NASHVILLE, TENNESSEE - WHERE THE NATIONS ELITE TELEVISION AND FILM PRODUCERS JOIN FORCES WITH MUSIC ROW

NASHVILLE, Tenn. – This week, Nashville, Tennessee, once again plays host to the nation's elite L.A. and NYC-based television and film music supervisors. ALL ABOUT MUSIC TV & FILM is hosting its 11th annual one-of-a-kind private retreat in Music City U.S.A., providing a rare networking opportunities for undeniable artists – both signed and unsigned – and the most respected television and film music supervisors in the industry who are responsible for implementing music into the scenes of well-known television shows and movies. Labels (Universal, Jive, Sony, Curb, Verity, etc.) have seen how valuable this service is and are here once again to look for, rather to listen for, the music that will accompany the upcoming fall season. This event is held every summer in Nashville and is currently the biggest film and television conference in the world.

"This conference is a time for artists, indie label owners, writers and industry professionals to connect in a unique way," All About Music TV & Film founder EMMIT MARTIN explains. "The industry needed something different -- something with more quality than quantity that could connect and educate artists and entertainment professionals. We champion great Pop, Rock, Christian, Country and Urban artists and music in an intimate setting found nowhere else. Many artists will get TV or film placements and some will get record deals but all will enjoy the connections they make during their time with us." ALL ABOUT MUSIC has generated a countless number of success stories for artist to earn income in Film and Television). Artists who have participated in past events have had their songs placed in such hit television shows as "ER," "CSI (NY, LV, MIA)," "Third Watch," "OZ," "The Wire," "Weeds," and "Felicity," earned appearances on HBO's "Def Poetry Slam & Comedy Jam;" been called on to write theme songs and music (programming for Lifetime Television and A & E is just one example) and one entire band (Hawk Nelson) even landed the role of legendary rock band The Who on an episode of the hit NBC show, "American Dreams."

Today's session highlights a unique opportunity for music supervisors and song writers to join forces and write a song together.
