How To Get Windows 10 PRO Absolutely Free

Quick note:

You will need a working PC & a USB flash drive & working Internet connection. This is a 3-6 gigabyte download, so make sure you have enough internet bandwidth & space on your hard disc. These are password orinantated downloads, Sorry the best I could do. **All Passwords available for $1 (PayPal).**

1. Go to this link for the Media Creation Tool "Windows 10 32bit and 64bit".
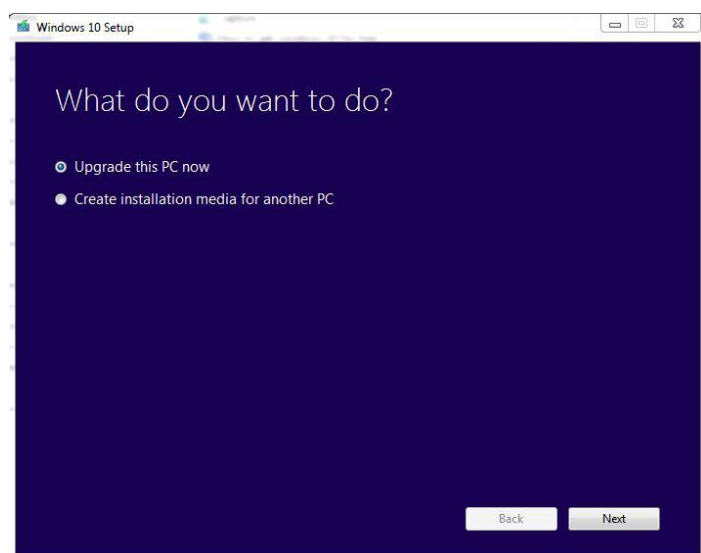

http://depositfiles.com/files/fytg8dztk

2. Run the file, be it 32bit or 64bit.

If unsure what version, right click on my computer and go to properties.
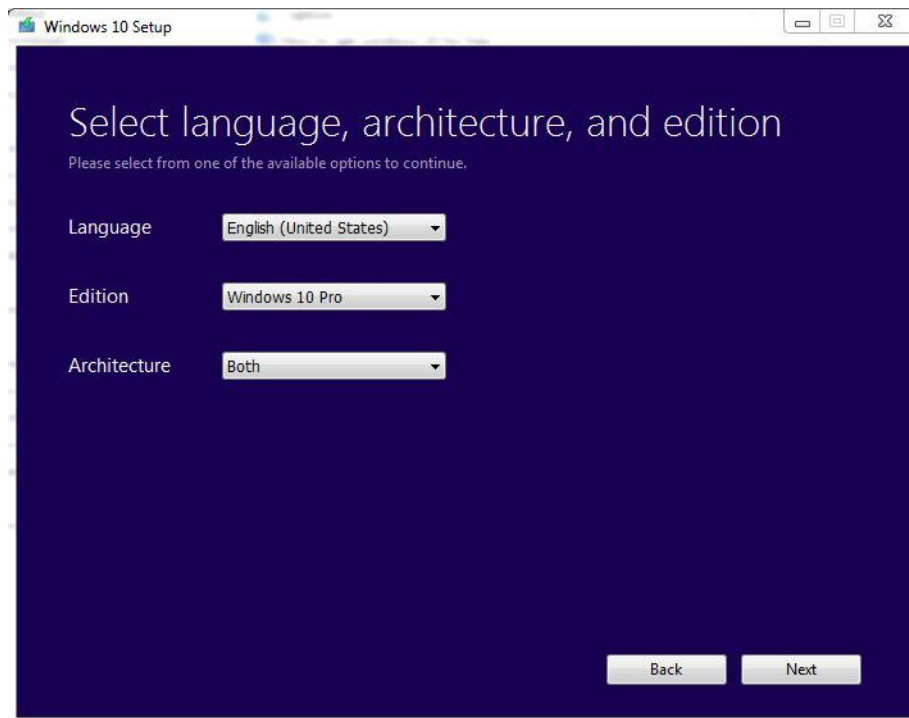

Under system it will tell you what version you have.

**3.** When you get to this section.

Click on create installation media for another PC, & click next.

**4.** Select language, edition (Windows 10 Pro) & architecture (Both) , & click next.

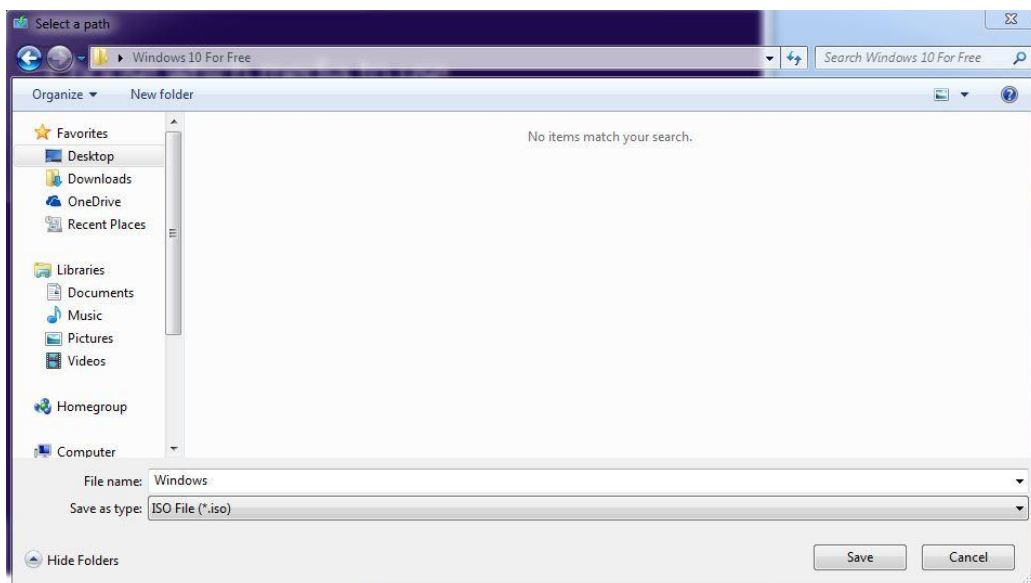

5. Choose what version.

For USB flash drive, plug in your flash drive now. & click next.

For ISO file, click on ISO file. & click next.

Choose where you want to save the ISO file. Desktop is the best if you have room. & click save.

Once you click save, your download will start.

6. At this time, you can download three other programs.

    A. WINISO Portable & WinRar

        http://depositfiles.com/files/412w10d0u

    B. KMSpico

   http://depositfiles.com/files/5cq49bm8n

Getting the right one is difficult, and this is the best link at the moment.

7. Once downloaded, copy KMSpico to the flash drive main directory or open the .ISO with WINISO and drag the extracted folder to the main directory and click save as, Burn .ISO to disc & your done.

8. Installing windows 10 is pretty simple, Just follow the on screen prompts.

Don't input a product key, As KMSpico will do this for you.

9. Once installed, Run KMSpico from installation media & presto, you have a full working copy of windows 10 Pro.

10. Enjoy your free Microsoft Windows 10.
