

4 October 2013

Armen has been my piano teacher for one year. I had been playing piano for fourteen years with three different teachers before Armen became my teacher. I believe that Armen has taught me more about piano in one year than all of my other three teachers did in fourteen years.

Armen would truly be a great teacher for any age group and level of skill. Armen establishes a friendly and direct relationship with students and helps each student progress with piano in regards to age, skill level, and goals. Armen explains lessons clearly and has students demonstrate that they understand each skill. Armen re-teaches and clarifies piano skills that students have trouble with and teaches new skills when he observes that students can play the skills they already learned well. Armen shows a genuine interest in teaching students piano and gives students helpful feedback and advice while encouraging them to practice often.

I would like to thank him for his hard work in teaching me. I am honored to be one of his students.

I am very happy to recommend Armen without reservation to anyone who would like to learn or improve piano playing skills.
