We spent years looking for a way to replace the multitude of chemical cleaners we were using with a single cleaning and sanitizing solution. lotus PRO was the only one who not only promised, but delivered. With lotus PRO, we don't put any chemicals into the environment, we're cleaner and we're cutting costs.

The sheer amount of rooms, of granite, steel and glass we have is a big cleaning challenge. The time my people spent going back to wipe off streaks doubled the time it took them to clean a bathroom. With lotus PRO streaks are a non-issue because there aren't any.

The way lotus PRO removed coffee and beverage stains from carpets and upholstery was as impressive as how well it ate through grime and soapy residue in our showers and grouting. Amazing...

With a cleaning system like this training and support is critical. The lotus PRO team is there for us from top to bottom, start to finish.
