

Grade Point Averages (GPA's):

There are 3 GPA's mentioned on the report card:

1. CURRENT PROGRESS REPORT DISTRICT GPA =

This GPA is an average of current 9 weeks grades.

2. CUMULATIVE DISTRICT GPA (used to calculate rank in class) =

- a. This is an average of all **high school semester grade averages to- date, weighted** with bonus points for honors, AP and senior IB classes.
- b. The only classes in 8th grade used to calculate the high school GPA's are Algebra I, Algebra I Honors, Geometry, Physical Science Honors, and Foreign Language. (Private middle school classes will not be posted and averaged until January of the freshmen year.)
- c. **Cumulative District GPA** is first calculated by averaging all semester grade averages, where each **A is given 4 points, B is given 3 points, C is given 2 points, D is given 1 point and F is given zero points.** Then **bonus points** are added to that average. A student that receives a C or above in an honors course (which includes all pre-IB classes) gets **0.04 bonus points** added to the original average. A student that receives a C or above on an AP course or a senior year IB course gets **0.08 bonus points** added to the original average.

3. CUMMULATIVE STATE GPA =

This average is based on the same courses and grade points as the **Cumulative District GPA** (see above), but is **unweighted**. This means no bonus points are added for honors, AP or IB courses. **A 2.0 is required for graduation of high school.**
