[1] Infant mental health services that meet Level III specialized work criteria are provided by professionals whose role includes intervention or treatment of the infant/toddler's primary caregiving relationship, (i.e., biological, foster, or adoptive parent); these experiences are critical to the development of a specialization in infant mental health. Infant Family Specialist, Level II is broader and includes practitioners whose work experiences come solely from programs that provide education/support/consultation to infant & early childhood care providers or whose intent is primarily to educate parents.
