WHITES ELECTRONICS1972

White's Electronics, Inc., manufacturers of the world's finest line of mineral-metal detectors, is proud to present the Goldmaster BF-8. Some twenty-five years of design and manufacturing experience have brought about the development of what we, at White's feel is the finest, most effective underwater BFO metal detector money can buy Demands for such a piece of equipment range from industrial salvage to treasure hunting. The BF-8 is so designed that, with various options available, it can be adapted to almost any need within a diver's range.

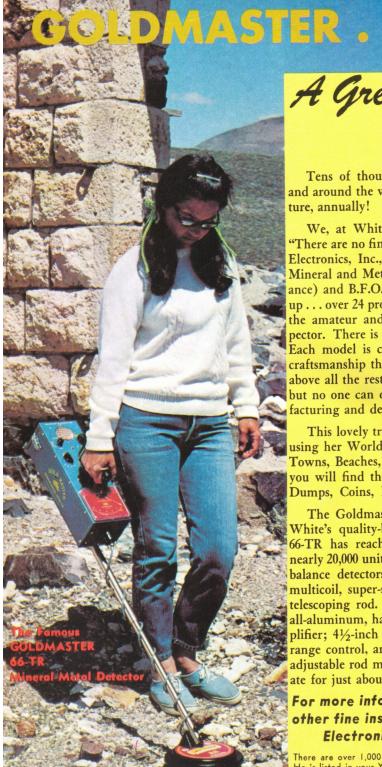

The BF-8 Standard comes with batteries, ready to operate, and a standard 8-inch plexiglass loop. The injection molded case is durable and can withstand pressures beyond normal diving depth. In addition with the externa speaker for clear, audible signal underwater, this unit sells for just \$199.50.

For more information on White's underwater equipment and accessories, plus their complete line of mineral-metal detectors, see your local dealer—he is in the Yellow Pages under "Metal Locating Equipment"—prices ranging as low as \$49.50 and up. Or, contact one of the three factory locations nearest you. Write, Room #504

For information on how you can become a White's Dealer, write to:

THERE ARE NO FINER INSTRUMENTS MADE AT ANY PRICE

A Great Step to Adventure!

Tens of thousands of satisfied customers—coast-to-coast and around the world—take the Goldmaster Step to Adventure, annually!

We, at White's Electronics, Inc., join them in saying, "There are no finer instruments made, at any price." White's Electronics, Inc., manufactures the world's largest line of Mineral and Metal Detectors, in both TR (Inductance Balance) and B.F.O. (Beat Frequency). Priced as low as \$79.50 up... over 24 production models to choose from ... for both the amateur and the professional treasure hunter or prospector. There is a model designed and priced for everyone. Each model is constructed with the same high quality of craftsmanship that has made the name "White's" stand out above all the rest. Imitation is the greatest form of flattery, but no one can duplicate our more than 25 years of manufacturing and design experience.

This lovely treasure hunter in the Candelaria, Nevada, is using her World Famous Goldmaster 66-TR. Parks, Ghost Towns, Beaches, Playgrounds—wherever people assemble—you will find the White's Treasure Hunter locating Bottle Dumps, Coins, Rings, Jewelry—lost and hidden treasure.

The Goldmaster 66-TR is just one of the long line of White's quality-built, super-sensitive metal detectors. The 66-TR has reached a milestone in metal detector sales—nearly 20,000 units. This, one of the most popular inductance balance detectors, is modestly priced. It comes with two multicoil, super-sensitive loops; 6-inch and 10½-inch, with telescoping rod. The 66-TR is quality-constructed with an all-aluminum, hammertone finish case; built-in speaker amplifier; 4½-inch sensitivity meter; battery check; 4-position range control, and power switch. An easy-grip handle and adjustable rod make this unit comfortable and easy to operate for just about anyone—men, women or children.

For more information on this and any one of the other fine instruments manufactured by White's Electronics, Inc., see your local dealer.

There are over 1,000 to serve you throughout the United States and Canada. He is listed in your Yellow Pages under "Metal Locating Equipment"; or write and stop in at any one of the three factory locations:

Sometime back, White's received a newspaper clipping accompanied by a letter, from one of our Little Rock, Arkansas customers. The article read; "Would You Have Thought It Possible?" This customer had located a high school class ring with his Goldmaster 66TR and returned it to its owner who lost it in 1953. The article goes on and relates even another find. In 1969, while using their 66TR, this family of treasure hunters located a lidded fruit jar several feet down, it contained the deed to the wife's father's section of land near Angora, Nebraska, silver dollars, various other coins (one dating 1817) \$19,000 in series E war bonds. The total value of their find was an estimated \$87,000. It goes without saying, they are among our satisfied customers. In fact, they try to visit our plant in Sweet Home at least once a year.

This story is just one of the many Americana successes, which appear in White's newsletter, DISCOVER, published 6 times a year. The paper is composed of stories and articles furnished us by our customers and readers throughout the United States and Canada. See your local dealer about how you can receive this paper absolutely free. While vou are there, ask how you can become the proud owner of one of the White's super-sensitive Mineral / Metal Detectors. White's Instruments are priced as low as \$79.50 and up. Pictured above is the world-famous Goldmaster 66TR. Being just one of the twenty-some production models, it alone has been selected over the past three years, by over 18,000 satisfied customers. With nearly a quarter of a century of design and manufacturing experience in the metal detector field, White's Electronics, Inc. manufactures

the world's largest line of quality-built Mineral/Metal Detectors.

The Goldmaster 66TR is a transmitter-receiver (inductance balance) system. This unit has a built-in amplifier speaker, single vernier knob control, 4 position range control, volume control and battery check. The 4½ inch meter gives you a visual indication, in addition to the audio signal. The all-aluminum construction, in conjunction with the two vacuum formed ABS multicoil loops, add to the over-all quality, performance and durability of this instrument.

For more information and a free demonstration, see one of our more than 1200 dealers throughout the United States and Canada or stop by one of the factory locations listed below. Or write. (dealer inquiries welcome)

Remember, at White's we just can't leave well enough alone—We always keep making them better.

"It was so dirty and dull, I just didn't know what I had," reports Merle Easley of Missouri, owner of a White's detector, after he experienced a treasure hunter's dream... finding a Continental dollar worth \$12,000!!!

All the excitement of true treasure hunting can be yours, too, with a world-famous metal detector from White's. Let the industry's leader in quality instruments get you started on your way to "recovering a piece of America" with an instrument from the world's most powerful line of mineral/metal detectors!

There's treasure waiting for you...

EAGLE® Spectrum® Nothing else even comes close.

It's truly the ultimate combination of simplicity and potential. Spectrum is the detector that *matches* your level of experience and expertise.

From beginner to pro, the common sense menu makes Spectrum *just plain fun* in the field. With the Preset Programs, you're off and hunting right out of the box. They offer great performance - with absolutely no fuss. And no need to read the manual!

With a little experience, move onto the 9 Basic Adjustments. Here, you can modify a Preset Program to create your own custom program. If you choose, explore the 20 Pro Options and "engineer" the Spectrum to your exact hunting needs. Virtually everything can be fine-tuned to your requirements. At every step, adjustments are simple to make, and simple to store.

What about Spectrum's performance? Quite simply, it's *awesome*. Spectrum is the industry standard. No matter what detector you've hunted with before, go back to your favorite spots. Chances are, Spectrum's sensitivity and depth will reward you with new treasures. Treasures that are beyond the reach of any other detector.

Spectrum's depth gives you a new *layer* of hunting. A layer the others never knew existed!

White's is very proud of our Eagle Spectrum. And so are our customers. Spectrum users write us of older, deeper finds in "worked out" areas. The other recurring theme? Ease of use. Mark Kilgore of Colorado put it simply with his entry into our "Dreams Come True" contest. Why would he like to own a Spectrum? "For the *Quality*. For the *Best*. For the *Adventure*."

Whether you're just getting started, or thinking of upgrading, go see a Spectrum at your nearest White's dealer. We think you'll agree ...

Nothing else even comes close.

NEW! SpectrumVideo Shortcourse just \$5.00.

Includes rebate coupon for \$10.00 off purchase of a Spectrum!

The new Goldmaster V/sat It's all that it was ... and more.

"I took the new Goldmaster V/sat to an area that had produced some larger nuggets in the past. Hunting a bench on the side of a wash, I picked up a soft, solid signal. Digging an inch or two at a time, I checked the signal. There was no breakup in the sound on the iron I.D.

About 6" down, the ground became very hard and I knew I was in virgin soil that had not been disturbed by the old miners. At 13 3/4 inches, I pulled out a very dirty target, extremely heavy for its size. I knew I had a piece of gold. It weighed in at over 6 ounces.

We hear of larger nuggets being found, but most at shallow depths. Being able to adjust the S.A.T. to the exact setting for the ground and minimize hot rock responses were the reasons I found the nugget at that depth in the heavy mineralized soil."

Chuck Morris, Utah

When White's asked me what prospectors wanted in the next generation of Goldmaster, my first reaction was recalling the adage "If it ain't broke, don't fix it". But I attempted to focus on those functions that could be improved. The result is the new Goldmaster V/s.A.T.

We have chosen to enhance two areas of the GM's performance. The operating threshold, and the speed of the S.A.T. (self-adjusting threshold).

First, the single-turn carbon pot on the Tuner (threshold)
Control has been replaced with a high quality wire-wound
10-turn pot. This gives you the ability to attain a much
smoother threshold resulting in increased sensitivity.

Second, a Variable S.A.T. control was added to increase depth when working in harsh conditions such as extreme iron mineralization or alkali salt flats. This single-turn pot increases the S.A.T. speed gradually from the normal speed to one 50 times faster. Now, you need only the amount of increase necessary to control those extreme ground conditions.

Lastly, White's designed a new 3-piece rod set for a very compact package when you carry your GM into the field.

Jimmy "Sierra" Normandi

Surfmaster. Pl. The hottest detector on the beach - now even better.

