

ENTity

NasoView^{LED}

Set Yourself Free!

- Tired of the burden of separate light sources and light guide cables?
- Set Yourself Free!
- Completely portable
- Fully integrated LED Light Source
- Patient visits easier than ever

The revolutionary ENTity NasoView, an LED Illuminated Flexible Nasopharyngoscope, provides a high intensity LED light source that delivers unmatched light output and superior resolution with maximum mobility and flexibility of use.

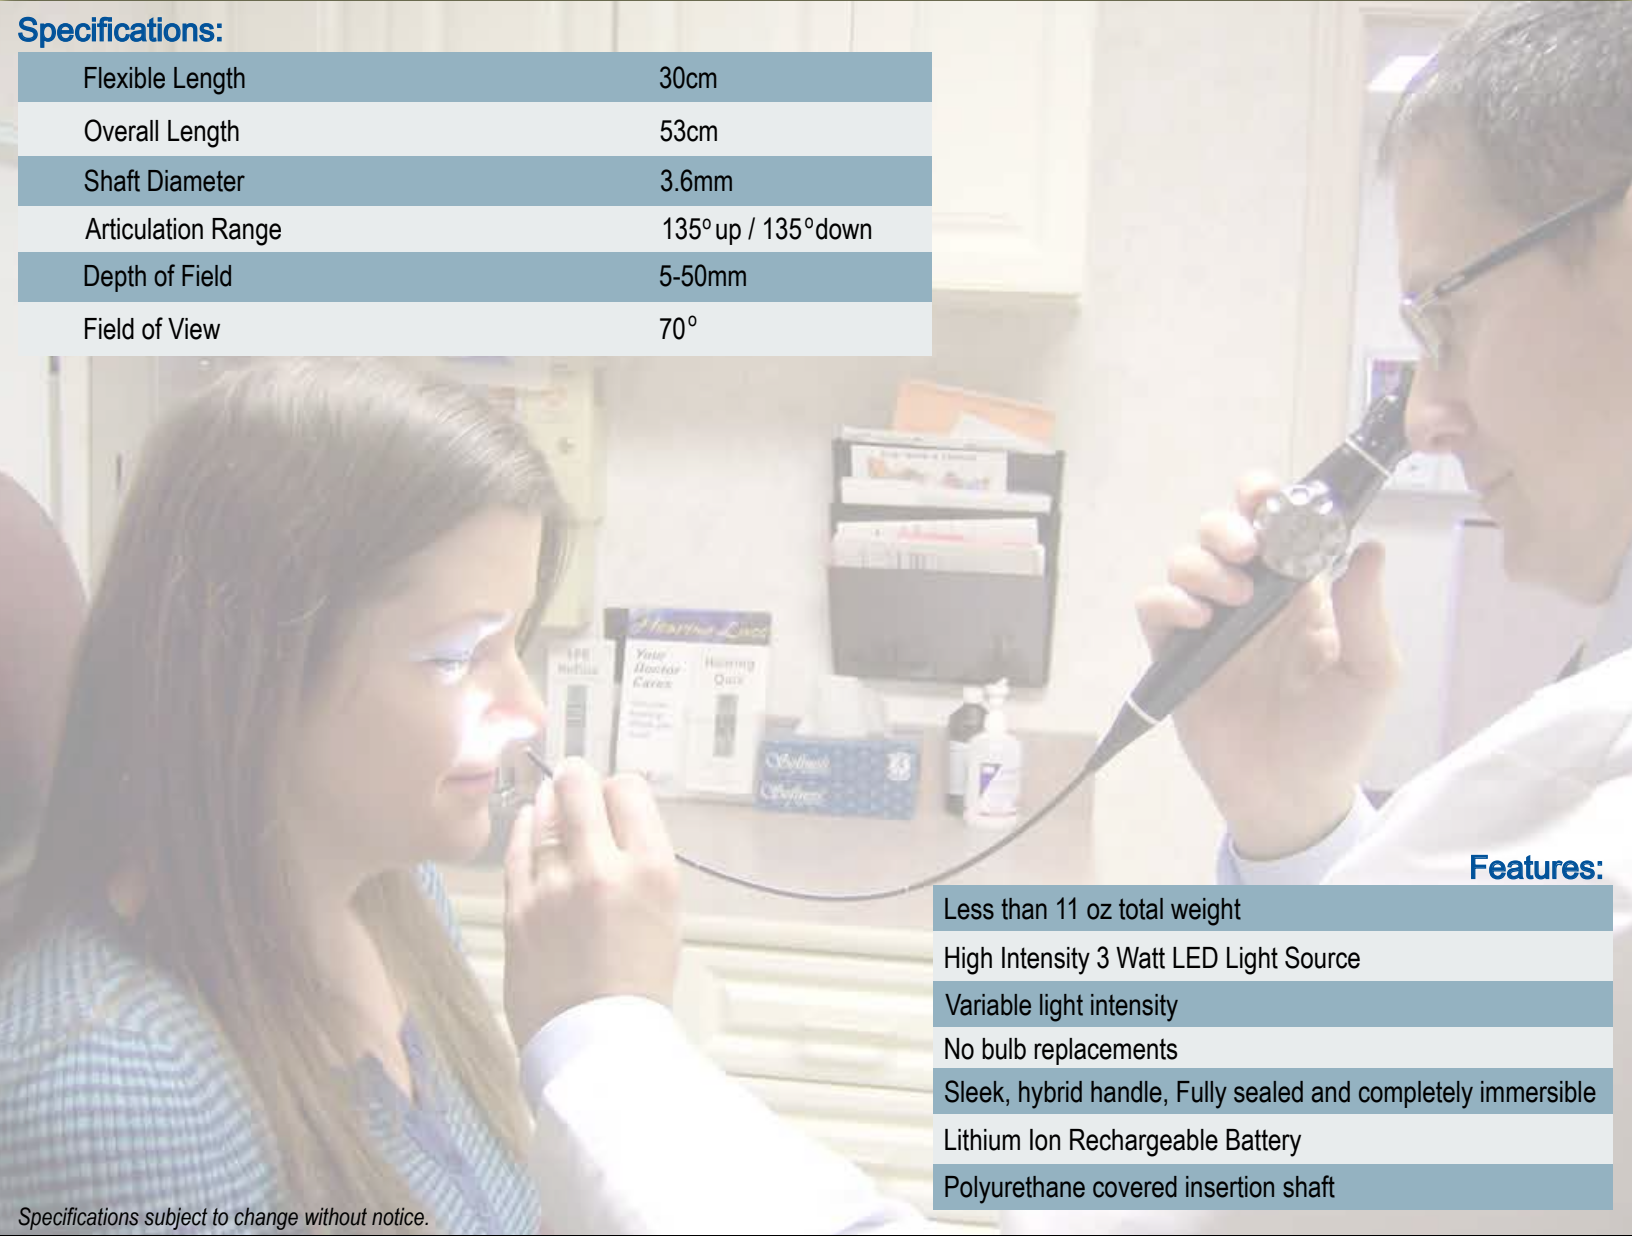

Everything necessary is incorporated in a single, ergonomically pleasing and portable package that eliminates the need for a light guide umbilical and external light source.

Using Optim's patented LED Light Engine Technology, ENTity produces a variable, clean, daylight-white light output. Powered by an internal rechargeable lithium-ion battery, a single charge is typically capable of lasting through a normal day's case load.

By freeing the physician from the "tug" of light guides (umbilicals), external light sources and the need for a wall power connection, the lightweight ENTity provides unparalleled portability and ease of use.

Specifications:

Flexible Length	30cm
Overall Length	53cm
Shaft Diameter	3.6mm
Articulation Range	135° up / 135°down
Depth of Field	5-50mm
Field of View	70°

Features:

- Less than 11 oz total weight
- High Intensity 3 Watt LED Light Source
- Variable light intensity
- No bulb replacements
- Sleek, hybrid handle, Fully sealed and completely immersible
- Lithium Ion Rechargeable Battery
- Polyurethane covered insertion shaft

Specifications subject to change without notice.

US Patent # 7,229,201 and 7,198,397. Other US/Foreign patents pending.
