RecycLockout™ Lockout Tagout Stations
 Stations use recycled content materials for the boards and the components. Station boards have flexibility to accommodate 1.5" or 3" shackle length padlocks and use unique hooks that allow two padlocks or hasps to be used per hook. Padlocks can also be locked to hooks for extra security. Boards are made from recycled PETG. Boards can be ordered unstocked - add the suffix "E" to the part number.

RecycLockout™ Lockout Tagout Kits
 Lockout tagout kits feature heavy-duty recycled content components. Pouches for kits use heavy strength, recycled PET fabric and double seams for extra durability. Tool box is 100% recycled polypropylene with open compartmentation to accommodate extra tools.