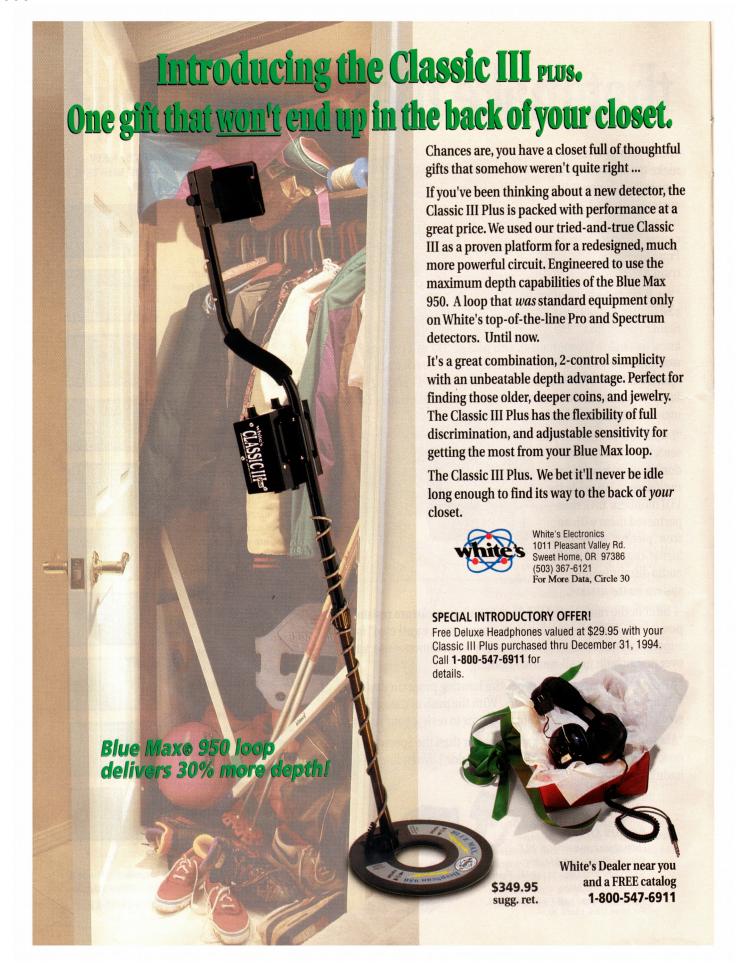

From sea to shining sea, the Surf PI has made quite a splash this past year. The PI's simple operation and ability to "see through" black sand have resulted in unbelievable sensitivity and depth. Translation: Recovery of valuable coins and jewelry other detectors missed or couldn't reach.

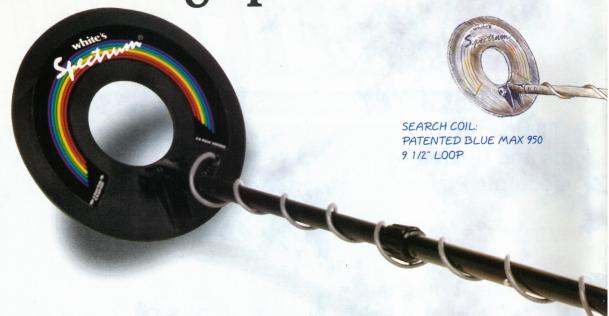

Now, we've built on the PI's proven performance with some commonsense improvements in packaging and user convenience. An all-new case design features one-piece lid with a self-retaining "O" ring for improved water integrity. Two hipmount belt options have been added. Plus, we've waterproofed headphone and loop connectors for easy disconnect. Switching between the zero-buoyant Pulse loop and the accessory non-buoyant Diver loop is now a snap!

White's Electronics, Inc. 1011 Pleasant Valley Rd. Sweet Home, OR 97386 (503) 367-6121

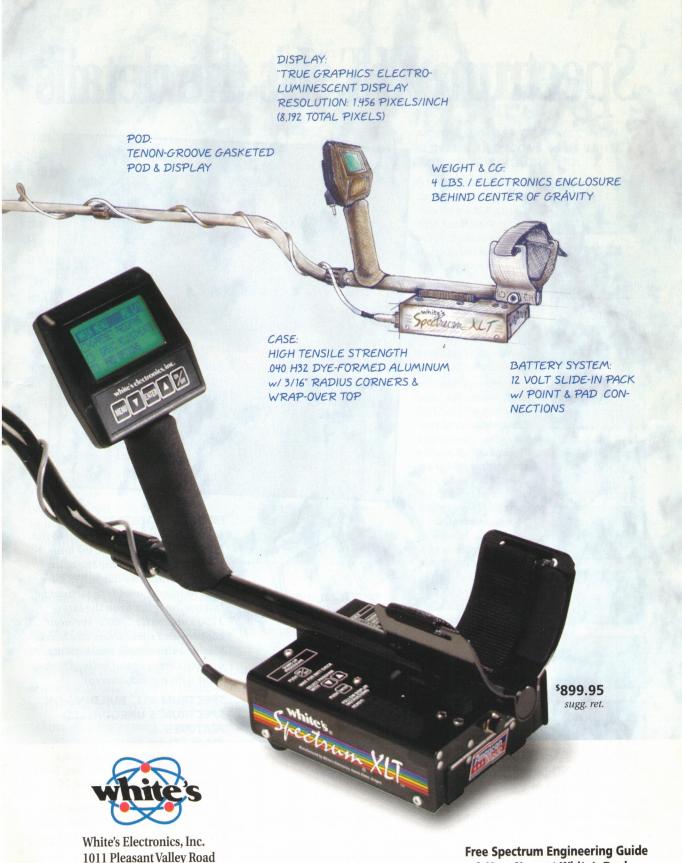

Introducing Spectrum®XIT.

Incredibly Light. Feels even lighter. And that's just the beginning ...

When we sat down to kick around ideas for our next top-of-line detector, we knew we had a tough job. Far and away, Spectrum was one of the most popular, best performing detectors we've ever built. Beginners and pro's alike loved the mix of simplicity and versatility. And *everyone* found treasure. So, with our customers in mind, we went to work. First, on packaging. We didn't stop until we reached an ergonomically balanced design that tips the scales at 4 lbs. That lighter weight made way for a battery system that's better all around. A new pod design allowed even more changes- both inside and out. A larger display window lead to new target *icons*, plus a convenient new layout, and a host of performance enhancements. Take a look ...

ED FEDORY TESTS THE XLT

On a recent relic hunting trip to the backwoods of Vermont, we fourwheeled our way to the site of an early abandoned village. We were able to recover a wide assortment of interesting relics from the late 1700's and early 1800's. Vermont coppers and silver coins, axe heads and primitive tools, musketballs and cast brass crotal bells. A great hunt with a great detector.

SPECTRUM XLT. BUILDING ON SPECTRUM'S UNEQUALLED

- Threshold, Tone Adjust, Audio Disc, Silent Search, Mixed Mode Audio, AC & DC
- Pro Options (including Disc. Editor, Tone I.D., SignaGraph Options, Transmit Power)
- Automatic Ground Balance with Autotrac®
- Trigger Pinpointing
- Adjustable Frequency
- •SignaGraph® bar graph target "signature"
- Drop-in Rechargeable Power Supply

that make the difference.

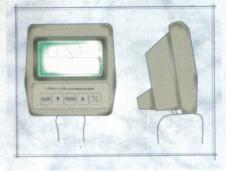

"Don't change it just to make it different. Change it to make it better." Our customers talked, we listened, and we set our course to move forward. From Spectrum to Spectrum XLT.

"Yes, it needs to be smaller and lighter, but performance comes first." We

knew we couldn't compromise. Our goal of XLT at 4 pounds wouldn't mean a thing if the end result couldn't stack up to Spectrum. So we built on the Spectrum's standard - adding a Coin Preset Program, more custom programs, and a multitude of adjustments that enhance depth and sensitivity.

"I want numbers that I can see while I sweep. And I don't want to have to use my glasses." We made the VDI numbers BIG, then partnered them with an icon "picture" of the target, SignaGraph®, and the best audio discrimination system on the market.

"I hunt in the rain. I need a detector that's as moisture resistant as possible." XLT's all-new display is "tenon-groove gasketed" for superior water resistance. And the case is a common sense, wrapover design built for all-weather hunting.

"Give me the ability to view my entire hunting program and all its settings with ease." Now it's yours. With the push of a single pad, scroll through Preset or Custom programs to review your settings.

"Above all, it has to work as good or better than the Spectrum I have now." Were we able to do all this? You wouldn't be reading this if we hadn't. See Spectrum XLT for yourself ...

BONUS OFFER!

For More Data, Circle 30

Protect your investment! XLT WeatherBeater just \$14.95 (plus \$3.00 s/h) thru Dec. 31, 1994. Purple, teal, royal and black. For order info., call 1-800-547-6911.

"I want the ability to scroll through the entire menu with the push of a pad." With Ken White's own words in mind, we kept what worked well, and made improvements from there...

There are more choices than ever before. A new Coins Preset Program, plus, now 4 Custom programs you create, store, and name.

It's easier than ever to make adjustments, too. **Basic and Pro Options** work in the same straightforward way. Adjust target volume, for example, from low to high with the arrow keys, while you listen to the different levels. On/off adjustments like Audio Disc. are even easier. Sweep and watch the display without missing a beat. The target VDI numbers and icons are BIG! SignaGraph's bar graph now has even more key information about whether to dig or not. Pinpointing is more

precise and easier than

You can even customize

you adjust all 8,192 pixels

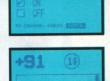

compensates for temperature changes. Completely reverse the screen from dark on light/light on dark,

DEALER INQUIRIES INVITED

Santa may be late ...

He's discovered

5000/D

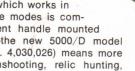

Santa has discovered the all new, lightweight Coinmaster® 5000/D Mineral-Metal Detector with push-button tuning and an all new rechargeable battery pack. So he may

be late! He'll be traveling from coast - to coast, not on his rounds, but treasure and relic hunting, coinshooting and prospect-

ing. He's as delighted as you will be with this all new White's Metal Detector!

The proven push-button tuning which works in both the G.E.B. and Discriminate modes is completely automatic with convenient handle mounted button. Precise and efficient—the new 5000/D model with patented circuit (Patent No. 4,030,026) means more fun with quicker finds in coinshooting, relic hunting, ghost towning and prospecting.

