

# iSC Touch 250

**A compact payment powerhouse, making a large impact at the point of sale**

Security

Smartcard

Magstripe

Contactless

Signature capture

Touchscreen

## Multimedia

The iSC Touch 250 combines signature capture and touchscreen technologies in a robust, compact design. The device showcases a full range of revenue-producing promotions – ads, videos, couponing, targeted up-selling and cross-selling opportunities, gift card sales, extended warranties, digital signage, and more.

### **Highest Security**

The iSC Touch 250 meets the industry's highest and newest hardware and software security requirements and is PCI PTS 3.x & 4.x certified. It complies with SRED and Open protocol modules, and supports all point-to-point encryption (P2PE) solutions for reduced PCI DSS scope.

### **All Payment Options**

The iSC Touch 250 accommodates all forms of payment including EMV chip & PIN, chip & sign, magstripe, signature capture, and NFC/contactless. It also supports new options such as NFC loyalty, couponing, wallets and QR codes.

### **Designed for Retailers**

Designed for use in demanding multi-lane environments, the iSC Touch 250 features a glass display that is highly resistant to impact and scratches, with a lifespan of 1,000,000 signatures. Its dual-head magstripe reader reduces read errors, while its smartcard reader withstands 500,000 card insertions. Single-cable multi-point mono connector ensures easy integration & terminal replacement.

### **Fast Checkout**

The optimized glass display on the iSC Touch 250 reduces reflectivity and assures outstanding readability even in poor lighting. On the iSC Touch 250, the keypad is large, backlit and ADA-compliant. The fast processor guarantees instant, accurate transactions.

## **Electronic Signature**

The iSC Touch 250 provides high quality, durable signature capture for electronic payments, receipt storage, and business applications, such as contracts, warranty programs, and enrollments. Authentication with biometric signature is available, including speed and screen pressure for better recognition.

## **Real Multimedia**

The powerful hardware video decoder plays multimedia content from the standard ultra-compressed H264 codec using a speaker and a stereo-out headset. The iSC Touch 250 is equipped to manage image libraries, touchscreen and multimedia.
