The Traveler's Trunk, Pirates Treasure, is a children's book written by Amanda Litz, copyrighted in 2009, it costs \$5.95. It is part of a series of books under the *Traveler's Trunk* series. The premise of the series involves the characters heading to their grandmother's attic where they uncover a trunk. Within this trunk contains the items that they takes them to a new reality where they experience an exciting adventure.

I would recommend this book to any child who enjoys adventure stories. Through fluid and descriptive words the author is adept at making her imaginary world seem real for the reader. In addition, the book not only focuses on the adventure the children go on, but also the friendship that has developed between them. I read this book to my younger brother. This book kept his focus through its use of descriptions combined with pictures, and I even found myself enjoying reading the book. Along with illustrations a child aged 7-10 will be captivated.

This book is intended clearly intended for younger audiences. The simple language and engaging plot make this book suit its intended audience. I would recommend borrowing this book from the library.
