

Art 2 Drawing Syllabus

Mrs. Vinklarek

Over the course of the year, each student will learn to use various media to become more comfortable and more creative with his / her drawings. There are many ways to drawing beyond the traditional pencil and paper method. We will try, in this class, to experiment with these drawing techniques and media as much as possible. It is also important to remember that art is not copying... it is creating! And this is an advanced art class, so you should be at that next level. A great deal of personality and individuality should come out in your work. Each student's work should be completely different. Over the course of the year, I would like for each student to develop his/ her own personal style and method of working. This will lead you up to the Art 3 class, which is based more on conceptual and experimental artwork.

The Art / Drawing 2 course this year is structured so that each six weeks we will concentrate on a different media. That does not mean that you must exclusively use that media over the course of the six weeks. It simply means the goal of that six weeks is to gain control over the media so that you will be comfortable using it in any art work.

I am giving you a snapshot and brief description of the projects and mediums we will be doing, for the purpose of being prepared. Please refer to the course outline.

I look forward to your creativity!

Mrs. Vinklarek
