

Welcome to LCARS bot. This document holds all the commands that the bot contains that the public can use. Some commands are hidden, while others are staff only.

Whenever you wish to use a command, please use the following prefixes before you use the command. Otherwise the bot won't respond.

Prefixes: LCARS, Computer, /, '

Example of using the prefix and commands together:

You: computer version

LCARS: My current version is 1.06. Next update unknown.

You: /rps paper

LCARS: I selected rock. You win.

You: LCARS stun jonny.

LCARS: Setting phasers to stun. Jonny has been stunned.

You: 'holodeck anime

LCARS: Holodeck program anime activated.

The 7 Ranks:

Borg(Level -1)= Suspended from bot

Civillian(Level 0)= Not Enlisted to bot

Ensign(Level 1)= Whitelister. Can use public commands.

Lieutenant(Level 2)= Normal + Special commands.

Commander/Engineers(Level 3)= Normal + Special + Staff commands.

Engineer(Level 3.5)= Normal + Special + Staff commands and some hidden commands.

Captain(Level 4)= Access to all commands.

Level 1 Commands:

Creators - These shows you the owners and contributors of the bot.

Version - This shows you the current version of the bot. It changes a lot since the bot updates constantly.

Kill + Name - LCARS will active a sentry phaser and kill the selected person.

Stun + Name - LCARS will active a sentry phaser and stun the selected person.

Rps + Rock/Paper/Scissors - LCARS will play rock paper scissors with you.

LCARS will randomly pick between rock,paper, or scissors.

Battle + Cardassians/Borg/Klingons/Federation/Pirates/Romulans - You will

Engage in a random battle scenario with one of the selected races.

LCARS will randomly select an outcome of the battle.

Flip - LCARS will flip a coin and randomly select heads or tails.

Roll - LCARS will roll a 6 sided dice and randomly pick 1 to 6.

Holodeck + Anything - This creates a holodeck room

Say + Anything - LCARS will repeat anything you say.

Message + user- Will send a private message to that user under LCARS.

Commands are being updated and added all the time. These are public/working commands. Currently we have 20+ commands that will be added in Version 2.
