

# GARRETT METAL DETECTORS

2001

© 2001 Garrett Metal Detectors, Inc.

Dear Friend,

When I started treasure hunting 50 years ago, there was more lost gold, silver and jewelry than anyone could ever imagine. But those early detectors couldn't find most of that deeply buried treasure. And much of it is still lost.

Plus today there's more money in circulation than ever before, and more people to lose it--which they do.

So there's lots more treasure waiting to be found.

I know that with today's advanced, deep-seeking detectors you can discover a large share of this lost wealth--and it is our goal to help you find it.

That's why, for 37 years since we founded Garrett Metal Detectors, Mrs. Garrett and I have always worked hard to build the very best equipment and offer the very best service to each and every customer.

We will not be satisfied until every treasure hunter in the world benefits from our quality and performance; from the breadth of our product line; from the knowledge in our books and videos; and from the care we give to our customers.

I insist on holding every detector product we design at Garrett in my own hands. I test it and re-test it out in the field, where it really counts.

So if a detector doesn't meet my standards, you can be sure that it will never go out the door.

I invite you to do the same. Hold a Garrett in your own hands. Push the button. Then start finding more treasure. A lot more.

It's that simple.

I truly believe that once you hunt with a Garrett, you won't be happy with anything less.

See you out in the field.

Charles Garrett

*For more than 37 years, metal detecting with Garrett has been a family hobby that brings fun, enjoyment and togetherness -- and pays its own way.*

# Garrett at the Olympic Games

As the world's foremost manufacturer of high-tech metal detection equipment, Garrett has Olympic Games experience dating back to 1984 when the company was asked to help secure the Los Angeles Games with its metal detectors.

Since then, Garrett equipment has safeguarded every Olympic Games including Seoul (1988), Barcelona (1992), Atlanta (1996) and Sydney (2000).

Last year's Games in Sydney, Australia, proclaimed the "best ever" by the International Olympic Committee, was secured by Team Garrett with the largest installation of walk-through, handheld and ground search metal detectors in history. Nearly 1,000 Garrett walk-through detectors performed their security task flawlessly.

Garrett has been named Official Supplier of the 2002 Olympic and Paralympic Winter Games in Salt Lake City and the 2000, 2002 and 2004 U.S. Olympic Teams.

*"Ever since the remarkable success of the Sydney 2000 Olympic Games, my fellow Olympic officials in Australia have been calling Garrett Metal Detectors 'a national treasure.' I totally agree."*

*Kim Kerr  
Deputy Director of Security  
Salt Lake 2002 Olympic Winter Games  
Salt Lake City, Utah*

TMP/897 S.L.C.30/SC22896

## Garrett and Security

Garrett's Security Division is renowned for its expertise in the areas of Special Events and School Security screening with metal detectors.

Since its founding 20 years ago, Garrett's Security Division has been awarded numerous patents for its development of some of the most advanced security detection equipment available to security and law enforcement professionals.

Garrett walkthrough, hand-held and ground search detectors help safeguard countless facilities and special events around the world.

As part of our Security group, the Garrett Academy of Metal Detection was created in response to a growing need among security and law enforcement industries for security metal detector training.

Since the Academy began, thousands of men and women have benefited from its training programs.

## Garrett's global presence

Garrett Metal Detectors serves you, our valued customer, through a strong, worldwide network of independent dealers well versed in metal detector technology.

Our European distribution center, located in Dordrecht, Netherlands, provides a base from which international clients are guaranteed prompt and efficient service.

All Garrett products are made with pride in the USA at our Garland, Texas headquarters.

## Learn how with Charles Garrett

Learn about the art of treasure hunting and electronic prospecting from Charles Garrett and his friends.

RAM how-to field books such as *The New Successful Coin Hunting*, *Find Gold with a Metal Detector* and *Ghost Town Treasures* are modern classics for both experienced and would-be treasure hunters everywhere.

Garrett videos on prospecting, treasure hunting and metal detecting instruction make this great hobby come even more alive.

## Customer service that really cares

Help is always just a phone call away for every Garrett customer.

Our toll-free 1-800-527-4011 service puts you in touch with the most knowledgeable customer and technical assistance staff in the business.

Garrett customer service reps are respected throughout the treasure hunting community for their ability to listen to your questions, understand how you feel, and solve any problem quickly, so you get back out in the field fast.

## Now on the web to serve you better

Charles Garrett and Garrett Metal Detectors are more accessible to you than ever on Garrett's new website, [www.garrett.com](http://www.garrett.com).

From product information and treasure hunting advice to club, competition hunt and Olympic Games news, the Garrett website is as close as a mouse click.

# The world leader in metal detection.

## The Garrett Story

In 1964 in a tiny garage in rural North Texas, a young NASA project engineer and devoted treasure hunter built his own hobby metal detector to search for coins, jewelry and other lost treasure.

Thirty-seven years later, Charles Garrett's vision has grown into Garrett Metal Detectors, makers of the most complete line of metal detectors for treasure hunting in the world.

Over the years Garrett has developed more patented features and invested more in research and development than all of our competitors combined.

And Garrett has brought together the world's largest engineering department driven to finding new and improved ways of metal detection.

We work hard to make the very finest hobby metal detectors in the world for one reason. To help you find more treasure every time you go hunting.

### The most trusted tools of the trade

Today, successful treasure hunters share one secret: they hunt with a Garrett.

The reason is simple. Far more than any other detector, Garrett gives you a wealth of information

about a target before you dig it up. Garrett's full range of beginner, experienced, professional and specialty detectors means that no matter what your interest or experience level, there's a Garrett detector for you, at a price you can afford.

What's more, one look at our easy-to-read LCD panels will show you something even better. Our detector line is expressly designed to let you smoothly and easily step up from one Garrett model to the next as your treasure hunting skills increase.

Best of all, Garrett detectors are built to be one-touch, turn-on-and-go simple. You'll find everything you need right under your thumb.

That means you'll find more treasure. Plenty more. And isn't that what it's all about?

