

TRUTH ABOUT OBAMACARE COWGER C

by CAIDEN COWGER  December 4, 2012

Many people ask, what is in Obamacare? First of all, Obamacare gives American Employers with over 50 employees (also including part-time employees) the choice between providing insurance that meets the regulations of Obamacare, or they must pay a penalty. In many cases, small business will not be able to afford insurance for their employees, nor the penalty, so they will have to lay off several of the employees. Other than that this is a “plus” according to the liberal democrats.

Obamacare guarantees that Healthcare is available to any legal U.S. resident who cannot obtain "good" healthcare through their employer. Your access to healthcare will no longer be in the hands of health insurance companies, it will be in the hands of the government. The main objective of Obamacare is to get the American People dependent on the government for their healthcare.

In the rest of this article, I have listed some more of the "wonderful" and "beneficial" regulations and mandates in this package. The government will audit books of all employers that self-insure. You can only receive a limited amount of care each year: \$5k per person, and \$10k per family. There will be a government committee that will decide what benefits and treatments you will receive. If you would like to hear a story about that, here is an article about a WWII Veteran from Great Britain that was denied treatment for his blindness. The healthcare commissioner will choose your healthcare for you; you do not have a choice in the decision. Healthcare will be provided to all non-

TRUTH ABOUT OBAMACARE

United States citizens, illegal or otherwise. The government will have access to your personal finances and a healthcare ID card will be issued. This is the part that really gets me. They have no problem issuing a healthcare ID card, but the second a conservative mentions issuing a voter ID card, we are automatically looked upon as racist, hateful people.

The government will have direct access to your bank accounts for "elective funds transfers." To clarify, the government can take money from your bank account(s) without you knowing about it. The Government is creating a healthcare exchange to bring private healthcare plans under government control. AARP members' healthcare coverage will be rationed. Medicaid eligible individuals will be automatically enrolled in Medicaid, no choice. No company can sue the government over price fixing, and there will also be no "judicial review" over the government monopoly. Doctors and the AMA's income will be determined by the government. An employer with a payroll of \$400k and up will pay an 8% tax on all payroll. Any employer with a payroll of \$251k-\$400k who doesn't provide government option will pay a 2%-6% tax on all payrolls. Any nonresident alien will be exempt from paying individual taxes; the American tax payers will pay for them. Officers and employees of the Government Healthcare Administration will have access to all of Americans' financial and personal records.

The government will reduce physician services for Medicaid; seniors and people with low income will be very much affected. And Obama says that he is for the middle and lower class? People who like Obama because of his "give-me" programs, he is actually going to stab you in the back! All doctors, no matter what profession, will be paid the same. The government will set the value of doctors' time and professional decisions. The government mandates and controls productivity for private healthcare industries. The government regulates rental and purchase of power driven wheel chairs. Cancer patients' treatment will be rationed. The government will penalize hospitals that allow re-admission to Medicare patients within 30 days of discharge, or "preventable re-admission."

The government will tell doctors what and how much they can own. The government mandates if hospitals can or cannot expand. The government will restrict enrollment of special-needs individuals. The government mandates "Advanced Care Planning Consultation;" seniors will be interviewed every year to decide what treatment they can and cannot receive. The government will consult and instruct regarding living wills and "durable" powers of attorney; this is mandatory. The government provides approved lists of "end of life" resources. The government mandates program for orders of end of life, or in other words, the government has a say in how you die. An "advanced care planning consultation" will be used frequently as patience's health deteriorates.

TRUTH ABOUT OBAMACARE

The advanced care consultation may include an order for end of life plans. The government will specify which doctors can create an end of life order. The government will decide what level of treatment you will have at end of life. There will be community based home medical services and there will be a monthly payment to such community based organizations.

When the liberals fail to provide important information, they are hiding information from the American people. The goal of *Cowger Nation* is to expose the left as who they truly are, and we have exposed Obamacare, provided you with the facts, now it is your decision on what to do with them.