The all new Coinmaster® 5000/D also features RE-CHARGEABLE BATTERY PACK! The latest engineering innovation in circuit advancement from the leading metal detector manufacturer in the industry! This major Coinmaster about achievement has been over two years in development. (9-volt and 12-volt retrofit kits are available for present and past White's models.)

Advanced design also means lighter weight with a new low profile case! The 5000/D also will detect at greater depths in the discriminating mode. Plus it features a higher pitch tone. A metal detector truly suited

for everyone! See your nearest White's dealer today

for a White's Christmas. Phone toll free number listed below.

NOW! NEW! RECHARGEABLE BATTERY PACKS!

(The 5000/D model uses one 12-volt battery pack). Retrofit kits in 9-volt and 12volt battery packs are available for older White's models. See your dealer or contact the factory.

DEPENDABILITY IS A WHITE'S

COINMASTER 6000/D PRICE: \$439.95

The best all around detector on the market! The One Turn Tuner has the ability to select a precise setting without the confusion of a Ten Turn Control. With the Mode Selector Switch, use as a G.E.B. all metal detector, a G.E.B. Discriminator for depth you never thought possible, or a TR-Discriminator and a G.E.B. Maximum for the objects that might be just out of the range of the normal G.E.B. Featured also, an 8" Waterproof Loop, a standard 9 and 12 Volt Rechargeable Battery Pack with Battery Charger. Weight 6 lbs. 13 oz.

U.S. Pat. #4030026, #4128803 and Canadian Pat. #1038036.

COINMASTER 6/DB PRICE: \$369.95

THE most important feature on the 6/DB is the ability to discriminate while rejecting the ground. Compare the features and price of our 6/DB against others! 8" Ultra Wide Scan Waterproof Loop®Extra Fine One Turn Tuner®Three Position Mode Switch, G.E.B., G.E.B. Disc., TR DISC®Single One Turn Ground Control®Volume Control®Power Battery Check Switch®Variable Disc Control (one turn)®Push Button Mode Change and Push Button Tuning®9 & 12 Volt Rechargeable Batteries are optional. Weight: 4 lbs. 13 oz.

U.S. Pat. #4030026, #4128803 and Canadian Pat. #1038036.

COINMASTER 5000/D PRICE: \$269.95

So versatile to use! Switch to G.E.B. Mode, where there is no ground interference when treasure hunting. Use as a conventional 1-TR for prospecting, and if you want to reject ferrous metals and other junk items, just switch to TR Discriminator Mode. Featured is a NEW 8" WATERPROOF LOOP. Touch a pull-tab, foil or bottle cap to the bottom of the loop; no false reading as with almost all other TR loops! The instrument will go completely SILENT! Featured is a single 12 Volt Rechargeable Battery Pack and Charger which come standard, and a Heavy Duty Push Button for automatic tuning. Weight: 4 lbs. 8

U.S. Pat. #4030026, Canadian Pat. #1038036.

YOU HAVE BEEN ASKING FOR IT, AND NOW IT'S HERE! THE NEW...

COINMASTER 6/DB HIPMOUNT

White's has designed a new Hipmount due to the very large demand from customers. Many customers use a detector for long hours and need an exceptionally light weight unit, but still powerful enough for excellent performance at the greatest depths.

Get All the features of the standard 6/DB, plus the versatility of a hip or chest-mounted instrument.

Great for overhead search, brushy areas and around rocks.

The Probe is so maneuverable, it will be exceptionally effective at Treasure Hunts, Prospecting and Coinshooting. Rechargeable batteries and charger come standard with this instrument! A real money saver!

U.S. PATENT #4030026 and #4128803 CANADIAN PATENT #1038036

WEIGHT: 4 lbs. 15 oz.

PRICE: \$399.95

WHITE'S NEW COINMASTER TR *(A.G.C.)
*(AUTOMATIC GROUND CANCELLATION)
Suggested Retail Price Now Offered At \$59.95

This little gem detects both Ferrous and Non-ferrous metals automatically on the same setting, so nothing is missed! Fantastic for Treasure Hunts. It's completely sensitive across the full width of the loop. You have

the loop. You have the full 6 inches searching for you instead of just a small "hot spot" as on other TR models.

ONE CONTROL DOES IT ALL!

DEPTH READING!!!

NEW TECHNOLOGY FOR THE 80'S!

How many times have you dug a deep hole and then found that the coin was only 2" or 3" deep but you were off to the side when you pippointed?

How many times have you scratched a valuable coin because you didn't know how deep to probe?

With all other detectors we know of, the meter pegs "FULL SCALE" on most finds and it makes it difficult to pinpoint with the meter. The new 6000/D SERIES 2 allows pinpointing with the meter on most finds.

COINMASTER® 6000/D SERIES 2

Price: \$499.95

COIN DEPTH METER

Now for the first time a detector that reads the depth of a single coin! (Pat./Pending)

- Expanded meter with a 2½" Battery Test scale for maximum accuracy.
- 4½ " Signal Intensity Meter
- Meter is independent of the tuner setting and only reads when the object is detected!

 Crystal controlled operating frequency (6590 Hz ± 1 Hz)

- Improved slower sweep rate with greater depth in G.E.B. DISC.
- · Lighter weight
- Improved reliability and sensitivity
- Improved stability and back reading capability over the conventional
 4B type loop.

'DEPTH READING'
Pat./Pending

A TRUE ZERO DISCRIMINATION

- New improved expanded DISCRIMINATE RANGE beyond ZERO DISCRIMINATE
- Improved sensitivity on hard to detect nickels and rings while discriminating.

NEW IMPROVED MODE SELECTION

- G.E.B. DISC. requires slower loop sweep rate with greater detection.
- No need to switch MODES for pinpointing in G.E.B. DISC. MODE. THE METER AUTO-MATICALLY READS THE DEPTH OF A COIN IN ALL MODES!
- Smoother operation of G.E.B. MAXIMUM MODE with improve depth in G.E.B. MAX.

DEPTH READING!!!

THE NEW ADVANCED TECHNOLOGY FOR THE 80's FROM WHITE'S!

COINMASTER® 6000/D SERIES 2

Price: \$499.95

An experienced
Treasure Hunter
can usually tell by
the "SIZE OF THE
SOUND" whether the
reading is probably a coin
or not.

If the reading is a coin, the operator can pinpoint the location by using the meter and/or sound and THEN READ THE DEPTH ON THE METER with exceptional accuracy!

A coin will only "Sound Off" over a small sweep area, while a tin can will "Sound Off" over a large sweep area.

Objects that are not coin sized will not read the correct depth since the meter is calibrated for coin sized objects (pennies to silver dollars).

RECHARGEABLE BATTERIES COME STANDARD.

For the past two years customers have been saying "You'll never be able to produce a better instrument than the COINMASTER 6000/D." Well, perhaps not, but we think while the sensational COINMASTER 6000/D has been the finest instrument ever produced, we have made our finest even better yet, with our new SERIES 2!

To locate a DEALER nearest you, call TOLL FREE (1-800/547-6911) (8 to 5 Pacific Standard Time) FACTORY SELLS TO DISTRIBUTORS ONLY

Series 2

NOW A TOTAL LINE OF THE MOST TECHNOLOGICALLY ADVANCED MINERAL/METAL DETECTORS ON THE MARKET TODAY!

You can detect the difference.

Dept. TF 1

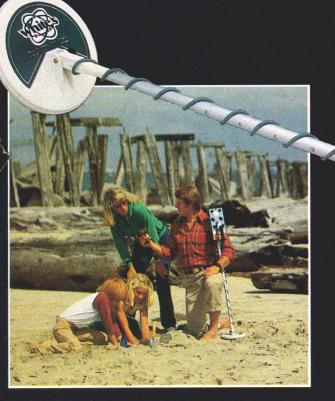

LET US TAKE YOU TO NEW DEPTHS WITH THE COINMASTER® 6000/D SERIES 2

THE COMBINATION OF SOLID STATE, INTEGRATED ANALOG CIRCUITRY WITH PUSH-BUTTON MEMORY TUNING AND MODE CHANGE IN THE HANDLE MAKES THIS INSTRU-MENT THE MOST VERSATILE, DEEPEST DETECTING INSTRUMENT ANYWHERE.

OTHER OUTSTANDING FEATURES ARE:

- DEPTH READING Reads the depth of a single coin on a 4-inch meter.
- DISCRIMINATE ON G.E.B. Rejects the ground while discriminating against junk.
- 8" WIDE SCAN, CONCENTRIC, WATERPROOF, ADJUSTABLE LOOP
- Variable tuner with push-button in handle
- Mode switch with G.E.B. NORM, G.E.B/DISC, TR/ DISC, G.E.B. MAX

- Ground balance control
- Variable discriminate control
- OFF/ON switch with battery check
- Volume control
- Built-in speaker
- ¼" headphone jack
- Easy access battery compartment
- Push-button tuning
- Removable loop and rod for easy storage
- 8-cell AA pack and 6-cell AA pack and rechargeable battery system

WHITE'S COINMASTER 5000/D SERIES 2 IS
LOADED WITH SPECIAL FEATURES FOR THE
CUSTOMER INTERESTED IN A TOP QUALITY
INSTRUMENT AT A REASONABLE PRICE. THIS
SUPERIOR DISCRIMINATOR HAS GROUND
EXCLUSION BALANCE FOR INCREASED DEPTH
DETECTION REGARDLESS OF SOIL CONDITIONS.

IN ADDITION, THE 5000/D SERIES 2 HAS:

- Variable tuner with push-button in handle
- Mode switch with G.E.B. NORM, G.E.B. DISC, TR DISC, G.E.B. MAX
- Ground balance control
- Variable discriminate control
- OFF/ON switch with battery check
- Volume control
- Built in speaker
- 1/4" headphone jack
- Easy access battery compartment
- 3-inch signal intensity meter
- Removable loop and rod for easy storage
- 8-cell AA pack and 6-cell AA pack and rechargeable battery system
- Waterproof, detachable 8-inch swivel loop

THE SENSITIVE CIRCUITRY AND PUSH-BUTTON TUNING OF THE COINMASTER 4000/D SERIES 2 MAKE IT ONE OF WHITE'S FINEST DISCRIMINATOR DETECTORS.