## Our Customers

*"The beautiful thing about Garrett is the way you can move up their detector line as you get better and more experienced. I've gone from a 1977 Garrett Groundhog to a GTAx 400 and am now using the GTI 2500. I feel really comfortable with it at competition hunts."*

*Rod Hale  
McKinney, Texas*

*"I am the proud owner of three Garrett detectors--the GTAx 750, the GTAx 1250 and now the GTI 2500. I have numerous Garrett accessories for all of my detectors, and I own all of your great books. I cannot begin to tell you how happy I have been with all of my Garrett detectors."*

*Robert Williams  
Sheboygan, Wisconsin*

*"You are to be commended for putting so much importance upon customer satisfaction at Garrett. Your company is very special indeed to care so much. I will highly recommend Garrett Metal Detectors to my family, friends and acquaintances."*

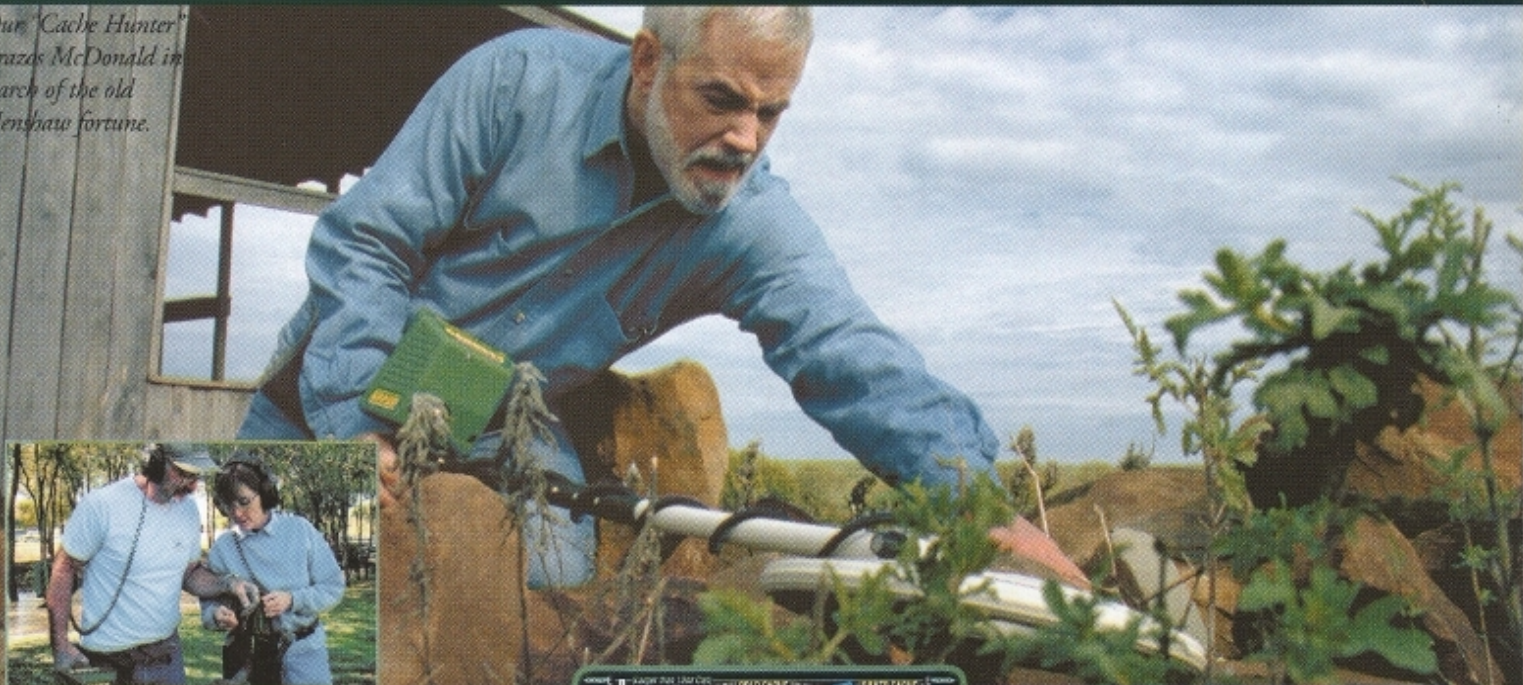

*JoAnn Summerhill  
Kemp, Texas*

"The Garrett GTI 2500 is one of the few detectors I've used that I've been able to work with everywhere I go. And when it's equipped with the Garrett Eagle Eye Depth Multiplier, the GTI 2500 doesn't pick up all the small stuff, so I don't have to dig nails and bottle caps and all that junk.

Charlie Weaver  
Lewiston, Idaho

Our "Cache Hunter" Brazas McDonald in search of the old Henshaw fortune.

Charlie and Sue Weaver  
Lewiston, Idaho

### Garrett GTI 2500 Excels in GNRS Relic Competition

Veteran treasure hunter Charlie Weaver of Lewiston, Idaho, and his Garrett GTI 2500 found the most items at the Third Annual Grand National Relic Society (GNRS) competition hunt at Brandy Station, Virginia, site of the Civil War's largest cavalry battle. Charlie's wife Sue won the most points in the women's division with her Garrett GTI 1500.

"When you own a Garrett GTI 2500 you'll be using the world's most versatile, capable and highest performance metal detector. Regardless of competitors' claims of depth, multiple frequencies and other features, the GTI 2500 will not be out-performed. Go with the best—it pays."

--Charles Garrett

# GARRETT GTI 2500

THE MOST ADVANCED, MOST VERSATILE  
DETECTOR YOU CAN OWN

## GTI 2500

IMAGING  
by Garrett

Power  
MASTER  
CIRCUITRY

Power  
Master  
DSP

Garrett's top-of-the-line GTI 2500 incorporates more than a quarter century's worth of innovative metal detection technology.

Backed by a powerful on-board DSP chip, the GTI 2500's unique benefits can't be beat. From the graphic identification of targets to unsurpassed depth capabilities and hunting versatility, the GTI 2500 DOES IT ALL.

### Seeing is Believing

Only Garrett lets you to "see" the real size and depth of all detected targets. Garrett's exclusive GTA™ (Graphic Target Analyzer™) and GTI™ (Graphic Target Imaging™) team up to bring you Treasure Vision®, a patented innovation that simultaneously shows you a target's identity, size and depth via user-friendly color graphics. Treasure Vision takes the guesswork out of treasure hunting. See whether the target is a coin, pulltab, bottlecap, drink can or large cache-sized object before you start digging. And view all the information on one easy-to-read screen.

