

Dyslexia Association of the Pennyrile Mission Statement
"Provide screening, tutoring, advocacy and support services for individuals with dyslexia and related learning differences"

Building Bridges to Reading

A **B**righter future for those participating in the program is the foundation of Dyslexia Association of the Pennyrile. We pride ourselves in serving the community.

The **R**elationships we nurtured this year have allowed us to reach more minorities. It is hoped in the coming year that we will see even a larger increase in this area of service.

As **I**ndividualized instruction is not easy to come by in the public school system, many dyslexic students do not qualify for special education services. This fact alone is the basis for us to offer advocacy services.

New **D**irections with our screening is allowing us to screen based on need instead of monthly. Dr. Thompson continues to add legitimacy to our screenings by providing the write-up.

By **G**etting the word out to various civic clubs and organizations, we have been able to educate the public about dyslexia. It's felt that exposure to our Association will have a positive impact on our growth.

The **E**ffectiveness of the educational tutorial program has sparked 100% retention rate and parental enthusiasm is very high as a result.

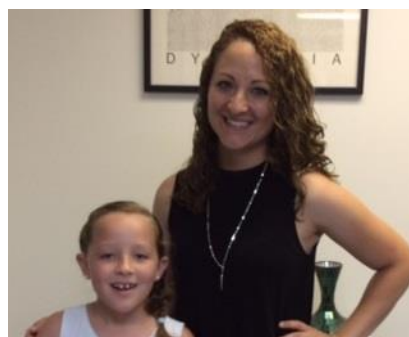

The **S**elf-esteem is evident in the faces of those participants as they receive their incremental awards. The joy of achievement makes it all worthwhile.

"Dyslexia Association came as an answer to prayer for our family. We needed something specifically for helping Joseph learn to read, and hopefully learn to love to read. After just 2 years we've seen amazing results in his reading and self-esteem. Thank you Vicky and everyone else who loves our children and won't stop until we help each child in the program learn to read." **Angela S. (Hopkinsville)**

"The Dyslexia Association has been a gift to my little girl. The year before she was placed in special education and now with the help of the Barton Program she is almost reading at grade level." **Elizabeth W. (Ft. Campbell)**

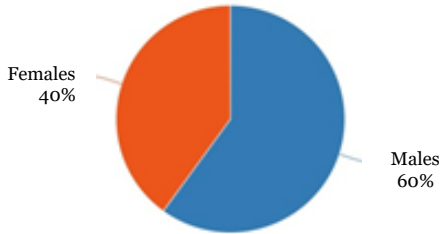

"The Dyslexia Association has provided such success for my child. The Barton Reading sessions have set her on a path to full potential to excel academically, improve her self-esteem and her grades in public school are much better. Thank you for such a wonderful journey for my family." **Michelle M. (Clarksville, TN)**
