

# PS60 Parcel Scale for shipping manifest applications

The PS60 Parcel Scale is a member of the PS Scale Family. With its 150 pound capacity and rugged design, it is an ideal choice for today's parcel shipper. It connects easily to a PC and is compatible with all Shipping Manifest Software applications.

The PS60 is NTEP certified so it can be legally used in commercial applications. The National Type Evaluation Program (NTEP) imposes rigorous standards that ensure the high accuracy and reliability of the scales that bear their mark.

Our patented GEOCAL™ calibration feature eliminates the costly need to have the scale site-calibrated. Competitive offerings require certified technicians to calibrate their scale on-site. GEOCAL™ ensures accurate calibration without hiring an expensive technician.

The PS60 features an easy-to-read, large LCD display with viewing angle adjustment.

Step-up to METTLER TOLEDO quality and rely on the world's leading scale manufacturer for all your critical business shipping needs.