IN ADDITION, THE 4000/D SERIES 2 HAS:

- Variable tuner with push-button in handle
- Mode switch with G.E.B. and TR DISC
- Ground balance control
- Variable discriminate control
- Volume control
- Wider discriminator range
- 1/4" headphone jack
- Easy access battery compartment
- 3-inch signal intensity meter
- Removable loop and rod for easy storage
- Waterproof, detachable 8-inch swivel loop
- Low battery alert

MAKE IT A CLEAN SWEEP WITH VHITE'S HIGH-QUALITY, LOWEST ICED COINMASTER® DETECTORS!

IMPROVED TR DISCRIMINATOR AND INCREASED DEPTH CAPABILITY MAKE THE SENSITIVE 2/DB SERIES 2 AN EXCEPTIONAL INSTRUMENT.

FEATURES INCLUDE:

- Variable tuner with push-button in handle
- Variable discriminate & sensitivity controls.
- Volume control
- Signal intensity meter 1/4" headphone jack
- Waterproof, detachable 8-inch swivel loop
- Low battery alert
- 9-volt heavy duty transistor battery

PUSH-BUTTON TUNING, AND IMPROVED DISCRIMINATOR ARE TWO OF THE MOST IMPOR-TANT FEATURES OF THE EFFICIENT, ECONOMICALLY PRICED 1/DB SERIES 2 MODEL.

OTHER FEATURES INCLUDE:

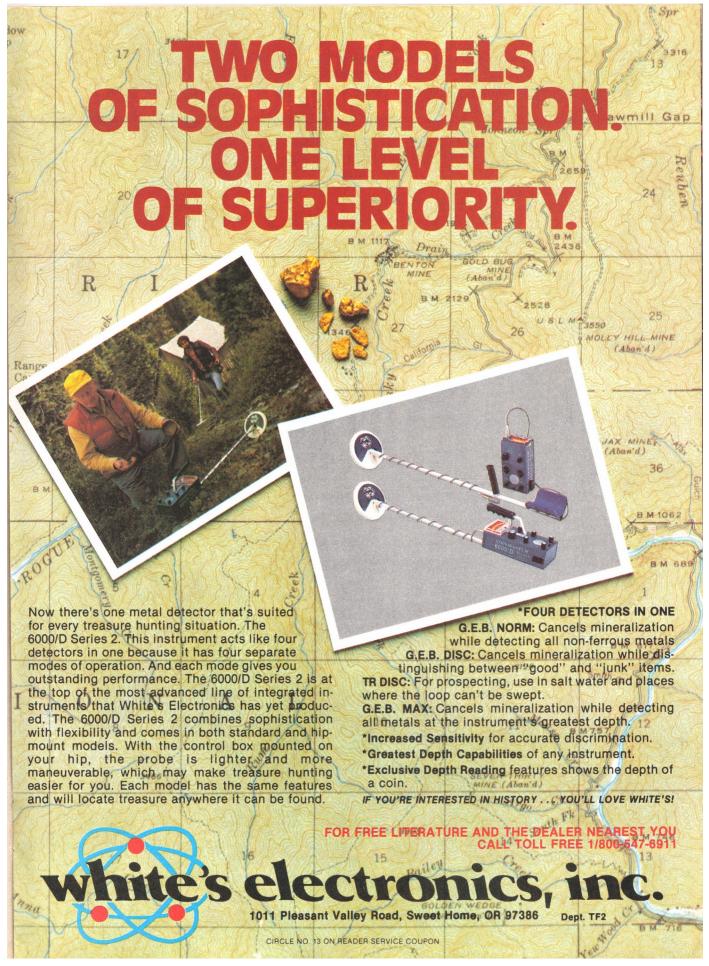

- Variable tuner with push-button in handle
- Variable discriminate control with a wider range to cancel ground mineralization, or discriminate against junk items such as bottle caps & pull tabs.
- Volume control
- 14" headphone jack
- Waterproof and detachable 8-inch swivel loop
- Low battery alert
- 9-volt heavy duty transistor battery

THE LIGHTWEIGHT COINMASTER TR WITH AUTOMATIC GROUND CANCELLATION, COMBINES EASY, ONE-CONTROL OPERATION WITH A 6-INCH SENSITIVE LOOP. IDEAL FOR BEGINNERS, THE FEATURES OF THE TR A.G.C. INCLUDE:

- **Detects all metals**
- 14" headphone jack
- Waterproof 6-inch swivel loop
- Low battery alert 9-volt transistor battery

COINMASTER 5000/D Series 2

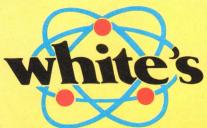

Bill Smith has been a treasure hunter for over sixteen years. During that time, White's Electronics has produced the finest metal detectors on the market. Bill's collection of coins and relics is amaz-

ing proof of White's sophisticated power! He has located enough silver coins to fill three large bank deposit boxes. He has found a great variety of civil war artifacts and many old weapons. The weapons include a 16th century flintlock pistol that was still cocked and loaded! Plus, he has recovered more than enough jewelry to adorn his pretty wife (and TH'ing partner) with true splendor. The trails to treasure have taken him from coast to coast, to foreign lands and even under water. A few narrow escapes and lots of high adventure have excited Bill's life since he picked up a White's metal detector. He is so enthused about White's that he even sells them. This master treasure hunter knows that White's Series 2 line of instruments provides a metal detector that is right for everyone. In each price range, there is nothing better on the market. When TH'ers like Bill Smith want adventure, they use a White's metal detector to find it.

PUSH BUTTON EASE OF OPERATION: Pro-

vides automatic mode changing, switches the meter between VDI and DEPTH READING, and automatically retunes the detector to threshold.

VISUAL DISCRIMINA TION INDICATOR AND DEPTH READING: This

multi-purpose METER

aids in the Visual Indi-cation of all targets, re-

gardless of the mode! One or two sweeps and

the target is locked in. The PUSH-BUTTON on

the handle switches the METER from VDI to DEPTH indication on

coinsized objects. Also, shows the condition of the 4 Cell battery pack.

ENHANCED SENSITIVITY: One turn

FLEXIBILITY: Four modes of operation

allow you to hunt in any kind of ground condition

with exceptional results. This one detector is perfect for coinshooting,

prospecting, treasure hunting and relic

hunting.

TUNER control sets

detector's threshold

for maximum depth performance.

VARIABLE VOLUME: Operate the detector at a level that's comfortable for you.

> LOW BATTERY ALERT LIGHT:

LED glows when the batteries need charging or replacing.

POWER AND SENSITIVITY: The ON/OFF switch sets the METER'S VDI sensitivity, either MIN or MAX, to mineralization. Switch also tests the 4 Cell Battery pack

VARIABLE DISCRIMINATION CONTROL: Im-

proved resolution for the G.E.B/DISC. and TR./DISC. modes. Audio Discrimination works separately from crimination.

1/4 " MONO HEAD-PHONE JACK

accepts White's DEEPER BEEPER for super-sensitive cord-less headphone listening.

REVOLUTIONARY NEW
BATTERY SYSTEM: 4
"C" Cells power this
super sensitive instrument. A NI-CAD battery
pack is included that can be recharged up to 1000 times *inside* the unit. More power, less weight

and less cost when com-pared to "AA" battery systems. Savings of up to \$1000 when using NI-CADS.

CLEAR TONED

0

SPEAKER: 21/2 " speaker delivers a strong signal so you can determine the difference between a good and bad target.

WHITE'S SERIES 3 FINDS MORE OF THE TREASURE YOU VALUE MOST

- Visual Discrimination (VDI) indicates
 probable identity of the object before dig ging eliminates unnecessary digging of
 foil, tabs, and nails. Example: A quarter is
 detected in the ground, the meter needle
 points to "quarter" on the VDI scale.
- Preset option allows even beginners to start finding treasure the first time out - sets the detector for searching in average conditions

The 6000/Di Series 3 combines the most advanced technology available, with total ease of operation. Whether you're a seasoned treasure hunter, or an eager beginner, you'll have great results with the 6000/Di. No other detector gives as much depth, reliable discrimination, and ease of operation. The features found only on the Di Series 3 give the performance you need for the results you demand.

results you demand.
You'll get those re

You'll get those results with features like PRESET P positions on every control. PRESET sets the detector for operation under most conditions, and in PRESET you can start finding treasure your first time out! Read the important meter readings like VDI and Depth Reading clearly with the Large Meter on the handle. Then, after you've located a target, Visual Discrimination (VDI) lets you know its probable identity. With a squeeze of the trigger, Depth Reading tells you probable depth of the object. Coinsized objects are pinpointed to 9 inches. And the Di's super sensitivity allows even deeper detection than ever before!

 Large Meter mounted on the handle for clear view of important meter readings
 -VDI & Depth Reading. Creates great detector balance, too.

 Depth Reading indicates depth on coinsized objects to 9 inches.

 Deeper Detection than ever before - due to increased sensitivity

The Di has 4 modes of operation for super detection in all kinds of soil, for all kinds of treasure hunting. And after you've located a target, a squeeze of the trigger retunes the detector to the original threshold, so you're off and hunting again.

Ease of operation, superior depth, visual discrimination. The features that help you find more treasure. That's what White's has been doing for over 30 years. The 6000/Di Series 3 delivers the results you expect, plus the potential for a very enjoyable and profitable treasure hunting experience! Enjoy the Di success yourself!

Series 3 detectors -Perfect for Nugget Hunting, Coinshooting, Relic Hunting and Beachcombing.

3 WAYS TO FIND TREASURE OTHERS LEAVE BEHIND

6000/Di Series 3

Imagine knowing what a target is before you dig it! The 6000/Di Series 3 has Visual Discrimination (VDI) to help you determine probable target identity. By looking at the needle indicator on the meter, you can for instance, distinguish between a pull tab and a quarter.