### Locate Treasure at Greater Depths

Search for treasure at depths greater than you've imagined thanks to the 9.5-inch and the NEW 12.5-inch imaging searchcoils. And, Garrett's exclusive Power Master™ circuitry which boost detection depth by a whopping 20%. And, for those old, deeply buried treasures and relics, the GTI 2500 with the Treasure Hound™ Depth Multiplier™ with EagleEye™

pinpointing can find treasure at depths no other detector can reach.

### Hunt Your Way

Even experienced hunters with any other detector can miss treasure by scanning too fast or too slow. GTI 2500's special Scan Track™ feature solves this problem by automatically adapting to any changes in your hunting style. What's more, the detector also adapts to changes in the ground conditions automatically, helping to make your hunt prosperous and hassle-free.

*"My Garrett GTI 2500 saved an entire community from highway development. Just when the bulldozers were about to begin, my GTI 2500 and I discovered a deep cellar dwelling that dates back to 1650. Needless to say, the road will not be built and the finds are unbelievable. They include Revolutionary and Colonial period artifacts. What a good feeling it is to save a part of our history."*

Don Meadows  
Mt. Pleasant, South Carolina

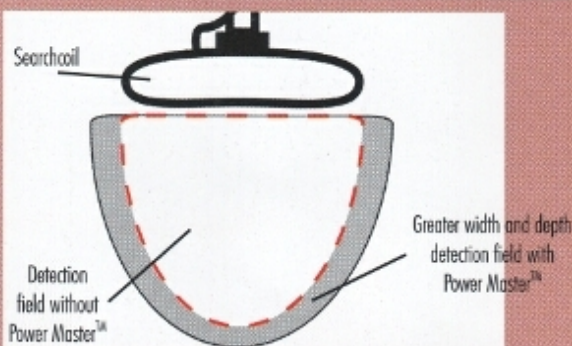

# Garrett's Ten Exclusive Features make the GTI 2500...

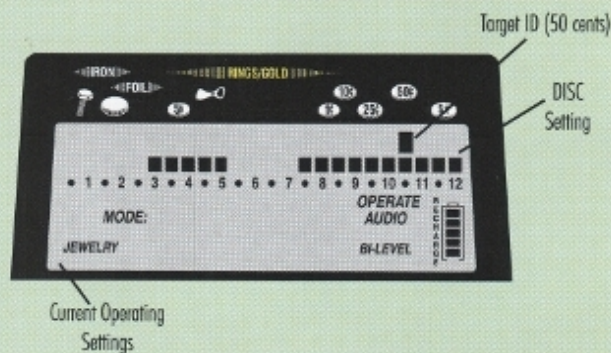

## Onboard DSP Chip

Garrett is the only hobby metal detector manufacturer that boasts the power of a dedicated onboard Digital Signal Processor (DSP) chip. Far more sophisticated than off-the-shelf microprocessors, this special computerized chip allows our engineers to "customize" the detector to perform complex functions that ultimately make the detector search deeper, faster and identify targets more accurately.

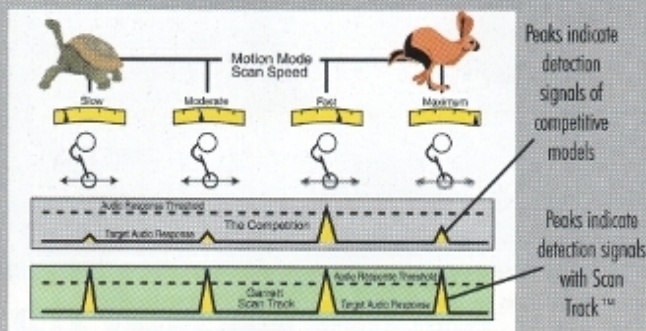

## Power Master™

Garrett's Power Master™ circuits boost detection depth up to 20 percent. Plus, the searchcoil scanning width is also increased. The illustration shows the normal search pattern scanning (red dashed line) and the search pattern scanning with Power Master™. The difference is obvious!

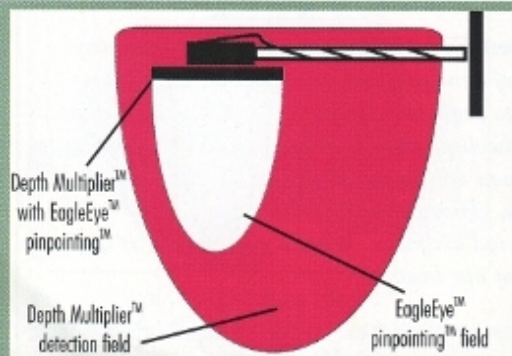

## Graphic Target Analyzer™ (GTA™)

Garrett's GTA revolutionized metal detecting by becoming the first mid-range detector whose LCD revealed a target's probable identity—graphically. The unique, easy to read GTA display instantly reveals a target's probable identity and continually shows the names of the operating mode, search aid and discrimination method in use.

## Scan Track™

Today's discrimination detectors (also known as motion detectors) force you to scan in a very narrow speed range to prevent targets from being missed. Only Garrett's exclusive Scan Track technology solves this problem. It lets you scan virtually as fast or as slow as you want without missing valuable targets thanks to sophisticated circuitry that ensures the detector performs optimally no matter what your hunting style.

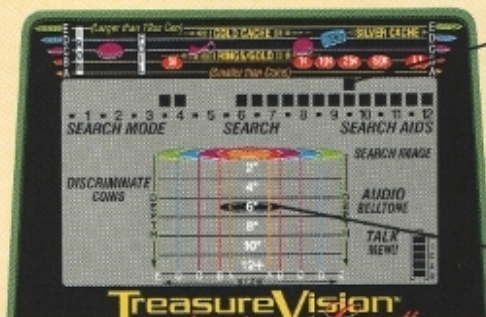

## Depth Multiplier™ with EagleEye™ Pinpointing

The Treasure Hound™ Depth Multiplier™ multiplies the detection depth of large objects by two to three times, plus it ignores small, unwanted objects. In addition, the Eagle Eye's™ patented design provides accurate pinpointing with the front Eagle Eye™ pinpointing coil. It's like having two detectors in one.

