Tattoo Care sheet

- * Remove bandage in one or more hours. If bandage sticks, apply cool water and gently remove.
- * Keep clean in your shower with **mild soap and water**. Air or pat dry.
- * Apply a small amount of **mild lotion** a couple of times a day. If rash occurs discontinue use. Consult a physician, if rash continues.
- * In a few days your tattoo will begin to peel like a sunburn. **Do not pick** or scratch at the tattoo. Colored flakes are normal.
- * **No excessive sun, water, or wind.** Including, swimming pools, hot tubs, and saunas.
- * Use common sense with these instructions and your tattoo will heal in about **10 days to 2 weeks**.
