

2020 Climate Emergency Deadline Global Coalition to Slash Emissions

World call to support UN Secretary-General António Guterres September 2019 Climate Action Summit

CLIMATE ACTION SUMMIT 2019

A RACE WE CAN WIN

UN Climate Action Summit September 2019

Global emissions are reaching record levels and show no sign of peaking.

The last four years were the four hottest on record, and winter temperatures in the Arctic have risen by 3°C since 1990.

Sea levels are rising, coral reefs are dying, and we are starting to see the life-threatening impact of climate change on health, through air pollution, heatwaves and risks to food security.

The impacts of climate change are being felt everywhere and are having very real consequences on people's lives. Climate change is disrupting national economies, costing us dearly today and even more tomorrow.

But there is a growing recognition that affordable, scalable solutions are available now that will enable us all to leapfrog to cleaner, more resilient economies.

The latest analysis shows that if we act now, we can reduce carbon emissions within 12 years and hold the increase in the global average temperature to well below 2°C and even, as asked by the latest science, to 1.5°C above pre-industrial levels.

UN Secretary-General António Guterres is calling on all leaders to come to New York on 23 September with concrete, realistic plans to enhance their nationally determined contributions by 2020, in line with reducing greenhouse gas emissions by 45 per cent over the next decade, and to net zero emissions by 2050.
