Animal Facilities

- Shedd Aquarium, IL
- Georgia K9, GA

"University Housing has long been committed to creating safe, sanitary living conditions for students living in the residence halls, while trying to be as conscious of our environmental footprint as possible, aqueous ozone is allowing us to take this commitment to an entirely new level by eliminating the need for most of the chemicals we used in the past."

University of Michigan Director of Housing Facilities Vicki Hueter

"From day one of using the product our front-line staff noticed a dramatic change. Floors were cleaner and that harsh chemical smell and residue was eliminated. We have many staff that cannot work with our current chemicals as a result of having serious allergic reactions. The same staff are now using the Lotus Pro® system with no issues whatsoever."

Windsor Regional Hospital President and CEO David Musyj

"We spent years looking for a way to replace the multitude of chemical cleaners we were using with a single cleaning and sanitizing solution. We looked at other chemical-free systems, but Lotus PRO was the only one who not only promised, but delivered. With Lotus PRO, we're greener, we're cleaner and we're spending much less."

MGM House Keeping
