We recommend that you book medical evacuation insurance through “The Flying Doctors of East Africa Society”. Their services provide AIR evacuation and repatriation of a client from the point of emergency to Nairobi. An emergency can be either sickness or an accident of any kind.

Air evacuation is usually made in small planes that are furnished with medical equipment and trained staff. An emergency evacuation does NOT include any medical attention/costs that are provided in a Nairobi Hospital or international costs.

AMREF Flying Doctor’s service is based in Kenya and is the largest, best-known Air Ambulance Service in the region.

Let us know if we can help in any way!

**In addition to the above it is always wise to purchase travel insurance for your trip whether short term or long term.*
