

THE KING KING

Cobra

SILENT...POWERFUL...ACCURATE

Effortlessly seeks valuable deeper coins and jewelry; The new *CEC* (Computer Enhanced Circuitry) with variable notch control eliminates pulltabs, yet finds valuable rings.

**GOLD MOUNTAIN
TECHNOLOGIES**

- New lightweight, thin Profile 8" Concentric *Striker* Search coil.
- 15 KHz Auto-Ground Balanced, Silent Search, Slow-Motion Discrimination
- All Metal, Non-motion Pinpoint Mode
- Adjustable Notch Discrimination with Notch Width Accept/Reject Functions
- Notch Level Dependent, Dual-Pitch Audio Target ID
- Two Piece Breakdown Double Locking "S" Handle
- Non-Metal Lower Shaft
- Hipmount Convertible with Locking Captive Belt Bracket
- Padded Armcradle with Handgrip
- Perfectly balanced

Featured on the March, 1989 cover of *Treasure Magazine (United States)* and the April issue of *Trésors de l'histoire (France)*.

• AUTOMATIC GROUND BALANCE

Will automatically ignore ground minerals enabling you to get the maximum ground penetration possible from your detector.

• VERY LOW FREQUENCY SILENT SEARCH

A highly sophisticated circuit will keep the threshold sound at just slightly below threshold level so you do not have to have a constant sound in your headphones or through the speaker to be operating at optimum sensitivity.

• NOTCH LEVEL

Now with this variable notch level, you may select a band of targets below your selected level of discrimination. This enables you to "hear" the nickel and the gold ring as well as all coins and still ignore pull tabs.

• AUTOMATIC BATTERY TEST

The instant you turn the detector on, an audio sound will indicate battery condition.

• ALL METALS PINPOINT

This mode will detect all metals and doubles as a "no-motion" pinpoint.

• ADJUSTABLE DISCRIMINATION

You are not locked in to a pre-set factory sensitivity, you can increase the KING COBRA to the highest level possible without getting false or erratic signals.

• HIP MOUNT CONVERTIBLE

A convenient belt mount bracket doubles as a rod mount to enable you to convert from the popular "S" rod hand held detector to a belt mount in just seconds. The extra long cable does not require any extensions or connections. This makes the KING COBRA a super shallow water hunting detector.

• DUAL TONE TARGET IDENTIFICATION

This unique feature lets you know by a high tone if the target is above the discrimination setting, (good), or by a low tone if the target is below (bad) the level of discrimination you have selected. This makes your decision to dig or not to dig very easy.