6000/Di Series 3 Features:

- Visual Discrimination Indicator (VDI) in all 4 modes
- · Depth Reading on coinsized objects to 9 inches.
 - PRESET controls for operation in average conditions
 - Large Meter mounted on the handle for the clearest view of important readings (VDI & Depth Reading)
 - Trigger Switching retunes detector, switches modes, and switches the meter from VDI to Depth Reading
 - 4 modes of operation (GEB/NORM, GEB/DISC, TR/DISC, GEB/MAX)
 - Ground Cancellation with Discrimination
 - Increased tone response for detecting deeper objects
 - Rechargeable Battery System with charger
 - Simplified instructions
 - \$599.95

6000/D S3

The 6000/D pinpoints depth of coinsized objects to 9 inches, even deeper on larger targets. And increased sensitivity allows deeper detection than ever before.

6000/D Features:

- · Depth reading on coinsized objects
- PRESET controls
- · Large meter mounted on the handle
- Trigger Switching
- · 4 modes of operation
- Self Adjusting Threshold (S.A.T.) maintains optimum threshold
- Ground Cancellation with Discrimination
- Increased tone response, detecting deeper objects
- · Rechargeable Battery System
- · Simplified instructions
- \$499.95

5000/D S3

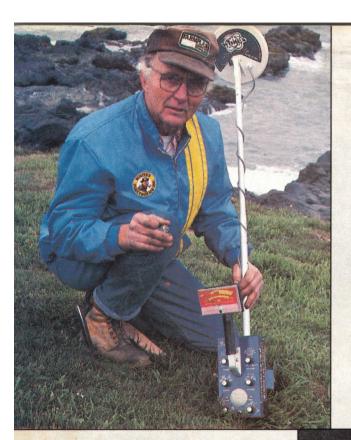

The 5000/D offers many of the features of the 6000/Di and 6000/D at a very affordable price. PRESET controls, Large Meter mounted on the handle, Trigger Switching, and 4 modes of operation are just a few of the items found on this detector. The 5000/D is priced at \$399.95.

electronics, inc.

White's Series 3 The Finest Detectors Money Can Buy

- Visual Discrimination (VDI) indicates probable identity of the object before digging - eliminates unnecessary digging of foil, tabs, and nails. Example: A quarter is detected in the ground, the meter needle points to "quarter" on the VDI scale.
- Preset option allows even beginners to start finding treasure the first time out - sets the detector for searching in average conditions.

Feature for feature, dollar for dollar, White's Series 3 detectors deliver more performance than any other detectors. Whatever kind of treasure hunting you do - nugget hunting, coinshooting, beachcombing, relic hunting, diving the ocean for sunken treasure - there's a White's detector for you, at a price you can afford.

Compare features.* Like our Visual Discrimination Indicator. VDI indicates the probable identi-

ty of objects, so you know what you've detected before digging! Depth Reading on coinsized objects. A large Meter mounted on the handle for a clear view and excellent overall balance. Trigger Switching to retune and switch modes. PRESET controls that allow you to use the detector without even reading the instructions. Self-Adjusting Threshold (S.A.T.) that maintains optimum threshold over varied ground conditions. A Rechargeable Battery System with Nickel Cadmium Batteries, charger, and back-up batteries. Plus, an underwater unit that can be used for beachcombing and salvaging to submerged depths of 200 feet.

Compare performance. Series 3 results speak for themselves. Long-time White's user Adrian Woods found 20 gold nuggets in the first 4 months of 1984 with his 6000/Di Series 3.

Compare price. Whether you choose the moderately priced 4000/D, the topof-the-line 6000/Di, or the underwater PI 1000, you'll get the finest detector money can buy.

Shop around. Compare features, performance, and price. Then buy a White's with confidence.

*Not all features available on all models.

- Large Meter mounted on the handle for clear view of important meter readings
 -VDI & Depth Reading. Creates great detector balance, too.
- Depth Reading indicates depth on coinsized objects to 9 inches.
- Deeper Detection than ever before - due to increased sensitivity.
- Instruction Manuals and audio cassette that are the easiest to understand in the industry.

Series 3 detectors -Perfect for Nugget Hunting, Coinshooting, Relic Hunting and Beachcombing.

REASONS WHY WHITE'S METAL DETECTORS ARE #1

ompare White's new Series 3
line of detectors with any
others in their price range.
You'll understand why White's
is the treasure hunter's FIRST CHOICE in
metal detectors. No other metal detectors have the same quality, depth
capability, reliable discrimination, and
performance dollar for dollar. Insist on
the finest. White's delivers it. Check out
the Series 3 facts.

Expect results. And get them. The 6000/D, 5000/D and 4000/D Series 3 metal

detectors have been developed over a period of years IN THE FIELD. Bred to find treasure! And that's just what they do. Imagine what that can mean for you! For over 30 years, White's has done more for treasure hunters world wide than any other company. Now they offer you three more reasons for making them #1. The 6000/D, 5000/D and 4000/D Series 3. See an authorized White's dealer soon. Insist on White's. And start finding more treasure.

HIGH PERFORMING TR DISCRIMINATOR WILL FIND TREASURE WITH EASE!

WHITE'S LOWEST PRICED TR DISCRIMINATOR.

The 2000 Series 3 makes treasure hunting fun and profitable! It allows you to distinguish between desirable and undesirable targets, OR, balance out ground mineralization. A super detector for getting involved in treasure hunting!

> PUSH BUTTON RETUNING: Simply press and release to regain threshold tone POWER SUPPLY: 9 Volt battery MODE: TR Discriminate LOW BATTERY ALERT: Light glows when battery needs replacing

MORE REASONS WITH THERE ARE NO FINER METAL DETECTOR THAN WHITE'S SERIES 3 MODELS

DEPTH READING

hite's 6000/D Series 3 has DEPTH READING on its meter for pinpointing targets before you start digging. On coinsized objects it reads out probable depth from 1-9 inches. On a really deep target, Depth Reading indicates beyond 9 inches. And, it keeps you from damaging a valuable treasure. (Available on White's 6000/Di and 6000/D Series 3 detectors.)

6000/D Series 3 Features

- · Depth Reading on coinsized objects
- 41/2" Meter on the handle
- PRESET controls to operate detector under average conditions
- Trigger on the handle
- · 4 Modes: GEB/NORM, GEB/DISC, TR/DISC, GEB/MAX
- Ground Cancellation w/Discrimination
- · Increased tone response for detecting deeper objects
- Rechargeable drop-in battery pack and charger. (Also includes auxiliary battery pack.)
- \$499.95 (No increase over Series 2 model)

PRESET

ow you can operate the detector without reading the instruction manual! When you turn each control to its P, the detector is set to operate under average ground conditions. But if you want to fine tune the instrument, set the controls yourself. White's left the controls on so you can handle ANY treasure hunting condition. (Available on White's 6000/Di, 6000/D, and 5000/D Series 3 detectors. Not available on 4000/D Series 3)

5000/D Series 3 Features

- 41/2" Meter mounted on the handle
- PRESET controls to operate detector under average conditions
- Trigger on the handle
- · 4 Modes: GEB/NORM, GEB/DISC, TR/DISC, GEB/MAX
- · Ground Cancellation w/Discrimination
- · Increased tone response for detecting deeper objects
- · Rechargeable drop-in battery pack and charger. (Also includes auxiliary battery pack).
- \$399.95

METER/TRIGGER

he best place for the meter is right out front where it can be seen! Its 41/2" size makes it easy to read and also gives the detector wonderful balance. A TRIGGER switch on the handle has featherlight action for re-tuning and mode changing. Pushed forward, the trigger stays in a locked position. This accomplishes the same thing as squeezing and holding the trigger. (Available on White's 6000/Di, 6000/D, 5000/D and 4000/D Series 3 detectors.)

4000/D Series 3 Features

- 41/2" Meter mounted on the handle
- · Trigger on the handle
- 2 Modes: GEB/NORM, TR/DISC
- · GEB Ground cancellation for maximum depth detection
- TR Discrimination to distinguish between good and junk targets
- Increased tone response for detecting deeper objects
- Includes rechargeable batteries and charger. (Also includes auxiliary batteries).
- · Sensitivity control.
- \$289.95

The PI 1000 outperforms other underwater metal detectors . . . even those costing twice the price! The PI balances out salt and mineralization to detect even small objects at remarkable depths.

3 DETECTION SIGNALS: Mechanical vibrator to (1) hear and (2) feel, plus an LED to (3) see.
SINGLE CONTROL: Checks batteries, tunes and detects
POWER SYSTEM: 6 "AA" Alkaline batteries ACCESSORIES: Extension rod, ballast weight, and headphone adaptor included PULSE INDUCTION: Detects all metals

INTRODUCING Automatic Ground Balance with "AutoTrack"

With just the flip of a switch, the Di Pro adjusts automatically to the ground conditions and any changes to maintain maximum depth. As you sweep the loop AutoTrack monitors even slight changes in ground mineralization and electronically resets the detector for maximum sensitivity and depth. You get the best detector performance, no matter what the conditions.

No more knob twisting to set or maintain ground balance. White's unique dual-function AutoTrack control operates automatically, or locks in a specific condition. No other detector gives you this much simplicity yet flexibility!

(White's decided a long time ago that we would not use the term "automatic" for a factory-set detector. A factory-set detector is not automatic; it is preset. Unlike other detectors, White's new AutoTrack is not simply a factory-set ground balance. It is truly automatic, adjusting with each sweep in the GEB/DISC track mode.)

Automatic Ground Balance. An engineering breakthrough. Now you have it.

More Sensitivity. More Depth. All-new Sensitivity Control!

The Di Pro's new sensitivity control lets you increase the sensitivity beyond the PRESET W mark where soil conditions permit. This means more usable depth, and is offered only by White's Professional Series. Use the Di Pro to search areas "worked out" by other, less sensitive detectors. Finding what they missed will earn you the title "Professional".

Depth of detection is one of the most important features of a metal detector. With the Di Pro, you can attain more usable depth than ever before. No outrageous claims, no misleading air test figures. Just a detector designed to give maximum performance in the ground-where it counts.

Exciting New Meter Design!

