the first higher schools, which began training medical personnel for different countries of the world.
- 1996 – Admission of students for the English medium training began.
- 2010 – The work of the Preparatory Department for foreign citizens was resumed; a specialized Reading hall began its functioning.

The University has trained 4237 doctors from 86 countries of the world. Of them, there are 3 Doctors of Science and 70 Candidates of Medical Science, more than 200 residents. At present, 2500 international students, probationers, residents and postgraduates from 72 countries of the world study at the University.

Medicine Faculty

The Medical course at the Kharkiv National Medical University (KNMU) takes six years and leads to MD (Doctor of Medicine) or MBBS. In the under graduate program, during six years of study the students learn different subjects from fundamental subjects disciplines to special medical subjects. This is an exciting time in medicine as we look forward to developing new avenues in health care excellence. The practice of medicine remains one of the most requested of all professions and we believe that the Kharkiv National Medical University (KNMU) is a perfect place to acquire medical knowledge and gain the degree. We believe students are enrolling in Kharkiv National Medical University (KNMU) for the right reasons – they want to provide care for people and they feel that as physicians they can make a difference in their communities. For that reason, we have great faith that there is a bright future for health care.

The Kharkiv National Medical University (KNMU) is known nationally for its many innovative teaching, clinical training and research programs. Our award-winning faculty members constantly strive for innovation and excellence in the classroom, the laboratory and the clinic. Because the class size is relatively small, our faculty

members get to know each student. It is one thing to say the University has terrific people and programs and another to prove it.

Admission to the medical faculty takes place after signing a contract. Foreigners study in group of seven eight students. The second year students attend their clinical studies where they can gain experience in nursing the patients. Clinical subjects are taught beginning from the third year of study. Students can study any topic of interest and to rise their of knowledge in the departments. All six years of the program are important and all must be passed successfully before students are permitted to graduate.

The medium of instruction in the Medical faculty is English and Russian language. The Ministry of education and Ministry of Public health Ukraine approved the curriculum of the medical faculty of Kharkiv National Medical University (KNMU). Most of the countries accept the Kharkiv National Medical University's (KNMU) diploma.

The state final examinations on all the disciplines according to the syllabus are held within one system through 2 stages:

1. Testing practical proficiency of final-year students (when exams on clinical disciplines are taken, testing takes place at the patient's bed)
2. Testing scientific/theoretical proficiency.

The successful students who will complete study of five years, then on graduation work for another year under probation in order to gain general registration. There is a wide range of specialization available in the public and private sectors, involving research, academic medicine, public health, clinical medicine and other areas. Specialties include Cardiology, Oncology, Pediatrics, Psychological Medicine, Surgery, Pathology, Public Health, General Practice and many others. Most doctors complete postgraduate training in their chosen specialty.

Education System

The Ministry of Education and Science of Ukraine provides and guarantees the quality of education of international students studying in Ukraine. International students obtain state-registered degree at Higher Educational Establishments which are officially licensed by the Ministry of Education and Science of Ukraine. In such manner various universities, academies and institutes are not only accredited, but also licensed to organize higher education for international students.

International students wishing to study in English medium may get admissions at once to the first course through coordinating companies, which also must be licensed by the Ministry of Education and Science. Those applicants who decide to study in Russian medium must start with the language course (foundation year). The language course primarily contains Russian language classes and disciplines related to the future specialty.

Kharkov National Medical University is recognized by the World Health Organization (W.H.O), U.S. Education Department, General Council of Medicine and Medical Council of India. After obtaining Degree of Kharkov National Medical University, the students are eligible for applying in United States Medical Licensing Examination (USMLE) and The Professional Linguistic Assessment Board (PLAB) of the United Kingdom (UK).

Hostel

Accommodation

Kharkiv National Medical University has a very good hostel system with fully furnished rooms, quite study environment and surrounded with recreation center.

For the convenience of the students, they can choose their roommates; they can stay together if they belong to same city if they want, They can change the room if they needed

There are several accommodation options for international students and it is important to consider whether you prefer an independent lifestyle or enjoy living in a community.

Combine the convenience of living on or near campus, access to programs and services to help you excel academically, the opportunity to build lasting friendships, and comfortable, affordable living and you have the life of a University. The territory of the University and the main students' routes from the hostels to the educational buildings are protected and patrolled by officers of guard service.

All rooms in hostels are provided with internet facility.

Rooms on campus are available to students. All hostel rooms are furnished and vary in size and number of conveniences. Dormitory rooms at hostel can accommodate 2 or 3 students to a room.

All rooms are equipped with bed, mattress, pillow, blanket, desk, chair, heating, water system and suitable lighting for both study and relaxation. There are common areas where

students can play and mingle. Upon the students arrival on campus, specific accommodations are assigned and after a satisfactory health report the student will be accommodated to the room which is allotted to him.

Off campus housing can be obtained in nearby apartments. Available apartments and houses are furnished, and vary in size, cost and number of conveniences. Life in Kharkov is friendly and devoid rush. While at first some students may miss their home environment, native foods, or a hurried pace, they soon learn to appreciate and enjoy a cultural different their own.

All the rooms are provided with heaters. Our hostels feature 24-hour access to security and emergency services, making it easy to get assistance when you need it. As a campus resident, you also have access to all support services such

as campus Security Services, counseling Services and health Services.

If you take a University room, we'll ask you to follow our basic regulations. These are to ensure that everyone can live together happily and safely, so include such things as no noise after 11pm and showing consideration for others

Accommodation for the foreign students is provided by typical student hostels rated at 2,422 lodgers. Hostel fees depend upon the size of the dwelling space. This accommodation is available all the year round and for the whole period of training. But foreign students prefer rented flat/accommodation.

Mess

University has its own mess system, where Indian food is available, veg and non-veg meals available to choose for the students.

Each Hostel has a separate kitchen provided for students to cook food to their own taste. Students will need to supply their own kitchen utensils. Meals may be bought from various food outlets.

All types of vegetables, grains, pulses and fruits are available all around the year
Indian cooks are generally Panjabi and south Indian
They prepare delicious dishes every day,

Mess managed by Indians only, so all care are taken to provide best foods. Students can feel like home made dishes

V.N karazin & KNMU has join mess, it is one of the best mess in all the universities in the Ukraine and Russia
