

Water covers over 70% of the Earth's surface...
and constitutes over 70% of a human body...

- Water Phosphorylcholine or PC has a strong affinity for water.

NEW! from GRACE MEDICAL

- PC coating develops a water layer on it's surface when exposed to fluids.

- The water molecules bind themselves tightly around the ventilation tube making it difficult for proteins and cells to displace the water and bind to the material of the tube.