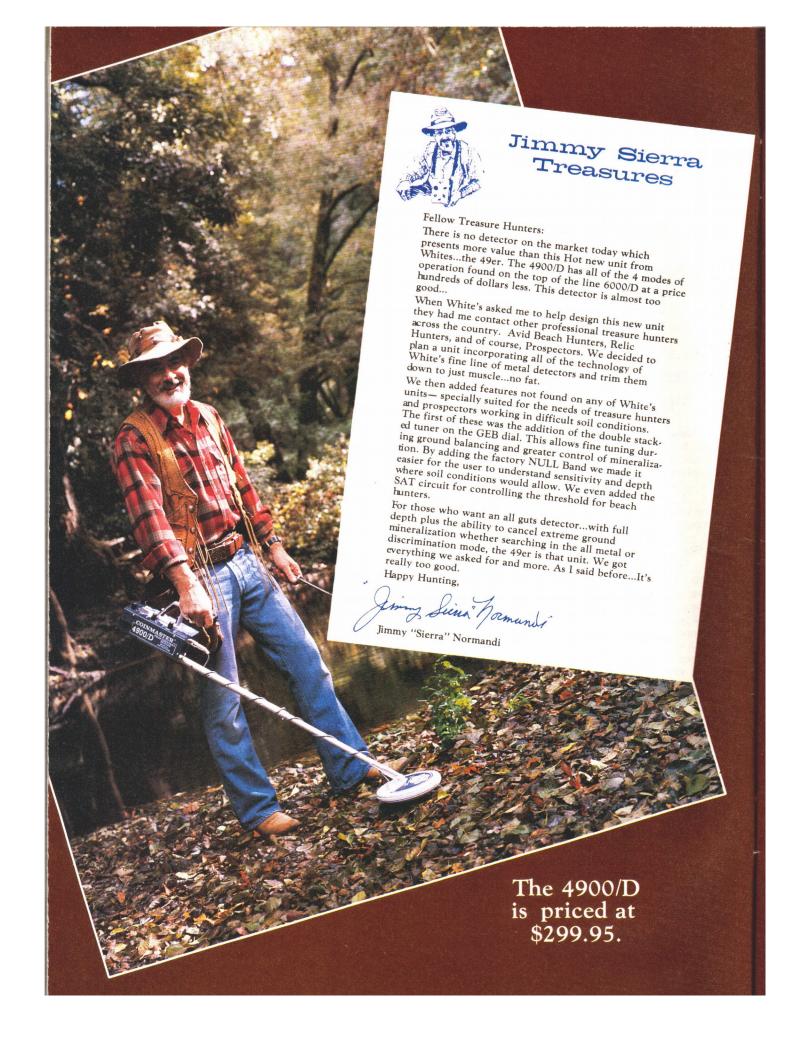

Large, easy to read coin and metal bands let you see at a glance what you've located and help you identify your target before you dig. For example, you can distinguish between a pulltab and a quarter with a glance at the meter. Then switch to Depth Reading to safely recover your target. The Reference Scale of 0-100 lets you associate various items with specific numbers. A feature the "Pro's" wouldn't be

When Professionals go treasure hunting... they go with White's.

For a FREE catalog and the name of your nearest authorized dealer, CALL TOLL FREE: 1-800-547-6911

1011 Pleasant Valley Rd. Dept. TF5 Sweet Home, OR, U.S.A. 97386 (503)367-6121 Professional treasure hunters like Jimmy Sierra depend on White's for the performance and value they demand. Even if you're not a Professional, but a weekend treasure hunter. there's a White's detector right for you, at the right price. For easy operation and reliable discrimination, consider the 5500/D and 6000/Di. Both with PRESET And Depth Reading. Perfect for beginners or experienced detector users.

For the dedicated treasure hunter who needs the flexibility to search in any conditions, there's the new 4900/D. Designed by the most successful treasure hunters in the world, the 49'er combines the latest technology and a no-nonsense price.

If you're serious about treasure hunting, see a White's dealer for a demonstration. Superior sensitivity, the deepest detection. Worthy of the Professional, built for you.

The 6000/Di Professional

The Brand New Di Pro Featuring:

VISUAL DISCRIMINATION INDICATOR (VDI): Know what you're detecting before digging! V.D.I. indicates the probable identity of targets: Gold, Silver, Coins, Iron, Pull Tabs, and Foil.

AUTOTRACK: Adjusts electronically to ground conditions. Manual ground tuning is a thing of the past!

DEPTH READING: Know the depth of a coinsized target before digging! Aids in pinpointing, helps recover objects safely.

PRESET: V Everyone can use this detector, EVEN WITHOUT READING THE INSTRUCTIONS: PRESETS the detector for use under normal conditions.

TRIGGER SWITCH: Electronic switching at your fingertip; changes modes, switches meter from Visual Discrimination to Depth Reading, and retunes detector.

INCREASED DEPTH: Sensitivity control for maximum depth. More usable depth than ever before!

4½ INCH METER: Easy to read; mounted on the handle for easy viewing of important V.D.I. and Depth Reading; position creates excellent overall balance.

RECHARGEABLE BATTERY SYSTEM: Nickel Cadmium batteries can be recharged up to 1000 times. Charger included. Back-up battery pack for alkaline "C" cells.

GEB/NORM: Detects all metals while neutralizing ground mineralization.

GEB/DISC: Discriminates against junk while neutralizing ground mineralization.

TR/DISC: Discriminates against junk OR rejects ground mineralization.

GEB/MAX: Detects all metals while neutralizing ground mineralization. (Detects 33% deeper than GEB/NORM.)

EAGLE SERIES 1987

white's **EAGLE**

Invest A Little Time. Soar Above the Rest.

EAGLE is the product of four years of research and development. Using the latest in electronic microprocessor technology, White's engineers looked at what you wanted in a metal detector. More depth. More sensitivity. More discrimination options. High performance. Logical, no nonsense operation. The result? EAGLE. Microprocessor Controlled Metal Detection.

Liquid Crystal Display instructs on air and ground balancing, reads out Target I.D. and depth, indicates memory, battery voltage and more with the push of a key! The Touch Pad guides you step-by step through operating the EAGLE. Watch as the display reads out the I.D. of the target and the depth in half-inch increments.

Start out in EAGLE's preset program to accept most coins and valuables, reject most junk. Then as you gain experience, discriminate with unlimited

options. EAGLE expands adjustable discrimination for total operator flexibility into PROGRAMM-ABLE DISCRIMINATION. Two distinct methods to easily PROGRAM ANY CONFIGURATION OF TAR-GETS TO ACCEPT OR REJECT. No traditional notch peak limits! 95 target settings for unequaled flexibility to detect any or all metals. For example, "teach" the EAGLE to reject foil and pulltabs, yet still accept nickels by using examples either in the ground or in the air. Or edit the discriminate scale manually by scrolling with the EDIT keys.

Three G.E.B. Discriminate Mode

- Plus Electronic Ratchet Pinpointing.

 Audio Threshold White's standard motion discriminate mode (GEB/DISC) with threshold tone like the Di Pro!
- h Search in silence until a target is detected.
- Audio ID Interchangeable high or low tone to accept and reject targets. Motion Discriminate and All Metal non-motion operating at the same time to produce the ultimate Slow Sweep/No Sweep!
 - Electronic Ratchet Pinpointing Each sweep shrinks target for highly accurate recovery.

Even though EAGLE comes on in PRESET automatically so it can be easily used by anyone the first time out, the <u>real</u> value is built-in customer training and satisfaction. The most comprehensive training program ever! White's feels so strongly about the EAGLE that every Authorized White's Dealer who sells it must attend training to become certified "EAGLE TRAINED". We want customers to get hands-on training from a dealer who knows EAGLE inside and out. You'll be able to use EAGLE to full potential when you receive face-to-face training from an expert, so make sure your dealer is EAGLE TRAINED. White's knows the EAGLE is not for everyone. Get a demonstration and see for yourself if the EAGLE is right for you!

COI

res

resets to maintain peak performance. A White's exclusive!

For More Data, Circle 30

For a FREE brochure on the complete line of White's detectors and the name of the Authorized White's Dealer nearest you, call TOLL-FREE 1-800-547-6911.

1011 Pleasant Valley Rd. Sweet Home, OR 97386 Q: How do you improve EAGLE®?

A: Keep it simple as A, B, C. 3 detectors in one!

More functions, more power, more options and 3 № Preset Programs to choose from.

A Coin & Jewelry Set up just like the professional hunter. Set to accept small, medium and large rings, bracelets, lockets, gold and silver coins. Rejects the most common pulltabs, screw caps and all iron objects including nails. Complete display readings include the target and the depth. Automatic Ground Balance and AutoTrac® adjust to ground minerals as you sweep. Comfortable medium-motion sweep speed and target response.

B Prospecting & Relic A completely different metal detector with the push of a pad! Professional prospectors demand Zero"0" discrimination. All metal targets are detected loud and clear with DOUBLE the intensity. Targets are analyzed and assigned a display number. The 96 Plus (+) targets and the 17 Minus (-) targets let you make the digging decision. Visually separates the iron trash and Hot Rocks to increase the probability of indentifying gold. S.A.T. maintains "rock stable" threshold even in the high mineralized gold fields of the West and battle sites of the South. All this in a Preset program, plus your choice of the user options.

Beach Sand and salt are no problem! Just push the pad and your EAGLE sets up automatically for the conditions found on the saltwater and freshwater beaches. In and out of the water, AutoTrac® keeps the ground balanced and your detector humming. Coin ID and depth read out on the display. Rejects foil and common iron targets and accepts all rings, other jewelry, gold and silver coins.

All this with the push of one pad and still easily programmable to your custom needs!

"I've used White's detectors since 1975 and hunt with the Spectrum, 6000/Di Pro, and Gold-master II. The Spectrum's ability to custom-program allows me to get maximum depth and sensitivity whether I'm hunting for tokens in Nevada, or Civil War relics in South Carolina".

Larry Soper Roseburg, Oregon

For a dealer near you and a FREE catalog

1-800-547-6911

White's Electronics, Inc. 1011 Pleasant Valley Rd. Sweet Home, OR 97386 (503)367-6121 · FAX (503)367-6629 For More Data, Circle 30 No matter what you hunt with or where you've hunted, if you're not using a Spectrum, you're missing out.

