

Solving for Missing Angles in Right Triangles

<p>1. Sides: _____ and _____</p> <p>Trig Function: _____</p>  <p>$\theta =$ _____</p>	<p>2. Sides: _____ and _____</p> <p>Trig Function: _____</p>  <p>$\theta =$ _____</p>
<p>3. Sides: _____ and _____</p> <p>Trig Function: _____</p>  <p>$\theta =$ _____</p>	<p>4. Sides: _____ and _____</p> <p>Trig Function: _____</p>  <p>$\theta =$ _____</p>
<p>5. Sides: _____ and _____</p> <p>Trig Function: _____</p>  <p>$\theta =$ _____</p>	<p>6. Sides: _____ and _____</p> <p>Trig Function: _____</p>  <p>$\theta =$ _____</p>
<p>7. Sides: _____ and _____</p> <p>Trig Function: _____</p>  <p>$\theta =$ _____</p>	<p>8. Sides: _____ and _____</p> <p>Trig Function: _____</p>  <p>$\theta =$ _____</p>
<p>9. Sides: _____ and _____</p> <p>Trig Function: _____</p>  <p>$\theta =$ _____</p>	<p>10. Sides: _____ and _____</p> <p>Trig Function: _____</p>  <p>$\theta =$ _____</p>

*Don't forget about the memory device: **SOH CAH TOA** to help you correctly recall the three different trig functions.

1)

$$\angle A = \underline{\hspace{2cm}}$$

2)

$$\angle A = \underline{\hspace{2cm}}$$

3)

4)

5)

$$\angle A = \underline{\hspace{2cm}}, \angle B = \underline{\hspace{2cm}}$$

6)

$$\angle A = \underline{\hspace{2cm}}$$
