

We do not consent to having a Smart Meter from Ameren placed on our home for numerous reasons, which include:

1. Privacy issues (violates the 4 amendment to the US constitution)
2. Security issues
3. Safety issues
4. Potential health issues
5. Escalating utility costs
6. It is NOT required by Illinois law.

According to the Illinois Public utility act forcing your customers to take a Smart meter and charging a "Refusal fee" for those opting out is illegal. This section took effect in 1997 and has not been changed.

Section 16-124 states "...An electric utility shall not require a residential or small commercial retail customer to take additional metering or metering capability as a condition of taking delivery services unless the Commission finds, after notice and hearing, that additional metering or metering capability is required to meet reliability requirements." (Source: P.A. 90-561, eff. 12-16-97.)

We have not found any such ICC finding, meeting or notice.