The oldest, most valuable finds could be just beyond the reach of the detector you're using now.

Spectrum's unequalled depth and sensitivity delivers a new *layer* of hunting. A layer that can't be reached by other detectors.

Whether you're a beginner or a veteran hunter, you'll appreciate the ease of menudriven operation. Just push a pad and you're off and hunting in one of the 4 Preset Programs.

Then, create your own custom program by modifying a preset

program with the 9 Basic Adjustments. Everything from sensitivity to the display's brightness is adjustable. With

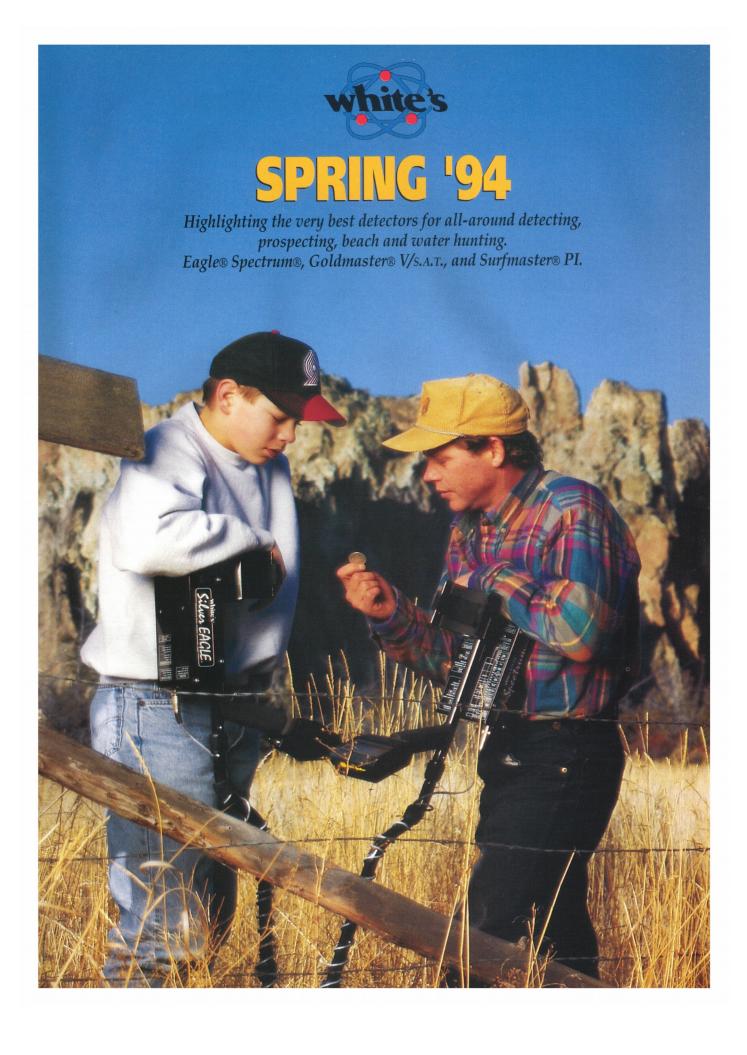

a little experience, explore the 20 Pro Options. Now, you've reached the ultimate in custom programming.

No other detector gives you as much information about detected targets. Labels like "penny/dime, quarter, iron, and screwcap. A VDI reference number confirms the target's I.D. And there's Spectrum's SignaGraph™. A unique "signature" for every target. A precise, recognizable pattern for coins and jewelry. A distinctive "smear" for iron and junk.

If you haven't had the pleasure of using a Spectrum, try one. Otherwise, you'll never know what you've been missing.

Some of Larry's best findsgold nuggets, military insignia and buttons, a Seated Liberty Half, and 2 \$5 Gold Coins - all found with White's detectors. His most recent gold coin is valued at \$3,000.

The deal of the season. Spectrum* with our shockproof hardcase or new Blue Maxima 15" loop.

Your hunting success in the months to come depends on using the best equipment available. Hands down, the best all-around detector in the field is Spectrum. And now, there's never been a better time to buy a Spectrum and pick up your choice of two valuable accessories absolutely free.

Save big with your Spectrum purchase between March 14 and June 30. Choose either a free shockproof hardcase, or our brand new Blue Maxima 1500 search coil.

The hardcase is simply essentialthe most secure protection for your detector investment. This case is rugged enough to take years of use in the field, airport tosses, you name it. It's our most popular, with a retail price of \$99.95.

For big, deep treasure, you need a powerful loop. The Blue Maxima has the capability to reach deep to

detect valuable relics and caches. How deep? With a Spectrum, you can expect to detect large targets several feet deep!

Retail value, \$149.95. For a limited time, yours free.

Free is a very good price! Call 1-800-547-6911 for an Authorized White's Dealer near you.

*Free hardcase or Blue Max 1500 only with Spectrum or Silver EAGLE's purchased between March 14 & June 30, 1994. Valid only at participating White's Dealers. White's reserves the right to make substitutions of equal or greater value in the event of shortages.

Eagle. Spectrum. So smooth, so simple ... even "hunted ou

Every day, there are more and more folks out there using metal detectors. Chances are, the sites you hunt have been detected before. Maybe once or twice. Possibly many, many times. That's why so many people choose the most sensitive, deepest detecting machine on the market. A detector that reaches beyond the limits of other detectors to open up a new layer of hunting.

That detector is Spectrum.

Only Spectrum is so packed full of exclusive features *and* performance, in a straight-forward menu-driven format.

Spectrum is truly the ultimate combination of simplicity and potential. This is the detector that

matches your level of experience and expertise. Choose a Preset Program and you're off and hunting right out of the box. They're factory-set

#PROGRAMS P9.2/2% OMProspecting Coston Program 1 D Euston Program 2

for great overall performance.

With a little experience, move on to the 9 Basic Adjustments. Here, you can modify a Preset Program to create your own custom program.

Your new program can be easily stored for recall, even after you remove or replace the batteries!
(Nicad batteries, charger and back-up C-cell pack are included.)

| BASIC ADJ. eg.1/3| | Uolume | Threshold | Tone Adjust. | BASIC ADJ. eg.2/3| | Badio Disc. | Silent Search | Mixed-Mode Audio | BASIC ADJ. eg.3/3| | DEAC (motion) Sens. | DC (nom-mot.) Sens | Basklight

If you choose, explore the 20 Pro Options and

"engineer" the Spectrum to your exact hunting needs. Here, you'll find the ultimate in custom detection. Options like Disc. Editor, Tone I.D., SignaGraph Options, Frequency Shifting, Transmit Power, and Preamp Gain. At every step, adjustments are simple to make, and simple to store. (These Pro Options are clearly explained in Spectrum's very detailed instruction manual and optional instruction video.)

oth, so sensitive, d out" areas are new again.

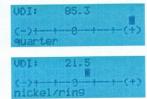

Only Spectrum gives you all the information technologically available about detected targets. SignaGraph® displays a unique

target "signature" for every target - whether it's a nail, a quarter, a ring or a pulltab.

There's a precise, recognizable pattern for coins and jewelry. A distinctive *smear* for junk. With

just a little experience in the field, Spectrum users can glance at the graph and instantly "interpret" the target. With impressive accuracy.

Couple SignaGraph with a VDI number and target label, and you've got

more visual information than you'll find on any other detector. Add to that crystal clear audio signals you customize for pitch, volume and tone. You can't see into the ground, but Spectrum is the next best thing!

When you've detected a good signal, Spectrum's trigger pinpointing concentrates the signal and then activates target

depth on the display.

Just watch the bars mark
and fill for right-on digging.

If all this makes your head spin, be assured that thoughtfully engineered into Spectrum alongside all these features is a serious dose of <u>fun</u>. It's a common element in the hundreds of letters we receive about this detector. Along with the finds.

And while we hate to brag, going along behind other detectors and finding treasures they missed has put a smile on the face of many a Spectrum owner!

"Hunting with the Spectrum is like 'hunting a new place every time out. The last 18 months have yielded thousands of coins, misc, jewelry, and some nice relics. Add it all up, and I've paid for my Spectrum 3 times over!"

Stuart Duford Michigan

"When I retrieve a nice coin or some other lost article from the ground, I know everything has not been found. When I need therapy for mind or body, I take my Spectrum and I head for the looked-out places where I usually find myself a goodie or two!"

HERE'S THE FINEST DETECTOR YOU CAN BUY AND HERE'S WHY

THE DAYTONA'S DISCRIMINATING MODE

In this junk reject mode the "Daytona" is silent as its search head passes over most of this unwanted junk as tinfoil, iron, bottle caps and other trash, not making a sound to distract or slow you down, you just don't know the junk is even there, but really sounding off with super sensitivity as the search head nears coins, rings, jewelry, and other precious metals.

THE DAYTONA'S SALT WATER MODE

Is ideal for the beachcomber, whether searching for coins and rings or pirate treasure, for here is where many detectors fail to operate properly, causing a person to just give up in disgust. Not so with the "Daytona," it's a breeze for it to detect from dry to wet sand without any change in tuning whatsoever, you just don't know the salt is even there!

PHONE ORDER COD'S WELCOMED DEALERS WANTED

THE DAYTONA'S GROUND CONTROL

When set to the number 1 or number 2 position the Daytona's automatic circuitry will compensate for changing ground conditions and will eliminate the erratic response that normally is encountered in TR detectors with high gain circuitry, this gives it that smooth special "tuned in" ground hugging effect that only the Daytona has. This is one of the greatest metal detector improvements in recent years, and is really appreciated by the person working on mineralized ground, and which most of the United States is.

THE DAYTONA'S ALL-METAL MODE

Is perfect for the artifact hunter and the prospector, for with this you can locate iron objects up to four times deeper than ordinary TR detectors, and find gold coins and small gold nuggets up to four times deeper than regular TR discriminator detectors.