# ...the Ultimate Technological Masterpiece

The cursor and number scale IDs the target as a quarter at six inches

Graph indicates a B-sized target (i.e., coin size at six inches)

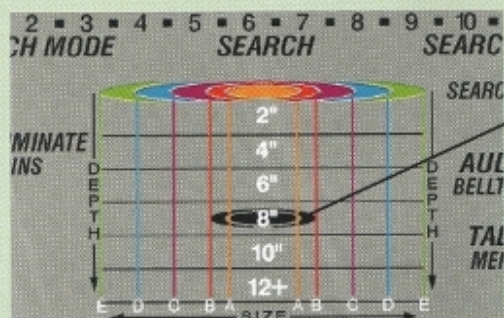

## Treasure Vision®

Garrett's patented innovation combines its GTA and GTI graphic displays into one unique, colorful screen called Treasure Vision®. In addition to showing a detected target's probable identity and true depth, Treasure Vision® goes a step further and also reveals the target's true size. With this much target information at your fingertips, you can find more treasure and ignore more junk than ever imagined.

## Graphic Target Imaging™ (GTI™)

Garrett's GTI revolutionized metal detecting even further by becoming the first and only detector to display a target's true size via colorful, easy-to-understand graphics.

A target the size of a coin has been detected at a depth of eight inches.

## True Size and Depth

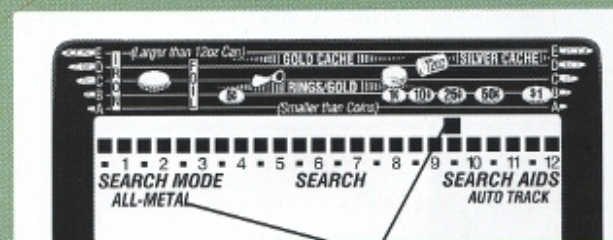

With some detectors it's impossible to know whether a detected target is junk or treasure until you dig it up. Because different targets share similar conductivities, detecting what you think is a quarter may well be an aluminum can. The GTI 2500 and 1500's TRUE size and depth technology enables you to determine whether a detected target is junk or treasure. Dig no more aluminum cans! Garrett's GTI detectors are the only detectors in the world that provide true size and depth.

Treasure Talk™ can be used continuously or on demand.

## Treasure Talk™

Garrett's exclusive voice function makes your hunt easier by verbally announcing various settings adjustments and target information. You can use the Treasure Talk touchpad to listen to the announcements continuously or on demand.

The screen indicates a quarter has been found in the All Metal mode.

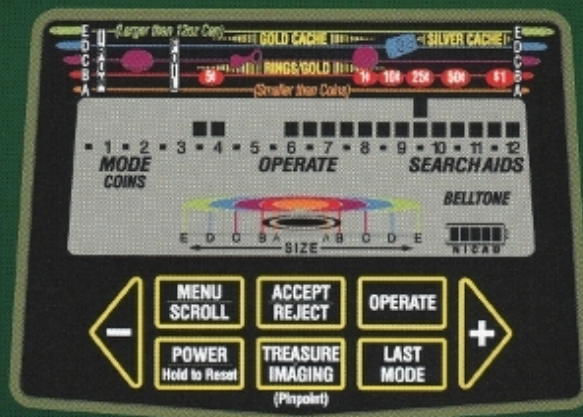

## Target I.D. in All-Metal Mode

Imagine being able to identify a target while hunting in All-Metal Mode — think of all the digging time you'd save! That's what Garrett had in mind when it developed its All-Metal, non-motion Target ID technology. The illustration below shows that a can has been detected in All-Metal mode.

*"My hobby was turning into a frustrating, nerve-racking endeavor until I traded in for a new Garrett GTI 1500. Am I glad I did! What a difference in the enjoyment level it made for me. Within minutes of powering up the GTI 1500, I was able to determine WHAT, HOW BIG and HOW DEEP the target under my coil was. I can't imagine having to go back to my first detector, now that I have been spoiled by the Garrett GTI 1500."*

*Mike Taorima (On-line)  
Chicago, Illinois*

*"My Garrett GTI 1500 is a fantastic machine for hunting in extremely trashy areas. I am amazed with the finds I have had in aluminum-infested orange groves near my home. It is almost impossible for other detectors to hunt in these conditions. The first time I turned the machine on I found a pre-WWI solid sterling silver Marine Corps insignia."*

*Chuck Fedora  
Cape Coral, Florida*

## GTI 1500 Features

- Power Master™ circuitry with onboard DSP
- Garrett Imaging™ with Graphic Target Imaging™ (GTI™)
- Scan Track™ adapts to hunting style & ground composition

MODES: Motion: Coins, Jewelry, Relics, Zero and Custom discrimination modes

SEARCH AIDS: Salt Elimination, Belltone/Bi-level Audio, Backlight, Last Mode, Automatic Pinpointing with Target Imaging™

SETTINGS: Sensitivity, Threshold, Detection Frequency, Volume, Tone, LCD with Backlight for hunting in low-light conditions, Full Range Multi-Notch Discrimination

# GARRETT GTI 1500

## THE ULTIMATE COIN HUNTER

### GTI 1500

IMAGING  
by Garrett

Power  
MASTER  
CIRCUITRY

Designed with the serious coinshooter in mind, the GTI 1500 boasts all the key benefits of the GTI 2500 but at a smaller cost. Like the GTI 2500, it too is backed by Power Master™ DSP circuitry and a 9.5-inch Imaging™ searchcoil to locate otherwise impossible-to-reach coins. The GTI 1500 also gives you instant feedback on the kind of coin you've detected and how deep it is by revealing its true size and true depth graphically, again via Garrett's unique GTI display.

Don't dig for aluminum cans when you're really after coins and rings. Rely on the Treasure Vision® screen to tell you if the

detected target is the size of a coin, and if so, its denomination. Treasure Vision® provides the necessary target information to help you decide whether coins and other targets are worth digging, enabling you to find ten times more coins instead of digging trash.

Only Garrett packs this much superior quality into its top of the line, yet affordable metal detectors. If you're not already a serious coinshooter, one afternoon with a GTI 1500 and a treasure pouch bursting with coins will make you a believer.

