

CHECKLIST FOR NEW/UPDATED WEBSITES *(Cont. Pg 2)*

**FYI** The number of web pages is not necessarily the same as the number of Page Headings or Navigational Bars. This depends on how many linking/hidden pages you require. Example: If we link to another page in your site that is not a Page Heading, such as linking for further details, or if we link to a PDF file, a form for your customer to print. You would count the linking pages or files as an additional web page. Linking within the Heading pages is not an additional page.

13. List your Page Heading Titles: *(These can be changed, it just give us an idea of what you might want.)*