OR TOUR STATE OF THE PARTY OF T The secret why some people can find gold while others can't is very simple, here's why, they know that only a detector capable of operating in the All-Metal mode can detect small gold nuggets. So if you plan to use an ordinary TR detector or discriminator locate small gold nuggets, forget it, it won't work. What you need is the "Daytona" because it can operate in the "gold detecting All-Metal mode" that was made especially for this purpose, to locate gold nuggets even smaller than a B-B in size, now that you know the secret, why wait, get yourself a Daytona, find yourself a good spot, and get rich

too! Good Hunting and Good Luck, Paul Wilson

THE FOUR PHASES

THE DAYTONA'S **GROUND** CONTROL

The Daytona 11

CONTROL PANEL

In 7 modes of operation the Daytona II covers the entire spectrum of metal detecting. With sensitivity to detect pinhead size gold nuggets, and while ground canceling, something never before possible with a metal detector.

A new type of tuning system using a 10 turn tuner greatly increases the fine tuning capabilities of the new Daytona II.

The computerized type of mode and index circuits make operation simple. Select the mode you want, set the index control, and tune in. It's that simple to operate.

6

8 OHM STEREO PHONES

Comfortable, padded with individual volume controls let you select your own desired level of sound, and by blocking out the outside noise permits you to hear the weaker signals that helps to find more older and deeper coins too.

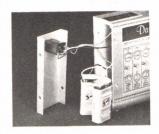

Extra - \$17.95

Powered by only two 9 volt batteries which should last up to 100 hours.

To replace, remove the four screws from the rear cover.

Replace with Eveready 216 or equivalent.

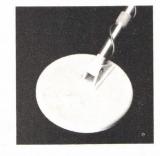

5 DEPTH RANGES

AUXILIARY SPEAKER

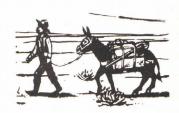

This new multicoil search head developed by us here at the Daytona plant is the most sensitive we've ever made. This has helped us considerably in attaining these new unheard of depths in coin and precious metals detecting, with sensitivity never before possible. And this search head is 100% shielded for the elimination of all grass and weed noise, and waterproofed for searching in the shallow waters of lakes and streams.

LOUD SPEAKER

The Daytona II has the finest speaker system available today. A new breakthrough in amplifier technology has enabled us to produce a sound system that uses only one tenth the power from the battery that most detectors use. You no longer need to fool around recharging batteries or try to conserve battery power, because of the extremely low current drain of the Daytona II. It can get up to 100 hours from two inexpensive 9 volt batteries.

THE GOLD RUSH IS BACK!

WITH SILVER IN HOT PURSUIT

With the price of gold and silver booming you need a Daytona. Without the Daytona you are missing many valuable finds. The Daytonas advanced circuitry and ultra sensitive head gives you the extra edge in finding deeply buried goodies.

THE DAYTONA II

With the silver and gold retriever, the Daytona II, the ultra sensitive search head enables you to perceive gold nuggets weighing one 5 hundredth of a pound and less (less than 1 gram of gold). Small silver beads also read loud and clear.

Treasure hunters with the versatile Daytona II will greatly increase their findings of all precious metals including gold nuggets in alluvial deposits as well as old gold mine workings and tailings.

The Daytona II, the advanced and professional treasure hunters detector, has near infinite variable fine tuning capability for specific soil and/or discrimination. The Daytona II will produce astounding results especially after developing your operating skill and experience.

\$289.50

THE DAYTONA I

The Daytona I, an excellent detector, is designed with simplified controls to aid the novice as well as the serious treasure hunter. The Daytona I is easy to use and light weight yet giving deep perception for excellent locating of gold, silver, rings, jewelry, coins, etc. With 3 fabulous modes — beaches (salt or fresh water) — artifacts and coin shooters modes, an inexperienced hunter can locate deep treasures even coins standing on edge generally passed over by other

all Daytona models available for immediate delivery

The brand new VLF/VLF DISC. Rangar by Daytona, with its revolutionary "Range Expandar" search head, makes digging pull tabs a thing of the past. The new "Range Expandar" head searches out hidden objects even below one or more pesky pull tabs, while giving exceptional depth discrimination (up to 5" depth in trash-laden areas).

The "Range Expandar" search head is a new design, a radical departure from previous, conventional designs. The "Range Expandar" is specifically designed for VLF DISCRIMINATING, and is engineered to eliminate backreading, falsing, and narrow scan, common in conventional search heads.

The new ground cancel and discrimination control is simplicity and precision which obsoletes the complex tuning controls of other detectors. The new **Rangar by Daytona** uses dual-phase sensitive discrimination, the most accurate and reliable ever produced, and tunes from ground cancel to screw caps and beyond, on a single one-turn control knob.

These new features, found only on the Rangar by Daytona, open new horizons to the metal-detecting world.

The new Rangar by Daytona is easy to understand and operate. We're breaking records with the new Rangar by Daytona!

a real coin collector

When you get serious about collecting coins. get a serious coin detector!

As with other metal detectors you can certainly find many of the thousands of modern coins that are lost every day. But ... with the **GBD II** coin collector you will be doubly pleased with the additional older and more valuable coins found at greater GBD depths. Coins such as the Indian Head Penny, Barber and Mercury Dimes, Walking Liberty Half Dollar, and as an added bonus... when the exclusive range expandar search coil passes over any gold or silver ring, bracelet or necklace, the signal doesn't whisper..., "IT SHOUTS."

Price \$349.50

Daytona VLF

The GBD II coin collector is a modern VLF ground cancel detector with total VLF discrimination. Operating at 6.7 kHz, this superior coin detector is not only lightweight (3.5 lbs.) with fingertip controls making tuning a mere "flip of the switch," but a built in tuning monitor keeps your coin collector at the exact selected point for maximum depth. Variable infinite discrimination actually lets you "see" through trouble-some pull-tabs with almost no loss of depth in most soils! The range expandar coil now allows you to accurately pin-point your signals!! Three inexpensive 9 volt batteries will give you up to 100 hours of useful detecting life.

the only detector in the world

don't take our word for it...

MEETS THE CHALLENGE!

"The USIKA Chief, dollar for dollar, is the best detector I've come across yet. It gives you top dollar performance at a fraction of the cost.

It is a real pleasure to show this \$10.00 gold piece which I found at an old farm house, as proof the USIKA CHIEF delivers."

Hudson Williams Portsmouth, VA

"When I first got my USIKA I decided to give it a real tough test. I started hunting in front of an old pavillion that hundreds of th'ers had been over and was rewarded with four fine "Mercury" dimes and an old 1899 Barber dime! Not bad for the first time out and in a "worked out" park.

I've also added several gold rings to my collection with the aid of my USIKA, and these were found while operating in pull tab discrimination. It's hard to believe that you can pay less and get so much for your money in the USIKA!"

Phil Ostapczuk

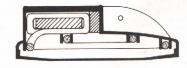

Westchester, III.

USIKA CHIEF...Why pay more? Feature for feature, the USIKA CHIEF not only matches but surpasses many detectors selling for three, four, and almost \$500.00. Latest computer designed circuit allows full VLF power without "whipping," "all-soil" ground cancelling, automatic tuning monitor with pushbutton tuning, and a battery life averaging over 100 hours. A submersible coil and space age metering system round out this proven winner, at a very reasonable price.

USIKA BRAVE...A "BEST BUY" for under \$200.00. Has almost all of the features of the USIKA CHIEF, Computer designed circuit for full VLF power without whipping, all soils ground cancel, automatic tuning monitor with pushbutton, and long life battery system. Submersible coil and the same complete three year direct factory warranty. Almost as deep and sensitive as the CHIEF. Still the best detector for under \$200.00.

RANGE EXPANDER SEARCH COIL

A very SPECIAL search coil that not only allows greater sensitivity, but will "see through" trash to locate coins and other valuables. Incredible but true, USIKA will, in most cases discriminate pull-tabs, AND STILL LOCATE GOLD RINGS!

NEUMAN

USIKA CHIEF LOCATES BRONZE AGE AXES...

nearly 3,000 years old...

ancient Roman and Anglo-Saxon coins...rare Medieval artifacts ...antique Victorian jewelry...gold...silver...TREASURE!

Those kinds of finds aren't a matter of luck. Ask Graham Marsh of England. They're the result of imaginative research, relentless effort, hard-bought experience, and consummate skill.

The same is true of superior metal detectors. They don't just happen, and they're not all alike except for the labels. In this business, imitation doesn't stand a chance against innovation, and "as good as the rest" isn't good enough.

At **Wilson-Neuman** we know that, and so do our customers. The difference is obvious in every detector we build. Our designs are unique...our performance unparalleled...our quality unrivaled.

There's no mistaking a **Daytona** or **Usika**. There's no substitute for one, either.

equipment, and I rely on Wilson-Neuman.
The Usika Chief and Daytona GBD-II provide the depth, sensitivity, and stability necessary to find coins, rings,

and relics which are hundreds and even thousands of years old. Here in England, as in America,

Wilson-Neuman meets the challenge!"

900 B.C. Bronze Age axe hoard found with Usika Chief VLF!

Graham Marsh searches near ruins of Regulbium, an ancient Roman fortress in England.

Graham Marsh Herne Bay, Kent, England

the low cost alternatives...

DAYTONA

- VLF discriminator (6.875 Khz)
- Exclusive binary C-Mos search coil
- Large clear tone 2½" speaker
- Weighs only 2 pounds
- Two 9 volt alkaline batteries provide over 100 hours of use
- Submersible search coil
- One year guarantee
- Tone frequency of 215 CPS

ONLY ONE CONTROL KNOB... no complicated instructions... within minutes after you unpack your detector you could be finding coins, rings, and other valuables. The new Usika and Daytona models give equal depth penetration. While all models respond extremely well to coins, jewelry, relics, artifacts, etc., the USIKA is recommended for coin hunting. The DAYTONA is suggested for nugget hunting due to a slightly better response to gold.

USIKA

- VLF discriminator
- Exclusive binary C-Mos search coil
- Large clear tone 2½" speaker
- Weighs only 2 pounds
- Two 9 volt alkaline batteries provide over 100 hours of use
- Submersible search coil
- One year guarantee
- Quartz crystal control