*"Firing up my Garrett GTI 1500 over a recent weekend, I discovered modern silver coins and jewelry, as well as historical 18th century coins and relics. That evening I had a chance to clean up my finds, and as the dirt fell from one coin in particular, I instantly realized that I had found a Connecticut copper listed as 'very rare.' To say I was excited is the understatement of the year."*

Frank Colletti  
East Meadow, NY

*"Detecting with my Garrett GTAx 1250 has helped bring our family closer together. My eldest son, who had been somewhat removed from his siblings and parents, recently 'tried his luck' and immediately found a lost house key and numerous coins. He has since become very excited about treasure hunting with us. What a blessing."*

*Larry Howard  
Raymond, Alberta, Canada*

## GTAx 1250 Features

- Power Master™ circuitry with onboard DSP
- Graphic Target Analyzer™ (GTA™)
- Scan Track™ adapts to hunting style & ground composition

MODES: Motion: Coins, Jewelry, Relics, Zero and Custom discrimination modes with Visual Target ID

SEARCH AIDS: Salt Elimination, Belltone/Bi-level Audio, Backlight, Last Mode, Automatic Pinpointing

SETTINGS: Sensitivity, Threshold, Detection Frequency, Volume, Tone, Full Range Multi-Notch Discrimination

\* 8.5" Crossfire II searchcoil & Free Instructional Video included

Model: 1151670  
Weight: 4.0 lbs.

*"Thanks to Garrett for your integrity in making such workable and comfortable detecting instruments."*

*John Burchby  
Derbyshire, England*

# GARRETT GTAx 1250

A MID-RANGE DETECTOR WITH  
DIGITAL SIGNAL PROCESSING

## GTAx 1250

The introduction of GTA technology almost a decade ago caused a sensation among treasure hunting enthusiasts everywhere. The patented, microprocessor-driven Graphic Target Analyzer (GTA) was the first mid-range hobby detector to reveal a target's probable identity and continuously display the names of the operating mode, search aids and discrimination method in use.

After years of refinements and added features, the GTAx series remains more solidly in a class by itself. The detector's unique mix of high performance, easy operation and affordability make these detectors mainstays among veterans and beginners alike.

All four GTAx models boast the revolutionary Graphic Target Analyzer LCD, which reveals coin depth in pinpoint mode (except GTAx 400), displays an easy-to-read, horizontal conductivity scale, shows which targets are "notched" (accepted or rejected) for discrimination and in an instant, pinpoints targets automatically.

The GTAx 1250 is the series' newest star player comprising key features of GTI technology. A boost from Garrett's exclusive Power Master™ circuitry with onboard DSP enables the GTAx 1250 to search for treasure at 20% greater depth, making it the series' deepest seeking detector.

*"The Garrett GTAx 1250 is my favorite coin hunting metal detector. Over the years I have found an incredible total of 30,955 coins."*

*Willard Cantin  
Hastings, Nebraska*

*"It is great to deal with a company that still cares about their customers. Your customer service department at Garrett is always very courteous, friendly, and genuinely interested in caring for me. God bless you all for a job well done."*

*Robert Williams  
Sheboygan, Wisconsin*

# GARRETT GTAx 750

WITH THE POWER OF PATENTED  
GRAPHIC TARGET ANALYSIS™

## GTAx Series

Sophisticated Power Master™ circuitry also drives the GTAx 750, enhancing depth, discrimination and target ID, making this detector's performance unsurpassed among competitive models. The GTAx 550 is known for being an advanced performance-level detector boosting dual-mode operation. Beginners love the high performance they get from the GTAx 550's factory preset COINS mode and veterans swear by the detector's strong discrimination and deepseeking capabilities. The GTAx 400 rounds out the series, offering new hobbyists the benefit of GTA sophistication with the simplicity of "One-Touch" operation.

In terms of price and performance, nothing beats a GTAx. With so much information on display and available at your fingertips, it's no wonder that the GTAx series is a superb investment for any treasure hunter.

*"I purchased my Garrett GTA 750 while residing in South Korea. This thing practically vacuums coins! It's unbelievable how much junk I don't dig."*

*James Kemp  
Neenah, Wisconsin*

*"You can imagine my excitement in digging up the prestigious French metal, The Croix de Guerre! I can't say enough about the capabilities of my Garrett GTAx 750. If you do not own a detector at this time, I can recommend it without hesitation."*

*Norman Presson  
Karnack, Texas*

# GARRETT TREASURE ACE 300

ENTRY-LEVEL DETECTORS  
THAT ARE THE "REAL THING"

## The Treasure Ace Series

The Treasure Ace line of detectors utilizes the same microprocessor technology found in more expensive instruments. All Ace detectors feature full-range discrimination which permits searching for all metal objects or ignoring trash to seek specific treasures. Concentrating on coins, jewelry and other treasures saves precious time and makes the hunt more profitable.

Microprocessor controls ensure years of reliable, deep, accurate searching. Treasure Ace detectors are lightweight (under three pounds) and extremely easy to use.

Don't settle for a "toy" detector if you're looking for a bargain. Get good value instead! Treasure Ace detectors are manufactured in the same Garrett factory alongside our world-famous GTI and GTAx models.

### Treasure Ace 300: Visual Target ID

Clear signals on the Ace 300 LCD display provide instant visual target identity. The Treasure Ace 300 has the exclusive TreasureEye™ feature, but takes it a step further with Visual Target ID. Its LCD panel has twin scales with discrimination segments. The upper scale indicates the precise discrimination you have set and the targets that will be audibly announced. Using the lower scale, TreasureEye™ pinpointing will precisely locate targets. A depth control regulates sensitivity so you can achieve maximum depth under all search conditions.

### Treasure Ace 100: The Low-Cost High Performer

Don't be fooled by the low cost of the Treasure Ace 100. It has all the basic microprocessor capabilities that have made Garrett detectors famous. Just turn it on, and you're ready to find treasure! It's truly a superb performer.

### Treasure Ace 300 Features

- Visual LCD Target ID
- Visual Full-Range Discrimination
- TreasureEye™ Pinpointing™
- Adjustable Sensitivity/Depth

# MASTER HUNTER® CX PLUS™

A LOT OF VERSATILITY  
FOR VERY LITTLE COST

## Master Hunter® CX Plus™

Twenty years ago, Charles Garrett developed a computerized detector that would locate all kinds of treasure and achieve great depth and efficiency under the toughest operating and ground conditions.

