

Research Camp

for middle
and high school
students

Every June
at the Department of Biology

Little Rock, Arkansas, USA

The *BioNanoTox* Camp is an interactive learning forum where middle and high students have opportunities to experience the importance of research and education combined in a synergistic manner. The program consists of lectures, discussion groups, experimentation guidance and individual research experience in Biology, Nanotechnology, Toxicology and their applications for Environmental Sciences, Agriculture, Pharmaceutical Sciences, and Medicine.

Monday through Friday, students will work with their assigned faculty and research assistants in the laboratory, and in addition, will be attending lectures.

Important dates:

April 1st Early registration start
June 1st Registration closed

The potential projects assigned to students span over a broad range of topics under the guidance of faculty and research assistants

Presentation opportunities!

The links between nature and world of scientific applications offers students a learning environment in which they can be exposed to essential modern research tools, prepare themselves for National Competitions, for College and University, as well as for prospective employment.
