

Garden State Conference

Friday October 26, 2018- Saturday October 27, 2018

Located at The Princeton Westin Forrestal Village

Sponsored by:

New Jersey Dental Hygienists' Association Presenting:

Lancette VanGuilder

Lancette VanGuilder RDH BS comes to us with a passion for ensuring all communities have access to dental care, the power of prevention, and the utilization of the dental hygienist. After graduating in 1995 from the university of South Dakota with her dental hygiene degree, she has been actively involved in dental hygiene leadership and advocacy on the local, state, and national levels. Lancette is past president of Nevada Dental Hygienists Association and has previously received the Nevada Dental Hygienist of the Year Award. She currently works as a clinician in private practice, in the corporate world as a public health dental hygienist professional educator and is a member of the Premier Dental Professional Speaker Bureau. With Lancette's expertise in public health programs, periodontics, and local anesthesia, we know she will inspire and captivate your dental hygiene world with her continuing education courses.

Morning Continuing Education Course:

"Periodontal Disease Does Not Discriminate Based on Age"

A look at periodontal disease through childhood, adolescence and early adulthood. Many sources shed light on the fact that the majority of the population will experience periodontal disease at some point in their lifetime. We also know that the risk is significantly higher as people age. But when does periodontal disease start? Are we doing enough to prevent it and most importantly, are we doing enough to catch it at its earliest stages?

Course Objectives: Explore demographics of the youth population in the US, **Discuss oral health challenges of today's youth, Review systemic considerations** of periodontal disease, Review comprehensive periodontal assessment and classification, Investigate the need for office protocols for comprehensive assessment, Review case study

Afternoon Continuing Education Course:

"Au Naturele: Oral Health and Homeopathic Trends"

Holistic and alternative medicine trends are on the rise. More and more people are seeking out natural ways to feel better, improve their health and minimize the need for harmful chemicals and invasive procedures. The dental team has the opportunity to serve as a valuable resource for optimal oral and overall health. This course will provide background on natural healing practices as well as an overview of current oral and homeopathic trends and alternative medicine culture.

Objectives: Understand cultural diversity and the role it plays in the dental setting, Discuss research and literature regarding alternative medicine trends, Manage discussions around current oral health and homeopathic trends, Discuss oral health considerations for homeopathic populations, Review current professional recommendations