Countless hours of successful field use and a string of awesome discoveries led to the creation of Garrett's renowned CX detector. Over the years, the CX line has established a strong niche for itself in the areas of treasure caches, battlefield relics, gold nuggets, gold placer, veins and coin hunting.

The latest innovation to the CX family is the Master Hunter® CX Plus™, which builds upon the technology of the Master Hunter® CX, incorporating a unique, rugged LCD that reveals a target's identity and ID conductivity while in either search mode.

For hunters with a penchant for deeply buried treasures, the CX Plus™ can be equipped with Garrett's exclusive Treasure Hound™ Depth Multiplier™ which can help you reach caches and large treasure that most other detectors can't reach.

### CX Plus Depth Package

8.5" Crossfire searchcoil and Treasure Hound Depth Multiplier

# NEW SEA HUNTER MARK II™

## TARGET DISCRIMINATION TO FIND MORE IN LESS TIME

*"Dear Mr. Garrett:*

*I am so impressed with your new Sea Hunter Mark II. During a search for a lost wedding band in rough water with waves coming over me, the searchcoil stayed steady like a pro. True to form, the Sea Hunter Mark II found the ring. I took the detector out to a low tide area and found really deep targets. It also found very small targets in fresh water. This is a well-made detector and worth any detectorist having. Your design is great."*

*Eleanor Hube  
South Yarmouth, Massachusetts*

## New Sea Hunter Mark II™

The New Sea Hunter Mark II™ from Garrett is the only Pulse Induction (PI) detector that completely eliminates pulltabs and foil without significantly degrading the sensitivity on rings and coins.

Thanks to both Standard PI discrimination and Garrett's exclusive Discrete Trash Elimination mode, the New Sea Hunter Mark II™ absolutely eliminates trash as it detects treasure right next to it.

In addition, the New Sea Hunter Mark II™ easily adapts to any type of underwater or beach environment with your choice of four stem configurations. Best of all, this revolutionary detector can find treasure at depths other submersibles can't reach.

A longtime favorite of renowned professional treasure hunters like Mel Fisher and Bob Marx, the Sea Hunter™

has earned a reputation for helping beach and surf loving coinshooters to find thousands of dollars worth of lost coins and jewelry

### Comfortable for Beach and Water Hunts

Like its predecessor, the new Sea Hunter Mark II™ is fast becoming one of the most sought after submersible detectors in the world by both treasure hunters and search and recovery teams. The Sea Hunter™ ignores salt water and most minerals. Its four stem arrangements includes: the long stem with top, hip and under cuff stem mounts and the short stem ScubaMate™ for underwater searches.

### Mark II Features

- Microprocessor-Controlled Pulse Induction Circuitry
- Both Standard and Discrete Trash Elimination Modes
- Choice of Four Stem Arrangements
- Operating Depth to 200 ft.
- Independently sealed battery compartment

MODES: Standard & Discrete Discriminate

SEARCH AIDS: Audio Target Alert

SETTINGS: Elimination and Threshold

## \$749.95

\*8" epoxy filled PI coil, Free Submersible Headphones and Instructional Video included

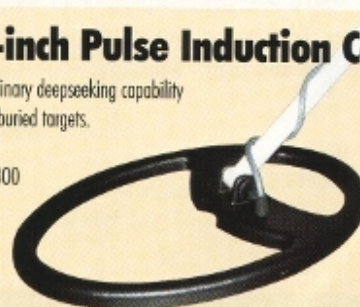

Model: 1151970

### 10x14-inch Pulse Induction Coil

Provides extraordinary deepseeking capability to locate deeply buried targets.

Model: #2215300

## \$129.95

# SCORPION GOLD STINGER®

THE TRULY VERSATILE GOLD HUNTER

*"Snow White", an extremely valuable gold nugget, found with a Garrett detector in Western Australia, boasts a troy weight of 80 ounces, beautifully highlighted by white quartz.*

*(Actual size is three times the size shown here.)*

## Scorpion Gold Stinger®

The Scorpion Gold Stinger® offers three-mode versatility unmatched by any other gold-hunting detector. Also, its Groundhog® (15kHz) circuit is world famous for its power to penetrate ground minerals. The Groundhog® punches through heavily mineralized soil to locate nuggets, placer, float and ore veins.

The Scorpion Gold Stinger's® optional 3x7-inch elliptical searchcoil can detect the tiniest gold nuggets and flakes. You can use the 5x10-inch elliptical coil to locate nuggets, veins, float and wet and dry placer at extreme depths. It also lets you sample ore and check "hot rocks" with ease and dependability.

A flip of a switch is all it takes to change from Non-Motion All-Metal operation to Motion Discriminate for coin searching. Flip the switch again for true TR discriminate in order to accurately identify or grade conductive ore. With the Scorpion Gold Stinger® you won't be fooled by iron rocks, fools gold, non-conductive specimens or low-grade silver ore.

You'll love the Scorpion Gold Stinger's® remarkable maneuverability over complex ground conditions and in narrow cracks and fissures when nugget and placer searching.

### Scorpion Features

- True Non-Motion All-Metal Mode
- Manually Adjustable Ground Balance and Tuning
- Renowned Groundhog® 15kHz Circuitry

MODES: All-Metal Non-Motion, Motion Discriminate, Calibrated TR Discriminate

SEARCH AIDS: Standard Audio, Manual and Automatic Tuning

SETTINGS: Ground Balance, Discrimination, 10-Turn Threshold, Sensitivity

Weight: 3.3 lbs.

