AP Academy at Cypress Lake

The goal of the AP Academy is to prepare students for success in their college careers and future workplaces. Through a curriculum with a choice of 21 different AP Courses and 4 tracks of study, students have the opportunity to work at the college level and receive credit starting their freshman year of high school. Enrollment in the AP Academy allows the student to be selective about their areas of expertise and take academically rigorous courses in those areas only. AP courses are recognized by colleges and universities worldwide as the standard of excellence in academic achievement. Driven students can earn 2 years of college credit by the end of their senior year.

AP Academy students will have a faculty advisor and peer mentors that will follow them throughout their 4 years of high school. Students will be given the opportunity to be peer leaders and mentors themselves through the Academy. Internships and development workshops are offered to students and their families to assist with making the transition to the next phase of their academic career.

One of the most appealing aspects of the AP Academy is that it allows the student the flexibility to join the Center for the Arts, JROTC, athletics, and clubs. The AP Academy allows students to enjoy an all-inclusive high school life...Cypress Lake has it all.
