

Golden Horseshoe Product Collection

Equi Jug

Equi- Jug is an easy way to eliminate nutritional gaps that can occur from everyday work or poor harvesting and storage conditions for hay and grain.

To ensure your horse has adequate nutrient intake, Equi Jug supplies all essential amino acids, fat and water soluble vitamins, antioxidants, electrolytes, and fish oils.

18 amino acids, including Lysine, Methionine and Threonine; Amino acids which horses need for tissue repair, muscle development and strength and proper growth.

Protein is also essential for the production of enzymes, hormones, and immunoglobulins, all of which play critical roles in breathing, digestion, central nervous and immune functions.

Fat soluble vitamins, A, D, E and K ensure adequacy for all epithelial tissue (respiratory, intestinal and digestive tract), proper mineral absorption and bone development, muscle integrity and maintenance of tissue repair and blood clotting. All 8 B vitamins and folic acid. B vitamins are essential for healthy nervous system, production of energy and proper RBC production and oxygen delivery function.

Fish oils contain the essential fatty acids EPA and DHA which have powerful antioxidant and anti-inflammatory benefits that not only improve joint health, but also improve immune function, protect cell membranes from oxidative damage, improve central nervous function, cardiac and digestive health.

Chelated minerals: Calcium, Phosphorous, Zinc, Magnesium and copper to ensure proper bone development, red blood cell production, proper coat and hoof growth and immune function. Antioxidant Complex, Vitamins A,E, C and Zinc, help prevent oxidative damage of cell membranes from free radical reactions.

Electrolytes, Sodium, Potassium, and Chloride are lost with excessive sweating during training and racing. These minerals are critical for all motor function, cardiac and central nervous function.

Available Size:
80gr Syringe