Model: #1194370 (5"x10" elliptical coil w/10" gold pan)

**\$549.95**

#1194371 (as above plus 3"x7" elliptical coil)

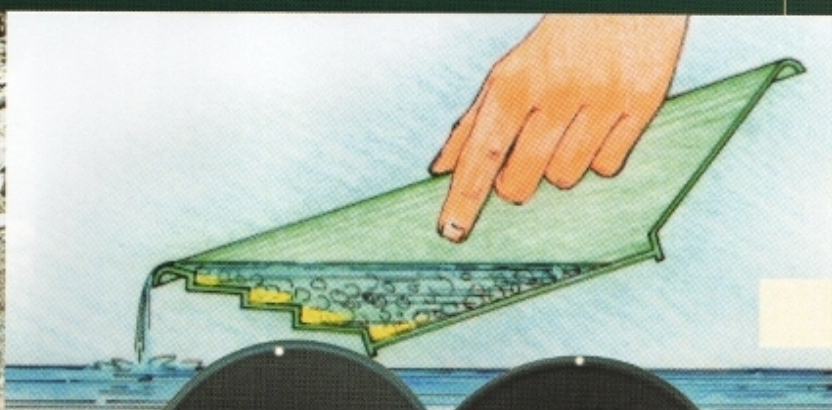

**\$629.95**

\*Free Instructional Video included with both packages

# GARRETT GOLD PANS

A PATENTED GOLD RECOVERY DESIGN  
DEVELOPED BY PROFESSIONAL PROSPECTORS

*"With Garrett's patented 90-degree riffle traps, it's hard to throw gold from the pan."*

*George Mroczkowski  
San Diego, California*

Garrett's Gold Pan Kit

## Gold Panning At Its Best

Garrett's Gravity Trap® Pan is the world's only patented gold pan with a riffled design that ensures rapid gold recovery in wet or dry conditions. Garrett also offers the Supersluice™, the first gold pan to securely trap small and even very large nuggets. It has deep 1/2-inch riffles for rapid recovery of wet or dry material. The 15-inch Supersluice's™ large pan bottom works more material, saving you valuable prospecting time.

Garrett also offers the standard 14-inch Prospector Gold Pan and the compact 10-inch Backpacker Gold Pan.

All Garrett gold pans are lightweight, green in color for enhanced gold nugget visibility, and virtually indestructible.

(Caution: Do not be fooled by competitive "copycat" designs. Go Garrett!) Garrett's patented 90-degree riffles can help you find gold faster and more efficiently.

But it doesn't end there! There are more Garrett gold recovery products to suit your prospecting needs.

The Garrett 14-inch Combination Sifter/Classifier is designed for use in sifting gold, coins, jewelry and relics in either wet or dry debris. It fits into a 5-gallon bucket and its 7/16-inch exit hole restricts the passage of a U.S. dime while letting smaller items pass through.

The Gold Guzzler bottle sucks fine gold granules from the water at the bottom of a pan.

Description		Applications	Model#/Price	Model#/Price	
<b>GOLD PANS</b>					
15" Supersluice™ Gold Pan	Twin 1/2" gold riffles "Deep throat" funnel design Two-hand operation	Rapid gold recovery. Traps fine gold and nuggets over 1 oz. in size	1650400 <b>\$9.95</b>	Gold Guzzler bottle 1650300 <b>\$3.95</b>	
14" Prospector Gold Pan	Three 1/4" gold riffles	General purpose Wet/dry panning	1650000 <b>\$8.95</b>	"Find an Ounce of Gold a Day" book 1543800 <b>\$3.00</b>	
10" Backpacker Gold Pan	Four 1/4" gold riffles Lightweight, ultra portable.	Wet/dry panning or finishing	1650100 <b>\$7.95</b>	Complete Gold Pan Kit: 14" and 10" gold pans, Classifier, Guzzler, 2 gold vials, tweezers, "Find an Ounce of Gold a Day" book 1651300 <b>\$29.95</b>	
14" Combination Sifter/Classifier	Exit hole 7/16" square (won't lose a U.S. dime). Sifts gold, coins, jewelry & relics.	Wet or dry classification Sifts debris Fits 5-gallon bucket	1650200 <b>\$7.95</b>

## Searchcoil Selection Guide

### Searchcoil Type

Small searchcoil:	4- to 5-inch, 3 x 7-inch
Medium searchcoil:	8- to 10-inch, 5 x 10-inch
Large searchcoil:	11- to 13-inch, 10 x 14-inch
Depth Multiplier™:	2-box coil
Elliptical searchcoil:	5 x 10-inch

### Best Use or Purpose

Trashy areas, tight places searching for smaller, shallower targets
Designed for general use in finding the broadest range of targets in the broadest range of environments
Deepseeking operation such as cache or relic hunting
Finds larger targets like a gallon-sized can at the greatest possible depth while ignoring small trash items
Designed for operating over heavily mineralized ground commonly encountered while prospecting

# GARRETT ACCESSORIES

WE CAN OUTFIT YOU FOR  
ANY DETECTING CHALLENGE

Padded two-zipper carry bag: Specially designed with extra-thick padding to carry any fully assembled Garrett detector.  
#1608500 **\$69.95**

Supreme bag: Specially designed to carry the CX and GTI series of detectors. Soft leather-like material w/ zippered pockets.  
CX: #1617300 **\$99.95**  
GTI: #1616800 **\$99.95**

All-purpose detector carry bag: Designed to carry any Garrett detector. Zippered pockets for extra storage and reinforced nylon straps.  
#1608700 **\$29.95**

Deluxe all-purpose convenience bag: Perfect for carrying your detector accessories or for travel. Six pockets, carrying handles, and handy shoulder strap.  
#1611500 **\$29.95**

Garrett Master Sound stereo headphones: Mask noise, boost signals, and find more treasure. Individual volume controls on each earpiece.  
#1603000 **\$29.95**

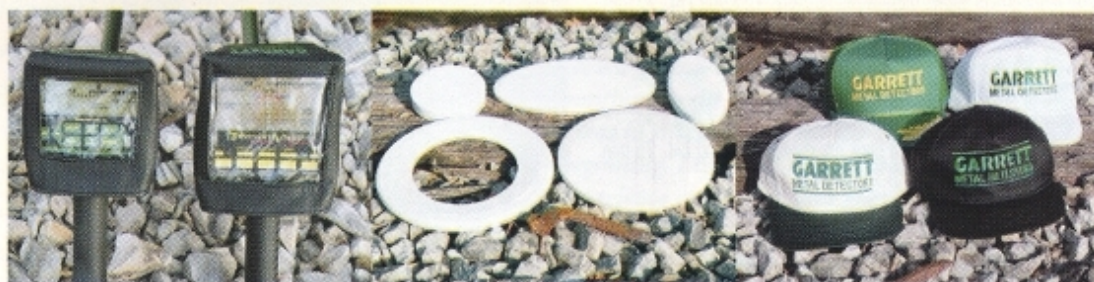

Coin digging kit: (3 items below)  
Kit: #1601070 **\$21.95**  
Pouch: #1608800 **\$8.95**  
Probe: #1605800 **\$8.95**  
Composite digger: #1606000 **\$6.95**

