THE OTHER BLUES

In 1984 Tesoro diversified and increased its market share by making two different private label agreements. The first was with Montgomery Wards catalog sales department. Wards wanted a detector line that was both well known and distinctive to their store. After some negotiation, Tesoro agreed to produce the Sabre II and the Sabre Supreme.

These detectors had Tesoro Technology in a different shape and color of the control housing. After the deal was set and the catalogs produced, Wards decided to get out of catalog sales. So Tesoro was featured in the very last Montgomery Wards catalog that was ever produced.
