Non-Breeding Agreement

Your puppy has been raised in a normal family environment and has been accustomed to people coming to the door, the vacuum, the telephone, people laughing, other dogs as well as everyday noises. The puppy has been handled and socialised since the moment of birth. The puppy has been examined and declared to be healthy by a licensed veterinarian on **2019 MONTH xx**. The puppy has been micro-chipped, de-wormed with HeartGuard and has received its first vaccinations.

Please follow up with your vet by introducing him to your puppy and have a complete health check by them in 14 days, s/he will also be due for immunization booster at that time. Failure to do so will void health guarantee.

For the health and safety of your family and your puppy, it is required that the puppy continues to follow a regular de-worming schedule (i.e. every month until 6 months of age and receive heartworm testing and prevention treatment (which also treats worms) each year (June-November) or as scheduled by your veterinarian.

This puppy is CKC eligible with a non-breeding agreement and is sold as a pet/companion only; he/she is **not** to be used for breeding purposes. You must arrange to have him/her spayed or neutered by your veterinary before **2 years of age** and provide proof procedure was completed to Lee River Shaggies. Failure to comply with the non-breeding agreement will result in a \$5,000 penalty.

You agree to provide a warm, loving home. The dog is to sleep indoors and be provided with quality food (recommended Purina Pro Plan Puppy, followed by Purina Pro Plan Large Breed), fresh water lots of attention and exercised daily. You agree to provide regular grooming to ensure a mat free coat. You agree to vaccinate the dog when required and ensure it receives veterinary care whenever needed, to ensure optimal health. The dog must also be tested for heartworm on a yearly basis and must receive heartworm prevention for the required months June through November.

Lee River Shaggies will guarantee this puppy until **2** years of age against any hereditary disease. If a hereditary condition is discovered within the first two years the purchaser will obtain from their own veterinarian a signed letter informing the breeder of the diagnosis, along with results of diagnostic tests performed to confirm such a diagnosis. If deemed necessary by the breeder, the pup will be seen by Lee River Shaggies veterinarian for a second opinion at the owners' expense. If the diagnosis is found to be genetic and not by fault of the owners (i.e. excessive exercise as a puppy, a fall, abuse, neglect etc.) the puppy will be returned to Lee River Shaggies with the registration papers duly signed transferring ownership and a replacement puppy will be given at no cost when one becomes available from a future litter.

Lee River Shaggies assumes no financial responsibility for the puppy once you take possession of the puppy. The purchaser is responsible for all healthcare and living expenses for the life of the dog. If the purchaser is unable to care for the puppy for any reason, it is to be surrendered back to Lee River Shaggies. The purchase cost is non-refundable as Lee River Shaggies would be responsible for costs of care, and costs associated with rehoming.

Lee River Shaggies and the buyer **NAME** do hereby indicate by the signatures below that both parties freely and without duress entered into this agreement and are willing to abide by the conditions set forth in this contract.