Texas Twister™: 20-in-1 screwdriver kit with telescoping magnetic pickup. Use it in the field, in the garage, at work or at home.  
#1618500 **\$19.95**

Pocket Probe: Search walls, chimneys, flooring and "dug holes" for lost coins, jewelry and money caches. Keep it with you or in your vehicle.  
#1177000 **\$119.95**

Weather-resistant environmental covers:  
For CX, #1600400. For GTAx or GTI 1500, #1600371. For GTI 2000 or GTI 2500 #1618200

**\$14.95 ea**

# GARRETT 2001 FEATURES

## KEY

- 3pc.** = Three-piece stem assembly
- 10T** = 10-turn analog adjustment pot
- A** = Automatic weak signal boost
- BCH** = Beach Mode
- C** = LCD target cursor
- Disc.** = Discrimination
- DSP** = Digital Signal Processor for advanced target analysis.
- F** = Factory preset threshold-level audio
- LCD** = Liquid Crystal Display
- P or E** = Patented or Exclusive Garrett feature
- PI** = Pulse induction
- PP** = Pinpointing with EagleEye™
- S** = Set to initial points (>). Then, discrimination search mode operation is automatic.
- SA** = Sharp audio-signal pinpointing
- Spc** = Submersible headphones included
- Ste** = Stereo headphone jack, all others (X) mono

Proof of Garrett's excellence is the recognition given them by the following United States patents: 4,709,213; 4,488,115; 4,700,139; 4,398,104; 4,423,377; 4,303,879; 4,334,191; 3,662,255; 4,162,969; 4,334,192; 5,148,151; 5,138,262; 5,721,489; 5,786,696; 5,969,528; Design 274,704 and 297,221; Design 333,990; G.B. Design 2,011,852; Australia Design 111,674 and other patents pending.

Garrett stands behind every product it builds, and offers dependable warranty protection to each buyer. All Garrett land detectors and searchcoils are protected by a two-year limited parts and labor warranty. Sea Hunter is protected by one-year limited parts and labor warranty. Up to 95% accuracy on target ID, size and depth. Operator errors, mineralization and nearby targets may effect accuracy of readings.

- ACE: Advanced (Microprocessor) Computer Electronics
- Adjustable Radio Frequency (R.F.), qty. frequencies
- Adjustable Sensitivity/Depth (50% to maximum)
- Audio Boost: Boosts Weak Target Signals
- Audio Threshold Level: Auto/Manual Selector
- Automatic Fast Track™ Ground Balance (All-Metal mode), (seconds)
- Automatic Ground Elimination (in discrimination mode(s))
- Automatic Ground Track™ Continuous Ground Balance (All-Metal mode)
- Automatic Pinpointing™
- Batteries Included (all models include Automatic Battery Check)
- Coin Alert™ Belltone Audio Discrimination
- Coin Depth Measurement
- Deepseeking All-Metal Mode
- Digital Signal Processing (DSP)
- Disc. Modes: Full-range GTA Accept/Reject Notch System
- Disc. Motion Mode: Dial-adjust
- Free Instructional Videotape
- Graphic Target Analyzer™ (GTA™) LCD Display
- Graphic Target Imaging™ (GTI™) LCD Treasure Screen
- Headphone Jack (headphones w/volume control recommended)
- Hip Mount
- Last Mode Switching (instant switching between two modes)
- Last Target Recall™ (Treasure Talk™ voice announcement)
- Loudspeaker
- Microprocessor Controlled (Exclusive DSP includes Scan Track™)
- Number of Adjustable Audio Threshold Levels
- Number of Adjustable Manual Ground Balance Levels
- ™One Touch to Treasure™ Operation
- PosiControl Ramrod Stem
- Power Master™ (provides 20% increase in detection depth)
- Radio Frequency (R.F.) in kHz
- Salt Elimination Mode (use disc. with other models)
- Scan Track™
- Silent Search (some models feature audio adjustments as indicated)
- Surface Elimination (blinking of shallow target signals)
- Surface Mount PC Board Technology
- Touchpad Factory Reset of All Settings
- Treasure Eye™ (Instant Pinpoint™ & real time signal strength)
- Treasure Hound™ Depth Multiplier™ (2-Box) Searchcoil Capability
- Treasure Talk™ (voice instruction)
- Treasure Vision®/Treasure Imaging™ for True Size & Depth (for all targets)
- Variable Audio Tones
- Visual Target Identification
- Volume Control (adjustable maximum amplitude)
- Relative Depth Capabilities of each model  
+ Results in All-Metal mode

### We Want to Hear From You

*We are very thankful to you, our honored customer. You are the reason Garrett Metal Detectors works hard to offer the best detectors, accessories, books and videos, and the best customer service. Send us your treasure stories. Tell us about the success you are having. Share your experience with us and with your fellow treasure hunters and detectorists. We would love to hear from you today.*

Garrett Metal Detectors, Garrett.com, Automatic Ground Track, Bloodhound, Coin Alert, Coin Max, Crossfire, Crossfire II, CX Plus, Deepseeker, Depth Multiplier, EagleEye, Fast Track, Garrett Academy of Metal Detection, Garrett's Gravity Trap, Groundhog, GTA, GTI, Graphic Target Analyzer, Graphic Target Imaging, Imaging, Master Hunter, Pinpointing,

### A few cautions:

- Never trespass or hunt on private property without permission.
- National and State parks/monuments, etc. are absolutely "off limits".
- Avoid areas where pipelines or electric lines may be buried.
- Deepseeking detectors can detect concealed pipes, wiring, and other potentially dangerous material. When these are located, the proper authorities should be notified.

Power Master, RAM Books, Scan Track, Scorchier, Scorpion Gold Stinger, Sea Hunter Mark II, ScubaMate, Super Deep Imaging, Super Sluice, Super Sniper, Target Imaging, Texas Twister, TreasureEye, Treasure Hound, Treasure Max, Treasure Talk and Treasure Vision are trademarks and registered trademarks of Garrett Electronics, Inc.

Treasure recovery is a rewarding family and professional activity that pays its way.
